

The Ultimate Reality By Joseph H Cater

Ambitiously undertaking to develop a strategy for making the study of religion "scientific," Ninian Smart tackles a set of interrelated issues that bear importantly on the status of religion as an academic discipline. He draws a clear distinction between studying religion and "doing theology," and considers how phenomenological method may be used in investigating objects of religious attitudes without presupposing the existence of God or gods. He goes on to criticize projectionist theories of religion (notably Berger's) and theories of rationality in both religion and anthropology. On this basis he builds a theory of religious dynamics which gives religious ideas and entities an autonomous place in the sociology of knowledge. His overall purpose is thus "to indicate ways forward in the study of religion which free it from being crypto-apologetics or elevating poetry." Originally published in 1973. To what extent can we speak of Buddhism as a religion-a system which rejects a belief in an immortal soul and an eternal God? We shall do well not to seek to answer this by fitting our reply into the limits of a ready-made definition. Buddhism implies a certain attitude to the universe, a conception which gives meaning to life, but it does not look upon the ultimate reality of things as personal. It succeeds indeed, more than any other system, in evading ultimate questions, though even in rejecting metaphysics it was unable to remain wholly unmetaphysical.

Finding Faith in the Face of Doubt

This book is the result of dedicated efforts to not only find what is most real and vital for humans to strive toward, but to achieve an increasing harmony with a transcendent Reality that may be called God. The current book is an effort to express in understandable language the author's convictions concerning important aspects of the road to harmony with the transcendent being we call God. There are almost innumerable religions and religious sects in our troubled world, whereby billions of human beings search for ways to find inner peace and tranquility. Very often such endeavors encounter winding roads, numerous detours in the roads, and far too

major obstacles in our paths. This book seeks to serve as a general outline of how we, among us might enhance the efficiency and effectiveness of our walk on the road toward true harmony with Ultimate Reality (God). This book is emphatically not one that seeks to steer its readers toward financial wealth, or a life full of sensual and secular thrills, but it does give guidance toward an ever-growing inner peace, happiness, a sense of purpose, well-being, and joy. The book can be read with serious interest and appreciation by Christians, Jews, Muslims, Hindus, Buddhists, or those oriented toward New Age ideologies. Even some strict secularists might encounter in its pages some ideas worth considering. The book is essentially nonsectarian, nondenominational, and of potential interest to any seeker of a deeper spirituality and more rewarding growth toward ultimate reality, truth, and goodness.

We need a coherent picture of our world. Life's realities won't let us ignore its fundamental questions, but with so many opposing views, how will we choose among those that are reliable? In this series of books, David Gooding and John Lennox offer a penetrating analysis of religious and philosophical attempts to find the truth about the world and our place in it. By listening to the Bible alongside other leading voices, they show that it is not only answering life's biggest questions—it is asking better questions than we have ever thought to ask. In Book 2 – Finding Ultimate Reality, they remind us that the moral authority behind ethics cannot be separated from the truth about ultimate reality: Is there a Creator who stands behind his moral law? Are we the product of amoral forces left to create moral consensus? Gooding and Lennox compare ultimate reality as it is understood in: Indian Pantheistic Monism, Greek Philosophy and Mysticism, Naturalism and Atheism, and Christian Theism.

A collection of writings from classical and contemporary theologians and Bible teachers encouraging believers to face death with a firm and confident belief in the character and promises of God.

A Theology of Mark's Gospel is the fourth volume in the BTNT series. This landmark textbook, written by leading New Testament scholar David E. Garland, thoroughly explores the theology of Mark's Gospel. It both covers major Markan themes and sets forth the distinctive contribution of Mark to the New Testament and the Christian Scripture, providing readers with an in-depth and holistic grasp of Markan theology in the larger context of the Bible. This substantive, evangelical treatment of Markan theology makes an ideal college- or seminary-level text.

