

The Seed I Planted Wonderwise Readers

During the International Botanical Congress in Edinburgh, 1964, Mrs. I. M. WEISBACH-JUNK of The Hague discussed a plan for preparation by her publishing company (Dr. W. Junk b.v.) of an international Handbook of Vegetation Science. She proposed a series that should give a comprehensive survey of the varied directions within this science, and their achievements to date as well as their objectives for the future. The challenge of such an enterprise, and its evident value for the further development of vegetation research, induced the undersigned after some consideration to accept the offer of the honorable but also burdensome task of General Editor. The decision was encouraged by a well formulated and detailed outline for the Handbook worked out by the Dutch phytosociologists J. J. BARKMAN and V. WESTHOFF. A circle of scholars from numerous countries was invited by the Dr. Junk Publishing Company to The Hague in January 1966 to draw up a list of editors and contributors for the parts of the Handbook. The outline and list have served since for the organization of the Handbook, with no need for major change. The different burdens of editors and authors have compelled quite different timings for completion of the individual sections.

Mick Manning and Brita Granstrom, award-winning author/illustrators of many of the Wonderwise titles, have created an exciting new collection of young non-fiction books that are perfect for children just beginning to read. Each book explores a particular area of learning with a simple narrative text and beautiful illustrations which, where appropriate, are labelled or given very simple captions. This differentiated text gently introduces readers to some of the methods of extracting information from a non-fiction book, but still enables them read the book as a story - or simply look at the pictures. Each book has a list of contents, further information and a glossary/index. I Feel Sick follows the progress of a germ, what it does to people and ways of staying healthy The Seed I Planted looks at seeds and growing new plants, in particular a conker a young child planted 35 years ago.

"CAPTAIN PAUL WATSON IS NO STRANGER TO CONTROVERSY. But this particular conflict was more personal than most. His latest book is a fascinating and thought-provoking account of what happened when anti-whaling activists found themselves at odds with tribal rights. Conservationists, eco-warriors, whale protectors, and supporters of Indigenous traditions—as well as anyone who simply loves a good story—will find themselves captivated by this tale. DEATH OF A WHALE: The Challenge of Anti-Whaling Activists and Indigenous Rights narrates the events as they unfolded. In 1998, Sea Shepherd began a campaign to protect gray whales from slaughter by members of the Makah tribe of the Pacific Northwest, who had recently invoked cultural entitlements to allow them to practice their ancestral hunting rights. Makah members, conservationists, and non-Indigenous Americans vehemently expressed disparate points of view about

whether tribal whaling operations, which had ended almost a century earlier, should be recognized, even when they were not in accord with international Indigenous whaling regulations. This electrifying, real-life adventure story showcases an Indigenous community at odds with itself, governments and media that advance their own agendas, and grassroots organizers who display heroic activism. Highly detailed and documented, the book reveals Captain Watson's deep and unwavering respect for Indigenous traditions and rights, even when they conflict with his own devotion to the sovereignty of whales. "

The Barons' War; Including the Battles of Lewes and Evesham

Planting the Future

Educating

LaRee has spent her life educating from a young girl teaching a primary class through teaching her 7 children at home as well as teaching classes on herbs, oils, homeopathy, and more. This book is her memoir. This book is my memoir- a memoir that for several years now, I have known I would write one day. But let's set the record straight right here. Part, but only part, of the impetus for writing my memoir at this time, is the publishing of our daughter's book, Educated. I want to tell the story of my life as I really lived it and not in the dramatically fictionalized way others, based on my daughter's book, are telling it for me. I want my grandchildren to know who their grandmother is and was, I want to be a force for good in their lives. Also, I feel a compelling desire to shine a light on homeschooling, herbal medicine, and the living of a conservative and Christian way of life.

