From the New York Times bestseller Dima Zales comes an Urban Fantasy rollercoaster adventure with unforgettable characters, non-stop action, and thrilling mind powers. For a limited time, get all 4 full-length novels and one novella (1000+ pages) in one convenient, discounted bundle. Darren's always known there's something wrong with him, but he's learned how to make the most of it. After all, graduating Harvard early, landing a dream job, and getting filthy rich is easy when you have the ability to stop time. What isn't easy is figuring out how he got these strange powers, or if they're even real. Darren thinks he might be crazy—until he meets her. Mira can also stop time, and she's the key to unraveling Darren's past. The only problem? She wants nothing to do with him. But when Darren gets caught in the middle of Mira's secret revenge mission, the two must work together. Drawn into Mira's dangerous, hidden world of Thought Readers and Pushers, Darren discovers that his powers go deeper than he could've imagined... and that a dark past threatens his new life. With new enemies out for blood and a secret that could turn even his closest friends against him, can Darren master his new powers in time to save himself?

From New York Times bestseller, Kendall Ryan, comes a sexy new standalone novel. My tempting and very alpha friend Sterling Quinn is someone I consider off-limits. It's not just that we're friends, he's also cocky, confident, and British, which means he's a walking aphrodisiac. But lately he's been giving me the look. You know the one. When he thinks I'm not paying attention, and his gaze lingers for too long. When we start working together, that's when the sexual tension between us gets so thick, I want to knock through it with a machete. I want to make all these deep feelings I've harbored for him disappear, because there's no way this can end well. The lines between business and pleasure become irrevocably blurred, and I'm stuck between a rock and Sterling's very, very hard place. Rather than keep a level head about our growing attraction, Sterling wants to go all in, showing me just how explosive we can be together. But I've been around long enough to know that this British bad boy is more than my heart can handle. I'm not about to be cast aside like yesterday's underwear when he's done having fun. Sterling's never been told no, and he's not about to put his ego aside and play by my rules. But I never thought he'd fight so dirty.

A spiritually based fable about a woman in the music industry, Desmond Durango, who is a professional singer. She lives in Humanville, considered the most powerful and impressive city in the world. Everyone who lives there, however, struggles with hidden fears, but buries them with destructive behaviors. Desmond suffers from anorexia and bulimia. She tries to succeed in her career and personal life, but continually falls short of her goals and almost dies because of her disease. One day she overhears a conversation about a mysterious place called Godtown. On her quest to find Godtown, she uncovers the treasure that leads her to a spiritual, emotional, and physical healing. Humanville's purpose is to be of service to people from all walks of life. This novel helps us realize that we have the power to choose how we interpret every aspect of life based on how we perceive each moment; through love or fear. Most importantly, Humanville shares a story of finding hope, healing, and happiness through learning how to listen to our inner voice of love.

Not only is Phobator real, he's about to destroy life on every world with sentient beings. You could say he's becoming a bit of a problem. Unless I'm somehow the hero of an ancient prophecy—and let's face it, I'm not—everyone I care about is in major trouble. My name is Bailey Spade, and this is how my story ends.

George Orr discovers that his dreams possess the remarkable ability to change the world, and when he falls into the hands of a power-mad psychiatrist, he counters by dreaming up a perfect world that can overcome his nightmares, in a new edition of the classic science fiction novel. Reprint. 20,000 first printing.

I'm an illusionist, not a psychic. Going on TV is supposed to advance my career, but things go wrong. Like vampires and zombies kind of wrong. My name is Sasha Urban, and this is how I learned what I am.

Baxter Zevchenko's life is pretty sweet. He's making a name for himself as the kingpin of his smut-peddling high-school syndicate, and the other gangs are staying out of his business, and he's dating the girl of his dreams, Esme. But when Esme gets kidnapped, things start to get seriously weird, and the only man drunk enough to help is a bearded, booze-soaked, supernatural bounty hunter that goes by the name of Jackson 'Jackie' Ronin. Plunged into the increasingly bizarre landscape of Cape Town's supernatural underworld, Baxter and Ronin team up to save Esme. On a journey that takes them through the realms of impossibility, they must face every conceivable nightmare to get her back, including the odd brush with the Apocalypse.

