Fascinating reading on the plight of gay men and women through the ages. The contributors to this compassionate book document how society has made life difficult and even dangerous for homosexual people. Through narrative history as well as biography, these essays trace the legal, social, and physical consequences of

this oppression.

Rejecting the cliché about "weak identity and underdeveloped nationalism," Bekus argues for the co-existence of two parallel concepts of Belarusianness—the official and the alternative one—which mirrors the current state of the Belarusian people more accurately and allows for a different interpretation of the interconnection between the democratization and nationalization of Belarusian society. The book describes how the ethno-symbolic nation of the Belarusian nationalists, based on the cultural capital of the Golden Age of the Belarusian past (17th century) competes with the "nation" institutionalized and reified by the numerous civic rituals and social practices under the auspices of the actual Belarusian state. Comparing the two concepts not only provides understanding of the logic that dominates Belarusian society's self-description models, but also enables us to evaluate the chances of alternative Belarusianness to win this unequal struggle over identity.

This book provides the first comprehensive overview of the syntax of old Romanian written in English and targeted at a non-Romanian readership. It draws on an extensive new corpus analysis of the period between the beginning of the sixteenth century, the of the earliest attested Romanian texts, and the end of the eighteenth century, genera considered to mark the start of the modernization of Romanian. Gabriela Pan?

Dindelegan and her co-authors adopt both a synchronic and diachronic approach by providing a detailed corpus analysis in a given period, while also comparing old and modern Romanian. They examine the evolution of a variety of syntactic phenomena, including the elimination or diminishing of certain facts or generalization of others, the total or partial grammaticalization of phenomena, competition between structures, and cases of syntactic variation. The book takes a typological and comparative perspective, focusing on those phenomena that are considered specific to Romanian (either on the Romance or in the Balkan area), and adopts a modern framework while still remaining accessible to readers from any background.

Bob Dylan is still singing the songs which, for more than forty years, have made him one of the most artistic voices of our time. In this revised and expanded edition of Stephen Scobie's *Alias Bob Dylan*, the author covers all the stages of a remarkable career: not only the incandescent impact on the mid-1960s, when Dylan revolutionized folk and popular music, but also his later reinvention of himself as a traveling performer--the old blues musician whose work may no longer be fashionable but is still intensely relevant and rewarding.

The *Handbook of Violence Risk Assessment, Second Edition*, builds on the first edition's comprehensive discussion of violence risk assessment instruments with an update of research on established tools and the addition of new chapters devoted to recently developed risk assessment tools. Featuring chapters written by the instrument developers themselves, this handbook reviews the most frequently used violence risk assessment instruments—both actuarial and structured professional judgment—that professionals use to inform and structure their judgments about violence risk. Also included are broader chapters that address matters such as the consideration of psychopathy and how the law shapes violence risk assessment. Already the primary reference for practitioners, researchers, and legal professionals in this area, this second edition's easy-to-access,

comprehensive, and current information will make it an indispensable reference for those in the field.

Meteorite Impact!

Decades have passed since the last war, the one that swallowed the world. Afterward there was a heavy sadness that conformed to the lands, bringing with it violence, famine and cruelty. A young man traveling south finds himself in the middle of a desert and a village. Caution of this new stranger was high at first, but quickly subsides, realizing that the young traveler didn't intend harm. After friendly exchanges, the young stranger is introduced to four elders of the village. After sitting down to eat a meal with the elders, they begin inquiring why he's so far out in the desert of old Nevada. Telling them he wanted to see the ruins of the old cities, they begin to describe to him why he shouldn't. Each elder begins to tell their tale about what happened during the great war, how fire fell from the sky, how they survived and the things they had to do. And hopefully for them their words would influence this young man to avoid such things, to stay where it's safe; to live.

Focusing on the mountainous area from northern Alabama to West Virginia, this important volume explores the historic and contemporary interrelations between culture and environment in a region that has been plagued by land misuse and damaging stereotypes of its people. Committed to taking account

of humankind's place in the environment, this collection is a timely contribution to debates over land use and conservation. Debunking the nature culture dichotomy, contributors examine how physical space is transformed into culturally constituted place by a variety of factors, both tangible (architecture, landmarks, artifacts) and intangible (a sense of place, long-term family habitation of land, tradition, a way of life worth fighting for). Archaeologists, cultural geographers, and ethnographers examine how the land was used by its earliest inhabitants and trace the effects of agricultural decline, industrial development, and tourism in the nineteenth and twentieth centuries. name of progress or conservation and track threatened communities' struggles to maintain their claims to place in the face of extralocal counterclaims that would appropriate space and resources for other purposes, such as mountaintop removal of coal or a power company's plans to export electricity from Appalachia to distant urban centers. Contributors also record successful community planning ventures that have achieved creative solutions to seemingly intransigent conflicts between demands for economic wealth and environmental health.

The past remains essential - and inescapable. A quarter-century after the publication of his classic account of man's attitudes to his past, David Lowenthal revisits how we celebrate, expunge, contest and domesticate the past to serve present needs. He shows

how nostalgia and heritage now pervade every facet of public and popular culture. History embraces nature and the cosmos as well as humanity. The past is seen and touched and tasted and smelt as well as heard and read about. Empathy, re-enactment, memory and commemoration overwhelm traditional history. A unified past once certified by experts and reliant on written texts has become a fragmented, contested history forged by us all. New insights into history and memory, bias and objectivity, artefacts and monuments, identity and authenticity, and remorse and contrition, make this book once again the essential guide to the past that we inherit, reshape and bequeath to the future.

Other Paths for Papua New Guinea

Papua New Guinea is going through a crisis: A concentration on conventional approaches to development, including an unsustainable reliance on mining, forestry, and foreign aid, has contributed to the country's slow decline since independence in 1975. Sustainable Communities, Sustainable Development attempts to address problems and gaps in the literature on development and develop a new qualitative conception of community sustainability informed by substantial and innovative research in Papua New Guinea. In this context, sustainability is conceived in terms that include not just practices tied to economic development. It also informs questions of wellbeing and social integration, community-building, social support, and infrastructure renewal. In short, the concern with sustainability here entails undertaking an analysis of how communities are sustained through time, how they cohere and change, rather than being constrained within discourses and models of development. From another angle, this project presents an account of community sustainability detached from

instrumental concerns with economic development. Contributors address questions such as: What are the stories and histories through which people respond to their nation's development? What is the everyday social environment of groups living in highly diverse areas (migrant settlements, urban villages, remote communities)? They seek to contribute to a creative and dynamic grass-roots response to the demands of everyday life and local-global pressures. While the overdeveloped world faces an intersecting crisis created by global climate change and financial instability, Papua New Guinea, with all its difficulties, still has the basis for responding to this manifold predicament. Its secret lies in what has been seen as its weakness: underdeveloped economies and communities, where people still maintain sustainable relations to each other and the natural world.

Uwe Johnson's major novel, *Jahrestage*, is recognized as one of the most important and ambitious works of post-war German literature. The core to this novel is remembrance, and *Jahrestage* is a stunning requiem for the victims of twentieth-century German history. D.G. Bond concentrates on the text,

analysing the novel and the calendar form of this work, and paying particular attention to the ways in which even the minutest details of Johnson's narrative reveal its historical themes. The author discusses Johnson's poetics, offers readings of his other major works, and considers the most recent trends in Johnson reception. He shows how an uncompromising view of German identity after the crimes of the Third Reich constitutes the very heart of Johnson's work.