Many vegans desire foods they can sink their teeth into—a bite with substance that leaves them feeling satisfied. Others miss the flavor of the animal-based dishes they grew up with or that were part of their cultural tradition. Those cravings can be now be put to rest. Vegan cooks everywhere are about to experience a new dimension of possibilities thanks to chef Skye Conroy's culinary masterpiece CRAFTING SEITAN: Creating Homemade Plant-Based Meats. With detailed instructions and mouthwatering food photography throughout, this guide is a welcome introduction to cooking seitan (aka "gluten meat" or "vital wheat gluten") and showcasing its versatility. Over 100 recipes that include Juicy roasts, tender cutlets, toothsome steaks, as well as hard salami, hand-rolled sausages, and pepperoni, now can be part of a vegan menu. These recipes deliver the appearance, texture, and flavors that will convince family and friends of all dietary persuasions that a plant-based diet has plenty to offer and nothing to lose. Homemade also means more budget-friendly meals and the ability to monitor the amount of salt and oil that's used. These recipes provide a ready answer to "where's the beef?"

Winner of the United Kingdom Literacy Association's Author Award 2011 for its contribution to extending children's literacy. Praise for the book: 'This book is about making readers. A compact summary of its contents would not do it justice. It is the account of a life's work and it deserves thanks and readers. *****'. - Margaret Meek, Books for Keeps on-line, Number 185, November 2010. 'This book is a cornucopia of varied pleasures, offering something for all tastes, presented with an awareness of the complexities of the field and communicated with commitment, enthusiasm and deep knowledge'. - Eve Bearne, English 4-11, the primary school journal of The English Association, Number 42, Summer 2011. Choosing and Using Fiction and Non-Fiction 3-11 is a guide to the many kinds of text we want children to encounter, use and enjoy during their nursery and primary school years. So children's non-fiction literature – including autobiography, biography, information and reference texts – is given equal status with fiction – nursery rhymes, picturebooks, novels,

traditional tales, playscripts and poetry. The author addresses important issues and allows the voices of teachers, reviewers and children to be heard. The book supports teachers as they help children on their journey to becoming insightful and critical readers of non-fiction and sensitive and reflective readers of fiction. It also contains suggestions for practice which are in the spirit of the more flexible and creative approach to learning towards which primary schools are moving. It includes: help on using criteria to select quality texts of all kinds; annotated booklists for each kind of text for different age groups; suggestions for keeping a balance between print and screen-based texts; case studies showing teachers and children using texts in interesting and imaginative ways to support learning in English lessons and across the curriculum; advice on developing children's visual and multimodal literacy; guidance on using the school library and embedding study skills in children's wider purposes and learning; critiques of key theoretical perspectives and research projects. Although the main readership will be primary and student teachers, it is hoped that the book will be of interest and use to anyone concerned with the role of texts in children's learning.

Audisee® eBooks with Audio combine professional narration and sentence highlighting to engage reluctant readers! Are zombies real? As far as we know, dead people do not come back to life and start walking around, looking for trouble. But there are things that can take over the bodies and brains of innocent creatures, turning them into senseless slaves. Meet nature's zombie makers—including a fly-enslaving fungus, a suicide worm, and a cockroach-taming wasp—and their victims.

It's a dark day for Itching Down. Four million wasps have just descended on the town, and the pests are relentless! What can be done? Bap the Baker has a crazy idea that just might work . . . Young readers will love this lyrical, rhyming text as they watch the industrious citizens of Itching Down knead, bake, and slather the biggest wasp trap there ever was! John Vernon Lord's bright ink and crayon illustrations fill the pages with humorous detail.

"Dunbar is the first American Negro of pure African blood to reveal innate distinction in literature; as W.D. Howells has said, "to feel the Negro life esthetically and express it lyrically.

Margaret Cavendish's *Observations upon Experimental Philosophy* holds a unique position in early modern philosophy, drawing on the doctrines of ancient Stoicism to attack the tenets of seventeenth-century mechanical philosophy. Her treatise is a document of major importance in the history of women's contributions to philosophy and science.

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Western literary study flows out of eighteenth-century works by Alexander Pope, Daniel Defoe, Henry Fielding, Frances Burney, Denis Diderot, Johann Gottfried Herder, Johann Wolfgang von Goethe, and others. Experience the birth of the modern novel, or compare the development of language using dictionaries and grammar discourses. ++++ The below data was compiled from various identification fields in the bibliographic record of this title. in 1897, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. We believe the literary significance of the text justifies offering this reproduction, allowing a new generation to appreciate it.