INSTANT NEW YORK TIMES and LOS ANGELES TIMES BESTSELLER "Brilliant... riveting, scary, cogent, and cleverly argued."—Beth Macy, author of Dopesick As heard on Fresh Air This book is about pleasure. It's also about pain. Most important, it's about how to find the delicate balance between the two, and why now more than ever finding balance is essential. We're living in a time of unprecedented access to high-reward, high-dopamine stimuli: drugs, food, news, gambling, shopping, gaming, texting, sexting, Facebooking, Instagramming, YouTubeing, tweeting... The increased numbers, variety, and potency is staggering. The smartphone is the modern-day hypodermic needle, delivering digital dopamine 24/7 for a viral generation. As such we've all become vulnerable to compulsive overconsumption. In Dopamine Nation, Dr. Anna Lembke, psychiatrist and author, explores the exciting new scientific discoveries that explain why the relentless pursuit of pleasure leads to pain...and what to do about it. Condensing complex neuroscience into easy-to-understand metaphors, Lembke illustrates how finding contentment and connectedness means keeping dopamine in check. The lived experiences of her patients are the gripping fabric of her narrative. Their riveting stories of suffering and redemption give us all hope for managing our consumption and transforming our lives. In essence, Dopamine Nation shows that the secret to finding balance is combining the science of desire with the wisdom of recovery.

Distinguished scholar and library systems innovator Frederick Kilgour tells a five-thousand-year story in this exciting work, a tale beginning with the invention of writing and concluding with the emerging electronic book. Calling on a lifetime of interest in the growth of information technology, Kilgour brings a fresh approach to the history of the book, emphasizing in rich, authoritative detail the successive technological advances that allowed the book to keep pace with ever-increasing needs for information. Borrowing a concept from evolutionary theory—the notion of punctuated equilibria—to structure his account, Kilgour investigates the book's three discrete historical forms—the clay tablet, papyrus roll, and codex—before turning to a fourth, still evolving form, the cyber book, a version promising swift electronic delivery of information in text, sound, and motion to anyone at any time. The clay tablet, initially employed as a content descriptor for sacks of grain, proved inadequate to the growing need for commercial and administrative records. Its successor the papyrus roll was itself succeeded by the codex, a format whose superior utility and information capacity led to sweeping changes in the management of accumulated knowledge, the pursuit of learning, and the promulgation of religion. Kilgour throughout considers closely both technological change and the role this change played in cultural transformation. His fascinating account of the modern book, from Gutenberg's invention of cast-type printing five hundred years ago to the arrival of books displayed on a computer screen, spotlights the inventors, engineers, and entrepreneurs who in creating the machinery of production and dissemination enabled the book to maintain its unique cultural power over time. Deft, provocative, and accessibly written, The Evolution of the Book will captivate book lovers as well as those interested in bibliographic history, the history of writing, and the history of technology.

From the internationally bestselling authors who brought you the Krinar Chronicles comes a captivating tale of intrigue, love, and danger in a world where sorcery is entwined with science . . . Once a respected member of the Sorcerer Council and now an outcast, Blaise has spent the last year of his life working on a special magical object. The goal is to allow anyone to do magic, not just the sorcerer elite. The outcome of his quest is unlike anything he could've ever imagined – because, instead of an object, he creates Her. She is Gala, and she is anything but inanimate. Born in the Spell Realm, she is beautiful and highly intelligent – and nobody knows what she's capable of. She will do anything to experience the world . . . even leave the man she is beginning to fall for. Augusta, a powerful sorceress and Blaise's former fiancée, sees Blaise's deed as the ultimate hubris and Gala as an abomination that must be destroyed. In her quest to save the human race, Augusta will forge new alliances, becoming tangled in a web of intrigue that stretches further than any of them suspect. She may even have to turn to her new lover Barson, a ruthless warrior who might have an agenda of his own . . .

From a New York Times bestselling author comes book 2 of The Last Humans trilogy Yesterday, I learned all of Oasis's secrets—or so I thought. As a new danger arises, the long-awaited Birth Day celebration turns into a nightmare, and this time, there may be no escape. In Oasis, nothing is what it seems.

An original, endlessly thought-provoking, and controversial look at the nature of consciousness and identity argues that the key to understanding selves and consciousness is the "strange loop," a special kind of abstract feedback loop inhabiting our brains.

