*This is volume two of a two-volume study of a war and moon god religion that was based on the Mideast moon god religion of Sin.*

*Grun's Tales is the story of a grandfather entertaining his grandsons by sharing stories of great vikings. It's a tradition he picked up from his father who picked it up from his father before him, and so Grun's adventures are recounted as a storm brews outside. Closer, family issues surface through the telling holding equal potential to launch them all overboard.*

Take a fresh look at the Bible while you experience a new translation. The Common English Bible is relevant, readable, and reliable. The result is a new version that the typical reader or worshipper is able to understand. 115 leading biblical scholars from 22 faith traditions and 77 reading specialists in 13 denominations worked on this translation.

Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions contains invited, keynote and theme lectures and regular papers presented at the 7th International Conference on Earthquake Geotechnical Engineering (Rome, Italy, 17-20 June 2019). The contributions deal with recent developments and advancements as well as case histories, field monitoring, experimental characterization, physical and analytical modelling, and applications related to the variety of environmental phenomena induced by earthquakes in soils and their effects on engineered systems interacting with them. The book is divided in the sections below: Invited papers Keynote papers Theme lectures Special Session on Large Scale Testing Special Session on Liquefact Projects Special Session on Lessons learned from recent earthquakes Special Session on the Central Italy earthquake Regular papers Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions provides a significant up-to-date collection of recent experiences and developments, and aims at engineers, geologists and seismologists, and consultants, public and private contractors, local national and international authorities, and to all those involved in research and practice related to Earthquake Geotechnical Engineering.

Essays on the Interpretation of the Hebrew Bible in Honor of David L. Petersen

The Three Temples

The striking image of the winged Yahweh occurs in six psalms (e. g., Ps 17:8 Hide me in the shadow of your wings). Scholars have disagreed on the background, meaning, and significance of the image, arguing that it: (1) likens the Israelite deity to a bird; (2) alludes to the winged sun disk; (3) draws from general Egyptian symbolism for protection; (4) evokes images of winged goddesses; or (5) refers to winged cherubim in the temple and/or on the ark of the covenant. These divergent proposals signal a need for clearer methods of interpreting biblical imagery in light of visual-artistic material from the ancient Near East. This volume refines iconographic methodologies by treating the image of the winged Yahweh as one among a constellation of literary images in each psalm. Since the portrayals of Yahweh in each psalm have distinct contours, one finds several congruencies in Syro-Palestinian iconographic material. The congruent iconographic motifs for Yahweh's winged form include (1) the winged sun disk (in multiple forms and variations), (2) the Horus falcon, (3) winged suckling goddesses, and (4) winged deities in combat. No single image stands behind the portrayals of Yahweh. In fact, even within a single psalm, more than one iconographic trope can provide congruency with the literary imagery and inform the interpretation of the text. Thus, the winged Yahweh in the Psalms provides an example of a 'multistable' literary image, one which simultaneously evokes multiple iconographical motifs.

Rachel Elior demonstrates convincingly how the Jewish mystical tradition crystallized in its early stages. She attributes its origins to priests prevented by circumstances from serving in the Temple: replacing the earthly Temple liturgically and ritually with a heavenly Merkavah and heavenly sanctuaries known as Heikhalot, they created a mystical world in which ministering angels replaced Temple priests, thereby giving Judaism a new spiritual focus.

Jordan's Extraordinary Ancient City

The Temple Complex at Horvat Omrit

*The Holy Bible, According to the Authorized Version (A.D. 1611)*

*The ruins of Petra, the ancient Nabatean capital in today's Jordan, constitute one of the most extraordinary and fascinating monumental complexes of the ancient world for the outstanding quality of the architecture and for the city's remarkable position, set amidst rugged hills and narrow gorges. From the fantastic Khasnef to the gigantic Deir, from the spectacular Urn Tomb to the mysterious Temple of the Winged Lions, every monument is described in detail and examined in relation to the complex historical and artistic events of the Rose-red City, the evolution of which is analyzed at length in the introductory chapter. Petra is not unique for its architecture alone. Here, Mother Nature has achieved one of her most original creations, defying her very own rules, laid down at the beginning of time - improbable geometry, unbelievable colors, contrasts that would by unthinkable elsewhere. The illustrations in this book pay tribute to this splendor and make it a work of rare emotional impact.*

