The Stroke Book

Dr. Mike Dow is a best-selling author, psychotherapist, and relationship expert. So why is he writing a book about stroke? Well, what you probably don't

Read Book The Stroke Book

know about Dr. Mike is that his younger brother, David, is a stroke survivor. What's more, David's stroke happened when he only 10 years old. This means most of Dr. Mike's teenage years were spent witnessing what his

Read Book The Stroke Book

family was dealing with trying to find the best treatments for David. He struggled to know what to do to help his brother. He watched helplessly as his brother wrestled with depression, trying to find the

Read Book The Stroke Book

motivation to recover on top of the challenges of adolescence. He mourned the loss of what could have been —and he was angry. How his family would have loved to sit down with top experts in stroke to find out what

Read Book The Stroke Book

they should be doing and have their questions answered. Now Dr. Mike has the ability to do just that, and he's doing it so that others in his family's position don't have the same struggle. Armed with questions from

Read Book The Stroke Book

stroke survivors and their loved ones, Dr. Mike talks with the best clinicians across the country to get over 100 answers you need to know to maximize your recovery.

During her career as a clinician

Read Book The Stroke Book

and researcher, Christine H. Davis has worked with and written about the phenomenon of aphasia. Aphasia leads to word- and sentence-formation difficulties and is associated with damage to the left hemisphere of

Read Book The Stroke Book

the brain often from strokes or tumors. Davis was urged by stroke survivor, Michael W. Maher, to write these stories as a valuable contribution to the aphasia literature as experienced by her patients. These stories are

Read Book The Stroke Book

from the survivor's perspective as they struggle to express themselves. Their battle to join their families and communities says much about what is crucial about language and the meaning of being human. The book is

Read Book The Stroke Book

divided into sections by aphasia type: anomic, Broca's, Wernicke's and mixed aphasias. Within each section survivors and their families explain their recovery from the onset of the stroke through discharge home

Read Book The Stroke Book

and into a meaningful life forward. Through the testimony of thirteen stroke survivors and seventeen of their family members, you gain an understanding of aphasia and the remarkable resilience of

should deal with the loss of ability, but it's a book full of hope for stroke survivors. It gives them and their support network a broad picture of what might lie ahead. And it explores some critical questions that, in the

Read Book The Stroke Book

more prevalent focus on physical recovery, are all too often overlooked in the effort to help people who have lost capabilities from stroke or otherwise.

Appearing for the first time in an English-language edition, The

Read Book The Stroke Book

Stroke puts forward a genuine theory of writing that is, the concepts behind letters on the page, whether by pen, pencil, or brush. Concerned not with art calligraphy and beautiful forms, *The Stroke* is a description of the

Read Book The Stroke Book

phenomenon of letters and how they are made in writing. Starting from basic principles, Noordzij begins with the white space that creates definition by surrounding letters. Then, using simple geometrical concepts, he

Read Book The Stroke Book

describes in minute detail how the strokes of writing can be formed. His theory serves to repair the split that grew up, with the invention of printing, between written and typographic letters. With *The Stroke*, Noordzij can be

Read Book The Stroke Book

seen as a prophet of digital typography committed to freeing typefaces from the constraints of their embodiment in metal.
