In this discussion I have also emphasized the incapability of science to stand alone as a final deciding instrument on matters that extend beyond the natural realm. Hence no proof of the Divine Existence can be established by reference to science alone, but through logical reasoning based on obvious and

Companies are also using advanced Business Intelligence (BI) software to mine the demand signal repository and cull critical insights for action and response. Case in point: Wal-Mart's response to Hurricane Katrina was based on insights gained from mining community consumption trends during previous hurricanes.

The author of 'The Science of Getting Rich' brings you 'The Science of Being Great'. Wallace D. Wattles introduced the world to the power of positive thinking. Greatness is equally inherent in all and therefore every person may become great. Man may overcome both heredity and circumstances by exercising the inherent creative power of the soul. Talent may merely be one faculty developed out of proportion to other faculties, but genius is the union of man and God in the acts of the soul. Great men are always greater than their deeds. They are in connection with a reserve of power that is without limit.