In this text a mother and baby look through a window at a wilderness. With each page the boy grows and the scene changes, by the time he is 20 the view is of a city. He gets married and has a child and moves to the country, where father and child look through the window at the wilderness outside.

Lyrics of Life and Love

How a House Is Built

Voted one of the Top 10 books in 2000 by the Vermont Book Publishers Association. A collective endeavor by United Plant Savers, featuring America's most respected and well-known herbalists. Contributors include Don Babineau, Tim Blakley, Mark Blumenthal, Jane Bothwell, Stephen Harrod Buhner, David Bunting, Richo Cech, Tane Datta, Shatoiya and Rick de la Tour, Ryan Drum, Doug Elliott, Steven Foster, Cascade Anderson Geller, Kate Gilday, Rosemary Gladstar, James Green, Pamela Hirsch, Christopher Hobbs, Sara Katz, Kathi Keville, Robyn Klein, Richard Liebmann, Brigitte Mars, Pam Montgomery, Nancy and Michael Phillips, Janice J. Schofield, Joanne Marie Snow, Deb Soule, Paul Strauss, Gregory L. Tilford, Krista Thie, Susun S. Weed, David Winston, Martin Wall, Matthew Wood. While the renaissance in the U.S. botanical market is positive in many respects, medicinal plant populations are suffering from loss of habitat and overharvesting, and many bestselling herbs are now at risk including echinacea, American ginseng, goldenseal, Hawaiian wild kava, and wild yam. The authors share their extensive experience with using and growing thirty-three of these popular herbs and include suggestions for creating your own private herbal sanctuary--whether a city balcony, suburban backyard, or rural retreat. Full-color photographs will inspire experienced and novice herb users alike to protect and cultivate these remarkable healing plants. Readers will also find out how to use herbal analogues for at-risk plants--other medicinal herbs that provide the same benefits and exist in plentiful amounts--and learn ways to make their herbal purchases a vote for sustainability. Planting the Future shows us how we can participate in the land stewardship, habitat protection, and eco-friendly consumption that will ensure an abundant, renewable supply of medicinal plants for future generations.

All author royalties will be used for replanting native medicinal herbs on a 370-acre botanical sanctuary in Ohio.

Written by a fourteenth-century cleric, this spiritual allegory explores man in relation to his ultimate destiny against the background of teeming, colorful medieval life

A classic resource for teachers is now back in an updated edition! Using an inductive and experimental approach, *Animal Coloration* aims to increase students' awareness of the ways wild organisms are adapted to their environments. Even though the activities suggest a specific teaching procedure, each activity is also intended to be an investigation by the students and an opportunity for them to make and test hypotheses based on their observations. Through these activities, students will begin to appreciate how scientific knowledge and understanding were attained. Each of the activities provides an opportunity to incorporate US National Science Education Content Standards, including science and inquiry, life science, and history and nature of science. Also new to this revision is a table summarizing each activity with learning outcomes and relevant content standards. Originally published in 1966 by the Regents of the University of California, *Animal Coloration* is the result of over five years of field-testing and experimentation by the Elementary School Science Project at UC Berkeley. This book was difficult to find for far too long, so NSTA Press is especially proud to bring the book to a new generation of teachers and to update the work for its long-time admirers.

Building Our House

Fruit trees are delicate and need specialized care, especially when they're planted in an urban environment, which comes with its own unique challenges. Whether you want to plant a single fruit tree or an entire orchard, this book will show you how to save time and money and be successful right from the start. A professional orchardist, Susan Poizner guides novices and experts alike through every step of the process. She describes which key elements are necessary in site preparation and offers a basic overview of the anatomy of fruit trees. Susan also explains how to select trees and covers critical concerns, such as cross-pollinating versus self-pollinating trees, bare-root versus potted trees, and whether the fruit will be for eating, cooking, or canning. Thorough instructions are provided for planting and staking, as well as pointers on how to care for both young and mature trees. From assessing soil to selecting the right fertilizer, from pruning trees to choosing the proper tools, and from boosting biodiversity to preventing pests and diseases, no leaf is left unturned. This vast wealth of knowledge is accompanied by illustrations and color photos, along with inspiring stories of orchards and tree farms. A multi-award winning series of non-fiction picture books Two excellent topics which link into the curriculum for maths, science, technology and history Includes helpful notes on making the best use of the books.