When 17-year-old Jay Reguero learns his Filipino cousin and former best friend, Jun, was murdered as part of President Duterte's war on drugs, he flies to the Philippines to learn more in this gripping page-turning portrayal of the struggle to reconcile faith, family, and immigrant identity.

Über 1.500 Seiten voller fesselnder Action, Abenteuer und einzigartiger mentaler Fähigkeiten. Die Gedankenleser – The Thought Readers (Gedankendimensionen 1) Darren hat es sein ganzes Leben lang leicht gehabt. Ein Harvard-Abschluss mit achtzehn, ein lukrativer Job an der Wall Street, ein Adzwanzig - alles ist möglich, wenn man Tricksen macht, indem man die Zeit verasst. Dank dieser Fähigkeit ist er ein Alleswisser, aber was er nicht weiß, ist, warum er das tun kann, was er tut. Zumindest nicht, bis er Mira trifft und ihre gefährliche, verborgene Welt entdeckt. Zeitstopper – The Time Stopper (Eine Erzählung aus den Gedankendimensionen) Mira kann die Zeit anhalten, aber sie kann nichts verändern. Seit ihre Eltern sie als kleines Mädchen mit dem Namen Tun, um Rache zu nehmen – sie wurde es sogar mit der russischen Mafia aufnehmen. Die Strippenzieher – The Thought Pushers (Gedankendimensionen 2) Darrens Leben wird auf den Kopf gestellt, als er Mira trifft. Jetzt, auf der Suche nach seiner eigenen Identität, trifft er auf neue Feinde – und begreift, dass seine einzigartigen Fähigkeiten stärker sein konnten, als er jemals gedacht hatte. Die Erleuchteten – The Enlightened (Gedankendimensionen 3) Entführt, Bewusstsein erweitert – und das ist erst der Beginn von Darrens Tag. Als eine neue Gefahr auftaucht, bekommt er nur eine einzige Chance, das Leben eines geliebten Menschen zu retten und die Ungerechtigkeiten aus vergangenen Jahrzehnten zu rächen. Manche Verbrechen können niemals vergeben werden. Die Ältesten – The Elders (Gedankendimensionen 4) Darrens neue Macht ist unberechenbar, aber er benötigt genau sie, um alle zu retten, die er liebt. Die Ältesten können ihm das beibringen, was er wissen muss, aber ihre Hilfe hat einen Preis. Letztendlich muss Darren eine Entscheidung treffen. Was ist er bereit, für diejenige zu opfern, die er liebt? Insgesamt über 500 Bewertungen mit 5 Sternen bei allen Büchern. Das sagen die Leser: • „Eine unglaublich fantastische Umsetzung dessen, was man aus dem Thema Gedankenkraft im Science-Fiction machen kann.“ • „Du schließt die Charaktere in dein Herz und identifizierst dich mit ihnen, auch wenn du die ganze Zeit alles in Frage stellst.“ • „Eine faszinierende, sich schnell entwickelnde Urban-Fantasie-Achterbahnfahrt im heutigen New York mit Gedankenlesern, russische Mafiosi, Entführungen, Morden und Verrat.“ • „Keines der Bücher, das ich jemals gelesen habe, hat mich so stark gefesselt und unterhalten wie jedes einzelne Buch der Serie Gedankendimensionen.“ •

„Diese Reihe sollte verfilmt werden!“

A new series about mind readers, from a New York Times and USA Today bestselling author. Everyone thinks I'm a genius. Everyone is wrong. Sure, I finished Harvard at eighteen and now make crazy money at a hedge fund. But that's not because I'm unusually smart or hard-working. It's because I cheat. You see, I have a unique ability. I can go outside time into my own personal version of reality—the place I call “the Quiet”—where I can explore my surroundings while the rest of the world stands still. I thought I was the only one who could do this—until I met her. My name is Darren, and this is how I became entangled with all the Russians and learned that I'm a Reader.

The first in a steamy science fiction adventure series featuring a Brazilian tarot card reader and a Russian crime lord. Year 2950. Humanity has survived devastating climate shifts and four world wars, coming out stronger and smarter than ever. Advanced technology is available to all, and enhancements to appearance, intelligence, and physical ability are commonplace. In this future, Felicia Sevigny has built her fame reading the futures of others.