As the field of biblical studies expands to accommodate new modes of inquiry, scholars are increasingly aware of the need for methodological clarity. David L. Petersens teaching, research, and service to the guild are marked by a commitment to such clarity. Thus, in honor of Petersens work, a cohort of distinguished colleagues presents this volume as an authoritative and up-to-date handbook of methods in Hebrew Bible scholarship. Readers will find focused discussions of traditional and newly emerging methods, including historical criticism, ideological criticism, and literary criticism, as well as numerous case studies that indicate how these approaches work and what insights they yield. Additionally, several essays provide a broad overview of the field by reflecting on the larger intellectual currents that have generated and guided contemporary biblical scholarship. The contributors are Yairah Amit, Pablo R. Andiaeh, Alan J. Avery Peck, John Barton, Bruce C. Birch, Susan Brayford, William P. Brown, Walter Brueggemann, Mark K. George, William K. Gilders, John H. Hayes, Christopher B. Hays, Ralph W. Klein, Douglas A. Knight, Beatrice Lawrence, Joel M. LeMon, Christoph Levin, James Luther Mays, Dean McBride, Carol A. Newsom, Kirsten Nielsen, Martti Nissinen, Gail R. ODay, Thomas Rmer, C. L. Sew, Naomi Steinberg, Brent A. Strawn, Marvin A. Sweeney, Gene M. Tucker, and Robert R. Wilson.

Dion Fortune's esoteric novels were written as guides to magic and inner development to be used along with her great nonfiction work The Mystical Qabalah. This book shows how to work with her most popular creations, exploring how the stories and characters can help you integrate the secrets of the Tree of Life and discover what Fortune called “the keys to the temple.” Authors Penny Billington and Ian Rees show how to use Fortune's brilliant insights to gain a direct sense of being present in your body, master the art of the embodied imagination, discover your vitality, and open up to the clarity and love that arise from the root of your being. With an exploration of Fortune's writings, experiential practices, and a hands-on workbook section, you will learn to utilize the wealth of esoteric wisdom found in The Mystical Qabalah, The Goat-Foot God, The Sea Priestess, The Winged Bull, and Moon Magic. Praise: “This wonderful evocation of Dion Fortune's esoteric novels offers initiatory and practical pathways to the neophyte and reader!”—Caitlin & John Matthews, authors of The Lost Book of the Grail

Merit is a servant girl in the temple of cat goddesses. In a rage, Waha, the High Priest, kills a sacred car, and Merit sees him do it. But when Merit reports the evil deed to Pharaoh, Waha denies that he is guilty> "Hear me!" says Pharaoh. "You must each take the magic spells from the Book of the Dead and travel to the Netherworld." Will Truth conquer all?

This book surveys systematically all the aspects of the religion of the Nabataeans of ancient Petra, including such important themes as the divinisation of kings and comparisons with Judaism and Islam. It is the first monograph ever devoted to this subject.

The World between Empires presents a new perspective on the art and culture of the Middle East in the years 100 B.C.–A.D. 250, a time marked by the struggle for control by the Roman and Parthian Empires. For the first time, this book weaves together the cultural histories of the cities along the great incense and silk routes that connect southwestern Arabia, Nabataea, Judaea, Syria, and Mesopotamia. It captures the intricate web of influence and religious diversity that emerged in the Middle East through the exchange of goods and ideas. And for our current age, when several of the archaeological sites featured here—including Palmyra, Dura- Europos, and Hatra—have been subject to deliberate destruction and looting, it addresses the crucial subject of preserving what has been lost and contextualizes the significance of these works on a local and global scale. This essential volume features 186 objects of exceptional importance from Europe, the Middle East, and the United States. Readers are taken on a fascinating journey that explores sites of intense political and religious struggles against Roman rule as well as important religious centers and military bulwarks of the Parthian Empire. Reaching across two millennia, The World between Empires brings vividly to life how individuals and cities in ancient times defined themselves, and how these factors continue to resonate today. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana}