All at once, it was as if the stars leapt closer. Grandma grabbed the boy, raising him high above the rooftiles on her head. She was alive! The boy's grandma was a famous architect. Her garden is still full of old building materials. Unwilling to accept she has gone, the boy builds a giant structure from the bricks and girders he finds. And then ... Grandma comes to life! The boy is whisked away on an epic adventure across fields, through oceans and atop roofs. But where is Grandma taking him? Beautiful, thrilling and extremely moving: the extraordinary debut picture book from much-loved author, Ross Montgomery.

Saving Our Medicinal Herbs

In a sense Montserrat was twice locked down. The island is one of the few places outside Ireland where St. Patrick's Day, 17 March is celebrated as a holiday. This is because Irish people exiled by the British in the first place, featured prominently in the island's colonization. In fact Montserrat became an asylum for Roman Catholics fleeing religious persecution from both sides of the Atlantic. Additionally, an attempt by slaves to overthrow the planter-lords on that celebration day in 1768, is commemorated annually by Montserratians who see their forebears as freedom fighters. The emphasis on the Montserrat celebration is now somewhat mixed and the supposed Irishness of the island is now highlighted to the ire of some persons. However it is now one of the island's leading festivals designed to draw many to the island where events last for some ten days and take on a carnival atmosphere. Eyes are on the tourist dollar and Montserratians themselves are part of tourism pack. A packed programme was in the offing for 2020 and visitors had begun to arrive when preliminary sounds of the pandemic hit the air causing the government to close down the St. Patrick's extravaganza. That was lockdown number one and many were resentful. This was just a prelude to the curfews and quarantines which came in the wake of COVID-19. One could not but write about this sudden catastrophe that descended on the world and upon us. It was a social and

economic earthquake exceeding the Richter scale. In a strange way also, lockdown itself facilitated writing whether as therapy or something to do with one's time. Hence the main theme of this volume; and pandemic poems assumed a sharper edge and emotional meaning when I myself was infected by the virus, thankfully without its notorious nasty and wasting symptoms. I became in part the subject of my verse, my verse of mature years and experience, and hopefully serious crafting. The volume is not exclusively about lockdown. There is always the good and great and not so great to celebrate including the dead. Kamau Brathwaite, Kobe Bryant and Hammy White, a larger than life local figure, are there. A personal element came in here also. The dead included a number of cousins and village people who had windrushed to England in the 1950s leaving their bones their now. These nostalgic pieces pregnant with social history, will hopefully touch the reader as they have touched me. And there are always poems for the occasion whether the yellow waste of mangoes or racial discrimination issues. Even when the poems are not on the coronavirus theme, many of them were written during the lockdown period. The book is therefore a memorial and testimony to a watershed event in human history, including the Montserrat chapter of that history.

Houses are built with many different materials, and in many shapes and sizes. Step by step, this picture book explains how homes are built—from the architect's plans through the arrival of a happy family. The many processes of construction are explained with simple language and bright, clear illustrations, perfect for kids starting to wonder about how the world around them works. Many different careers—including carpenters, plumbers, electricians, and landscapers—are introduced, each doing their part to bring the picture wood-frame house to life. A great read for kids who love construction sites, or who can't get enough of Building a House by Byron Barton. According to The Washington Post, Gail Gibbons "has taught more preschoolers and early readers about the world than any other children's writer-illustrator." Ms. Gibbons is the author of more than 100 books for young readers, including the bestselling titles From Seed to Plant and Monarch Butterfly. Her many honors include the Washington Post/Childrens Book Fuild Nonfiction Award and the NSTA Outstanding Science Trade Book Award.
