

The Traditional Bowers Bible Volume 3

Experienced bow builders and practical archaeologists describe the history, evolution and construction of European style longbows in this new and engaging book. For the beginner, clear, uncomplicated instructions are offered, including descriptions of construction techniques, tools, materials, and shooting styles. For more advanced bowyers there are tips on choosing wood and adhesive, and explanations of the evolution/adaptation of bow design, including precise dimensions for replicating special historic bow types, from Stone Age bows to modern laminated longbows. This book also offers comprehensive instructions on how to properly test your newly built longbow and constructing arrows.

The Rip Curl Story is the remarkable tale of two young surfers - Doug 'Claw' Warbrick and Brian Singer - who pursued an audacious dream to make a living in pursuit of the ultimate ride. The brand they built, Rip Curl, not only satisfied their own surf wanderlust, but also inspired countless others, riding the wave of the global youth revolution of the late '60s. Rip Curl's mantra became 'the Search': the pursuit of new waves on distant shores, new thrills - skiing, snowboarding, windsurfing - and better equipment to elevate the experience. Along the way they supported the careers of many of the world's great surfers - from Midget Farrelly to Michael Peterson, Tom Curren to Damien Hardman, Pam Burnidge to Stephanie Gilmore, and of course Tyler Wright and Mick Fanning. Bestselling surf writer Tim Baker tells this implausible story in an irresistible series of ripping yarns, offering rich life lessons, a maverick business primer and a wild ride of adventure, good times and outlandish ambitions spectacularly realised. The Rip Curl Story will make you want to surf more, travel further, follow through on that great business idea and pursue your own Search. Chuck it all and live in a cave? No way! Adopt some Stone Age skills? Absolutely! This information-packed book doesn't just talk, it shows you ways to bring the best of our environment into your life. The relevant skills and ideas in EARTH KNACK will not only have you creating objects, but will also give you a new sense of self-fulfillment and self-worth.

Beginner's Guide to Traditional Archery

Some young people today are indifferent about the Christian faith because they don't identify with anyone in Scripture or in their church. Others are excited about the faith and hungry for role models to show them how to pursue their ideals. Extreme Faith, a book created for the Extreme for Jesus line, addresses both needs. Extreme Faith is a collection of fresh, youth-oriented character studies that show readers what a difference young people made in Bible times. This book devotes a chapter to each character profile, telling stories of amazing Bible characters such as Isaac, Esther, and Josiah in detail and showing how today's youth can follow their examples and make a difference in their world. Includes snapshot profiles of modern young people whose lives are extreme for Jesus.

Jim Hamm (co-author, editor, and publisher of The Traditional Bowyer's Bible series) shares the secrets he's learned from a lifetime of bowmaking. Veteran bowyers and newcomers alike will appreciate his invaluable insights.

These volumes offer the combined experience of many bowmakers. In three indispensable volumes, the experts reveal their secrets and techniques, complete with important and entertaining historical highlights, hundreds of photographs and illustrations, and practical advice.

Making a longbow in only two days? No sweat! In their two-day workshops, the bowmakers team of Kunst-Griff introduced many enthusiastic beginners to the basics of making a wooden longbow—demonstrating each action step by step, in a comprehensible and clear way. This compact book, now in color, brings their workshop to you! Covering basic topics like ideal wood selection and the individual parts of a longbow, as well as more advanced construction like tillering, leather grips, bow stringers, Flemish splices and bowyer's knots in detail, this guide provides you with the basics to get started with the fascinating hobby of bow making.

How to Make One, and Its Place in a Good Life

Traditional Bowyer, More Unnecessary Fun

Along with Sun Tzu's The Art of War, The Book of Five Rings is considered to be one of the most insightful texts on the subtle arts of confrontation and victory to emerge from Asia. It analyzes the process of struggle and mastery over conflict that underlies every level of human interaction. For Musashi, the way of the martial arts was a mastery of the mind rather than simply technical prowess-and it is this path to mastery that is the core teaching in The Book of Five Rings. This brilliant manifesto is written not only for martial artists but for anyone who wants to apply the timeless principles of this text to their life.

Many archers and bowhunters are surprised to learn that a wooden bow, whose ancestry dates back thousands of years, will shoot an arrow as effectively as most modern bows. Never before have such detailed bow-making instructions been available to the home craftsman on how to bring such history alive.