Alexei Petriv, the most dangerous man in the TriSystem, will trust only Felicia to read his cards. But the future she sees is darker than either of them could ever have imagined. A future that pits them against an all-knowing government, almost superhuman criminals, and something from Felicia's past that she could never have predicted, but that could be the key to saving -- or destroying -- them all.

The Thought Pushers

Between the 18th and 19th centuries, Britain experienced massive leaps in technological, scientific, and economical advancement

A memoir-driven realistic graphic novel about Tyler, a child who is diagnosed with ADHD and has to discover for himself how to best manage it. Tyler's brain is different. Unlike his friends, he has a hard time paying attention in class. He acts out in goofy, over-the-top ways. Sometimes, he even does dangerous things—like cut up a bus seat with a pocketknife or hang out of an attic window. To the adults in his life, Tyler seems like a troublemaker. But he knows that he's not. Tyler is curious and creative. He's the best artist in his grade, and when he can focus, he gets great grades. He doesn't want to cause trouble, but sometimes he just feels like he can't control himself. In Button Pusher, cartoonist Tyler Page uses his own childhood experiences to explore what it means to grow up with ADHD. From diagnosis to treatment and beyond, Tyler's story is raw and enlightening, inviting you to see the world from a new perspective. Getting ahead in life is easy when you can stop time. Staying ahead is hard when your secrets have the power to destroy everything. I've been cheating at life and winning. My boss thinks I'm a genius, my bank account is stacked, and I haven't lost a poker game in my life. I thought I was the only one with this ability until I came across her. Smoking hot and snarky, Mira can freeze time as well. And that's just the tip of the iceberg. There's a whole community of people like us, the so-called Thought Readers. But just as I'm starting to fit in, I discover something that could turn them all against me. Something that could destroy my new world.

The highly anticipated sequel to The Sorcery Code... After the battle with the Sorcerer Guard, Gala and Blaise take shelter in the mountains, a place of unique beauty and danger. Augusta, however, is determined to exact revenge—even as Barson, her ambitious lover, implements his own plan. But amidst politics, battles, and intrigue, something far bigger is brewing... something that could disturb the balance of the Spell Realm itself.

Pushing Ice is the brilliant tale of extraordinary aliens, glittering technologies, and sweeping space opera from award-winning science fiction author Alastair Reynolds. 2057. Humanity has raised exploiting the solar system to an art form. Bella Lind and the crew of her nuclear-powered ship, the Rockhopper, push ice. They mine comets. And they're good at it. The Rockhopper is nearing the end of its current mission cycle, and everyone is desperate for some much-needed R & R, when startling news arrives from Saturn: Janus, one of Saturn's ice moons, has inexplicably left its natural orbit and is now heading out of the solar system at high speed. As layers of camouflage fall away, it becomes clear that Janus was never a moon in the first place. It's some kind of machine -- and it is now headed toward a fuzzily glimpsed artifact 260 light-years away. The Rockhopper is the only ship anywhere near Janus, and Bella Lind is ordered to shadow it for the few vital days before it falls forever out of reach. In accepting this mission, she sets her ship and her crew on a collision course with destiny -- for Janus has more surprises in store, and not all of them are welcome.

From a New York Times and USA Today bestselling author comes a novelette in the Mind Dimensions series. This short story does not require you to have read the other books in the series. Lou, an unlicensed private investigator who is clinically dead but functions because of tiny internal machines, is asked by Dog, the former pet of a rich family who augmented his canine brain with all kinds of gadgets, to find Kid, a defective android, or "disposable," who has disappeared. Lou's internal technology is wearing out, and she hasn't the funds to replace it. The planet she and the others are on is about to get hit by a chunk of stuff from space. Yet, even as the end approaches, there are still villains and skullduggery to be dealt with.

