The perfect book for young readers looking to explore some of life's biggest questions. Thousands of years ago, ancient philosophers asked some important questions: "What is real?", "What is the point of my existence?", "Why is there evil in the world?", and "What can I know?" These questions have gone on to spark passionate debates about our existence and how we understand the world around us. In this engaging and accessible introduction to philosophy, readers aged 11+ will be introduced to a variety of philosophical ideas through the teachings of Plato, Confucius, Simone de Beauvoir, and many more. Vibrant, reader-friendly illustrations bring the history of ideas and thinking to life, and provide topics for reflection and

debate. With biographies of the most influential philosophers from around the world, young readers will explore the questions that have been fundamental to the development of scientific study, logical thinking, religious beliefs, freedom in society, and much more. Thought experiments peppered throughout will help to connect readers with the theories presented so they can apply them to their own lives.

Highlights the seven wonders of the ancient world and explains the feats of engineering behind constructing each wonder.

Why did the West become so rich? Why is inequality rising? How 'free' should markets be? And what does sex have to do with it? In this passionate and skilfully argued book, leading feminist Victoria Bateman shows how we can only understand the burning economic issues of our time if we put sex and gender – 'the sex factor' – at the heart of the picture. Spanning the

globe and drawing on thousands of years of history, Bateman tells a bold story about how the status and freedom of women are central to our prosperity. Genuine female empowerment requires us not only to recognize the liberating potential of markets and smart government policies but also to challenge the double-standard of many modern feminists when they celebrate the brain while denigrating the body. This iconoclastic book is a devastating exposé of what we have lost from ignoring 'the sex factor' and of how reversing this neglect can drive the smart economic policies we need today.

Could there really be life on Mars? From massive volcanoes twice the size of Mount Everest to a grand canyon as big as America, become a Mars explorer and discover everything there is to know about the Red Planet. Perfect for projects or homework at Key Stage 2.

Popular history, science, and geography topics brought out of the classroom and into the home with fast facts, activities and quizzes. Some subjects are too interesting to be left at school!

Carry on your love of science at home with Stars & Planets - an activity-packed exploration of space and astronomy. Divided into sections, the book starts with fast facts on topics including stars, galaxies, planets, the Solar System, the Universe, and space travel; and the book ends with charts of Solar System facts and space record breakers. Using this information, you can complete the puzzles in the main part of the book, plus there are hands-on activities such as drawing your own scale model of the Solar System and creating a lunar eclipse. Finally, test your new-found knowledge with the quick quizzes (with answers supplied, but no peeking!).

You can keep track of your achievements throughout with a star-chart to fill in every time you finish a page. Note to parents: The Eyewitness Project Book series is devised and written with the expert advice of educational and reading consultants and is designed to appeal to children

aged 8 years and up. First published in 2007-2009, this series has been fully revised and updated for 2020.

The father of the ancient alien theory with more than 65 million books sold reveals everything

he has withheld for years. In all his years of service, why didn't Erich von Däniken ever doubt his theory that inhabitants of other planets had come into contact with humanity ages ago, and that they still observe us today? How could von Däniken in all these years say firmly that the UFO phenomenon is real and that people are being abducted by aliens? Why does he repeatedly criticize the official historiography and our religions and thus accept scorn and hostility? The answers to these questions are: Because Erich von Däniken spoke to people who supported his theories. Because people who saw UFOs or were kidnapped by aliens trusted him. And because experts and insiders inaugurated secrets known to only a few people. In this book, the now 81-year-old presents selected eyewitnesses and insiders for the first time, reveals secrets and stories that he has hitherto kept private, and presents reports and revelations that leave one speechless!