The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numericalogical predictions. According to these, empires will fall, the 'Beast' will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

I can't really explain my attraction to the bow and arrow. I can't explain the pull of a camp fire either, or the ocean, or the open hills where you can see forever. It's just there. These things are in all of us I think, some vestige of our primitive past buried so deep in our genome as to be inseparable from what it is to be human. What we think of as civilization is a new experiment in the eyes of Father Time. Experts say that humans have been around for some fifty thousand years. We've been carrying the bow for maybe five thousand (atlatls and spears before that), and pushing the plow for maybe two thousand. We have been hunters forever. We are built to run, to pursue big game on the open savannas, to kill and eat them. With the dwindling of the Pleistocene mega fauna, mammoths and such, the bow became more important and indeed helped to make us who we are today. It still holds that attraction, same as the hearth. When I was a kid I would make crude bows from green plum branches, big at one end and small at the other. A discarded hay string would serve as a bowstring. My arrows were fat and unfletched and would scarcely fly more than a few yards, usually tumbling over in midair. The small creatures around our home were plenty safe. When I was about 12 or so my brother brought me two old Ben Person recurves he'd found at a yard sale. One was a short bow, probably no more than 48 inches and the other was more of a standard size. They both drew about 50 lbs if I recall. That fall happened to be a good year for cottontails around our little farm and I spent countless hours walking the fields and shooting at them as they busted from underfoot. Although I'd get several shots a day I never did hit one on the fly but I remember that fall fondly nonetheless. The pleasure of jumping rabbits and seeing the feathered shaft streaking toward them was a thrill I've never forgotten. I made my first "real" bow when I was in high school, after getting a copy of the Traditional Bowers Bible in the mail (more on this in a moment). My first bow, a decrowned mulberry flatbow, broke within about 10 shots. The second held together quite well and is probably still around somewhere and capable of shooting an arrow, though it would probably draw about 70lbs. When I first started making bows I used the woods I had close at hand; mulberry, common persimmon, red maple, white cedar, etc. I'd probably made more than a dozen bows of various woods before I ever saw a piece of Osage. People often ask me where they can find a bow stave and, invariably, I tell them to use what they have close by. No matter where you live, you'll have something near that will make a bow. Go cut it down and get started. This book is an attempt to share some of what I've learned over my years of bow making. The Traditional Bowers Bible series, as mentioned earlier, is still a great source of information. Why write another book on making wood bows you might ask? The simple answer is that there are so many ways of doing and explaining things. There are still unanswered questions and we'll cover many of them here. We will cover all of the most frequently asked questions, and lay out a simple plan that should guide you through the entire process, from finding a stave to stringing your bow and shooting your first arrow. Some of what you'll find here, you'll find nowhere else.

How to Build Wooden Bows and Arrows: Longbows, Selfbows, & Recurves

The Traditional Bowyer's Bible

Traditional Archery

Thrilling stories about hunting wildcat, buffalo, mountain sheep, wild boar, alligator, deer and small game with a bow and arrow.

Expert bowhunter and archery traditionalist Dan Bertalan has compiled the most complete bowmaking text available today. By traveling coast to coast and consulting America's top bowmakers, he has gathered the best information on how to build your own recurve longbow, improve your hunting skills, care properly for a bow, and more. Including descriptive photographs, diagrams, a complete glossary of terms, and reviews of particular bows that include draw/force measurements and hand-shot arrow speeds, this illuminating book will provide hunters, collectors, and others with invaluable insight into this specialized world. Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

With over 300 step-by-step pictures, the Backyard Bowyer is geared for the beginning bowyer, backyard hobbyist, and anyone who has ever pondered building a wooden bow. Easy to read and follow steps go down to even the smallest detail in the design and construction of basic archery bows. Learn to craft fine wooden bows without huge investment in equipment and materials, and without being bound by location and limited workspace. Learn to construct: A classic target flat bow, an English Longbow suitable for hunting, and even your own strings and arrows for traditional and primitive archery.

"An overview of one of the largest and most comprehensive collections of European and non-European archery-related materials in the world. This book presents color photos and descriptions of some 300 items - including bows, arrows, quivers, and thumb rings- that represent traditional archery techniques, practices, and customs from around the world"--Provided by publisher.