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

In the years following her role as the lead author of the international bestseller, Limits to Growth—the first book to show the consequences of unchecked growth on a finite planet—Donella Meadows remained a pioneer of environmental and social analysis until her untimely death in 2001. Thinking in Systems, is a concise and crucial book offering insight for problem solving on scales ranging from the personal to the global. Edited by the Sustainability Institute's Diana Wright, this essential primer brings systems thinking to the realm of computers and equations and into the tangible world, showing readers how to develop the systems-thinking skills that thought leaders across the globe consider critical for 21st-century life. Some of the biggest problems facing the world—war, hunger, poverty, and environmental degradation—are essentially system failures. They cannot be solved by fixing one piece in isolation from the others, because even seemingly minor details have enormous power to undermine the best efforts of too-narrow thinking. Readers will learn the conceptual tools and methods of systems thinking, the heart of the book is grander than methodology. Donella Meadows was known as much for nurturing positive outcomes as she was for delving into the science behind global dilemmas. She reminds readers to pay attention to what is important, not just what is quantifiable, to stay humble, and to stay a learner. In a world growing ever more complicated, crowded, and interdependent, Thinking in Systems helps readers avoid confusion and help them to see the world clearly. The first step toward finding proactive and effective solutions.

The Dream Doctor Mysteries, book 1

By Reading Urban Fantasy Volume 2

Prince Jones, a self-professed teen love doctor known for his radio segment on the local hip-hop station, believes he can get the bookish, anti-romance Dani Ford to fall in love with him in three dates.

Adjusting to life as a newlywed and trying to survive the first month of medical school, Sara Alderson has a lot on her plate. She definitely doesn't need to start visiting other people's dreams again. Unfortunately for her, it's happening anyway. Every night, she sees a different person and a different dream. But every dreamer has one thing in common: they all hate Dr. Morris, the least popular professor in the medical school, and they're all dreaming about seeing him – or making him – dead. Once again, Sara finds herself in the role of an unwilling witness to a murder before it happens. But this time, there are too many suspects to count, and it doesn't help matters that she hates Dr. Morris every bit as much as any of his would-be murderers do. Dream Doctor is the first book of the Dream Doctor Mysteries.

The award-winning author of The Beast: A Reckoning with Depression challenges stereotypes and fallacies to reveal the true heart of the South today, explaining how traditions about adapting are responsible for key changes while assessing the influence of Latino immigrants throughout the past half century.

From a New York Times and USA Today bestselling author comes the exciting continuation of the Mind Dimensions series. Kidnapped. Consciousness expanded. And that was just the start of my day. I always thought I was a nice enough guy. The kind who'd never want to commit murder. Turns out I simply lacked incentive. Some crimes can never be forgiven.

"A profound and powerful work of essential reporting."—The New York Times Book Review An important—and intimate—interrogation of how we treat mental illness and how we understand ourselves In the early 1960s, JFK declared that science would take us to the moon. He also declared that science would make the "remote reaches of the mind accessible" and cure psychiatric illness with breakthrough medications. We were walking on the moon within the decade. But today, psychiatric cures continue to elude us—as does the mind itself. Why is it that we still don't understand how the mind works? What is the difference between the mind and the brain? And given all that we still don't know, how can we have insightful, transformative choices about our psychiatric conditions? When Daniel Bergner's younger brother was diagnosed as bipolar and put on a locked ward in the 1980s, psychiatry seemed to have achieved what JFK promised: a revolution of chemical solutions to treat mental illness. Yet as Bergner's brother was deemed a dire risk for suicide and he and his family were told his disorder would be lifelong, he found himself taking heavy doses of medications with devastating side effects. Now, in recounting his brother's journey alongside the gripping, illuminating stories of Caroline, who is beset by the hallucinations of psychosis, and David, who is overtaken by depression, Bergner examines the evolution of how we treat our psyches. He reveals how the pharmaceutical industry has perpetuated our biological view of the mind and our drug-based assumptions about treatment—despite the shocking price paid by many patients and the problematic evidence of drug efficacy. And he takes us into the pioneering labs of today's preeminent neuroscientists, sharing their remarkably candid reflections and fascinating new theories of treatment. The Mind and the Moon raises profound questions about how we understand ourselves and the essential human divide between our brains and our minds. This is a book of thought-provoking reframings, delving into the science—and spirit—of our psyches. It is about vulnerability and personal dignity, the terrifying choices confronted by families and patients, and the prospect of alternatives. In The Mind and the Moon, Bergner beautifully explores how to seek a deeper engagement with ourselves and one another—and how to find a better path toward caring for our minds.
