Beside discussing descriptive issues such as which nations tended to benefit more in a system of trade based on comparative advantage (Mill's answer: those with more elastic demands for other countries' goods), the work also discussed normative issues such as ideal systems of political economy, critiquing proposed systems such as communism and socialism. In every department of human affairs, Practice long precedes Science systematic enquiry into the modes of action of the powers of nature, is the tardy product of a long course of efforts to use those powers for practical ends. The conception,

accordingly, of Political Economy as a branch of science is extremely modern; but the subject with which its enquiries are conversant has in all ages necessarily constituted one of the chief practical interests of mankind, and, in some, a most unduly engrossing one. That subject is Wealth. Writers on Political Economy profess to teach, or to investigate, the nature of Wealth, and the laws of its production and distribution: including, directly or remotely, the operation of all the causes by which the condition of mankind, or of any society of human beings, in respect to this

The standard economics textbook for more than a generation, John Stuart Mill's *Principles of Political Economy* (1848) was really as much a synthesis of his predecessors' ideas as it was an original economic treatise. Heavily influenced by the work of David Ricardo, and also taking ideas from Adam Smith and Thomas Malthus, Mill systematically demonstrated how important economic concepts could be applied to real-world situations. In his emphasis on realism, Mill thus took economics out of the realm of the abstract and placed it squarely within the context of society. For instance, he made a convincing case that wages, rent, and profit are not necessarily the expression of immutable laws that are independent of

society. Rather, they are in actuality the results of social institutions and as such can be changed if the members of society move to break traditional institutional habits. Reflecting his utilitarian social philosophy, Mill suggested that social improvements are always possible. He thus proposed modifying a purely laissez faire system, advocating trade protectionism and regulation of employees' work hours for the benefit of domestic industries and workers' well-being. In such features he displayed a leaning toward socialism. In summing up his objective for this massive work, Mill said later in his Autobiography (1873) that he wished "to unite the greatest individual liberty of action, with a common ownership in