The Etruscans can be shown to have made significant, and in some cases perhaps the first, technical advances in the central and northern Mediterranean. To the Etruscan people we can attribute such developments as the tie-beam truss in large wooden structures, surveying and engineering drainage and water tunnels, the development of foresail for fast long-distance sailing vessels, fine techniques of metal production and other pyrotechnology, post-mortem C-sections in medicine, and more. In art, many technical and iconographic developments, although they certainly happened first in Greece or the Near East, are first seen in extant Etruscan works, preserved in the lavish tombs and goods of Etruscan aristocrats. These include early portraiture, the first full-length painted portrait, the first perspective view of a human figure in monumental art, specialized techniques of bronze-casting, and reduction-fired pottery (the bucchero phenomenon). Etruscan contacts, through trade, treaty and intermarriage, linked culture with Sardinia, Corsica and Sicily, with the Italic tribes of the peninsula, and with the Near Eastern kingdoms, Greece and the Greek colonial world, Iberia, Gaul and the Punic network of North Africa, and influenced the cultures of northern Europe. In the past fifteen years striking advances have been made in scholarship and research techniques for Etruscan studies. Archaeological and scientific discoveries have changed our picture of the Etruscans and furnished us with new, specialized information. Thanks to the work of dozens of international scholars, it is now possible to discuss topics of interest that could never before be researched, such as Etruscan mining and metallurgy, textile production, foods and agriculture. In this volume, over 60 experts provide insights into all these aspects of Etruscan culture, and more, with many contributions available in English for the first time to allow the reader access to research that may not otherwise be available to them. Lavishly illustrated, The Etruscan World brings to life the culture and material past of the Etruscans and highlights key points of development in research, making it essential reading for researchers, academics and students of this fascinating civilization.

This volume considers the relationship between architectural form and different layers of identity assertion in Roman Egypt. It stresses the sophistication of the concept of identity, and the complex yet close association between architecture and identity.

For more than 200 years, archaeological sites in the Middle East have been dug, sifted, sorted, and saved by local community members who, in turn, developed immense expertise in excavation and interpretation and had unparalleled insight into the research process and findings—but who have almost never participated in strategies for recording the excavation procedures or results. Their particular perspectives have therefore been missing from the archaeological record, creating an immense gap in knowledge about the ancient past and about how archaeological knowledge is created. Why Those Who Shovel Are Silent is based on six years of in-depth ethnographic work with current and former site workers at two major Middle Eastern archaeological sites—Petra, Jordan, and Çatalhöyük, Turkey—combined with thorough archival research. Author Allison Mickel describes the nature of the knowledge that locally hired archaeological laborers exclusively possess about artifacts, excavation methods, and archaeological interpretation, showing that archaeological workers are experts about a wide range of topics in archaeology. At the same time, Mickel reveals a financial incentive for site workers to pretend to be less knowledgeable than they actually are, as they risk losing their jobs or demotion if they reveal their expertise. Despite a recent proliferation of critical research examining the history and politics of archaeology, the topic of archaeological labor has not yet been substantially examined. Why Those Who Shovel Are Silent employs a range of advanced qualitative, quantitative, and visual approaches and offers recommendations for archaeologists to include more diverse expert perspectives and produce more nuanced knowledge about the past. It will appeal to archaeologists, science studies scholars, and anyone interested in challenging the concept of “unskilled” labor.

This unique approach to Egyptian mythology takes readers on a tour up the Nile, stopping at the most famous monuments and vividly retelling the myths connected to each site. Join Egyptologist Garry J. Shaw on an entertaining tour up the Nile, through a beautiful and fascinating landscape populated with a rich mythology: the stories of Horus, Isis, Osiris, and their enemies and allies in tales of vengeance, tragedy, and fantastic metamorphoses. Shaw retells these stories with his characteristic wit, and reconnects them to the temples and monuments that still stand today, offering a fresh look at the most visited sites of Egypt. The myths of ancient Egypt have survived in fragments of ancient hymns and paintings on the walls of tombs and temples, spells inked across coffins, and stories scrawled upon scrolls. Illustrations throughout bring to life the creation of the world and the nebulous netherworld; the complicated relationships between fickle gods, powerful magicians, and pharaohs; and eternal battles on a cosmic scale. Shaw's evocative descriptions of the ancient ruins will transport readers to another landscape—including the magnificent sites of Dendera, Tell el-Amarna, Edfu, and Thebes. At each site, they will discover which gods or goddesses were worshipped there, as well as the myths and stories that formed the backdrop to the rituals and customs of everyday life. Each chapter ends with a potted history of the site, as well as tips for visiting the ruins today. Egyptian Mythology is the perfect companion to the myths of Egypt and the gods and goddesses that shaped its ancient landscape.

This report from the Omrit temple excavations presents artifacts (e.g., ceramics, frescoes, coins, etc.) recovered in the excavations of the Roman period sanctuary in northern Israel, and discusses the stratigraphy, building phases, and dating of the complex.