Dialogue among religions has always been challenging. Today the questions are becoming more fundamental: are the various traditions—Buddhist, Christian, Hindu, Tao—even talking about the same thing when they speak of Nature, of God, Emptiness or Brahma? The Divine Matrix represents a bold scholarly attempt to provide a framework for discussing these and other questions that will keep the interreligious dialogue project from grinding to a halt. In 'The Divine Matrix' philosopher and theologian Joseph Bracken first names the idea that the Infinite is the transcendent source and goal of human activity to be the notion common to virtually all the major world religions. He suggests that the Infinite is prototypically experienced not as an entity but as an ongoing activity—the principle of activity for all beings (God included). This idea is consistent with the notion of eternal and continuous motion in Aristotle, with the act of being (actus essendi) in the theology of Thomas Aquinas and Meister Eckert, and with the ground of being of Schelling and Heidegger, as well as with Whitehead's definition of creativity. Bracken goes on to show that this idea is implicit in descriptions of Brahman in the Hindu Upanishads, in the experience of pratitya-samutpada (dependent co-arising) in classical Buddhism, and in descriptions of the Tao in Tao Te Ching and Chuang Tzu. The Divine Matrix proposes that the

Infinite, thus identified, be understood as a nondual reality: an activity that does not exist in itself but only in the entities which it thereby empowers to exist. This, Bracken argues, becomes the key to understanding ultimate reality within the different world religions.

Many Americans say they are uncertain about their religious beliefs, although they continue to attend Christian and other churches. Interdenominational minister Willis presents this beautifully written book to help questioners maintain their integrity while relating to the vast Mystery that informs the universe beyond all understanding. "We know we don't know," Willis says, "and yet we all (even atheists) must stand on assumptions that help us lead good lives." To explore these assumptions, he discusses different ways of thinking about God, scientific and mythical views, the sources of good and evil, and the need for both freedom and commitment. He assures us we can all think reasonably about Ultimate Reality and find a faith that fits. The book grew from theology classes Willis taught in Unitarian churches and universities and from conversations with discontented members of other discussion groups. His clear and engaging prose is full of lively exchanges with his students. Frequent references to the best contemporary theologians (Bishop Spong, for example) and to philosophers, physicists, mythologists, and Bible experts provide an inspiring resource for those who long to resolve the conflict between faith and reason, doubt and belief.

Private papers, letters, and journals shed new light on Kennedy family relationships and underlie an account of Robert Kennedy's private and public lives, the forces that shaped him, and his impact on the United States.

The Pulitzer Prize – winning historian chronicles the short life of the Kennedy family 's second presidential hopeful. Schlesinger 's account vividly recalls the forces that shaped Robert Kennedy, from his position as the third son of a powerful Irish Catholic political clan to his concern for issues of social justice in the turbulent 1960s. Robert Kennedy and His Times is " a picture of a deeply compassionate man hiding his vulnerability, drawn to the underdogs and the unfortunates in society by his life experiences and sufferings " (Los Angeles Times). This Fortieth Anniversary Edition contains not only Schlesinger 's illuminating and inspiring portrait of Robert Kennedy, but a new introduction by Michael Beschloss, in which the acclaimed bestselling author and historian discusses the book 's initial reception, Schlesinger 's thoughts on it, and expounds on why Robert Kennedy is still such an important figure today. The Father of the Age of Reality

Our Ultimate Reality, Life, the Universe and Destiny of Mankind

This book is about the major changes taking place as the world begins to make the transition from the Modern to the Postmodern Era, especially those changes that are already affecting Judaism, Christianity and Islam. The author takes the reader through an account of how certain beliefs are formed -- including beliefs in magic, superstition, myth, legend, and morality. This is followed by a discussion of the world's present state of affairs and projections for the future. Finally, the reader is presented with the challenges that will most likely face each religion as this new world unfolds.

"From the earliest days of thinking man, people the world over have pondered the nature of the Universe, our planet, and of ourselves. What does it all mean? Why am I here? What is the real purpose of my life? What will happen to me after I die? Will I return once again for another life on Earth?" So starts the first paragraph of this book, summarising and encapsulating very succinctly both the reason I was inspired to write *Our Ultimate Reality* and a concise summary of the contents contained therein. As we approach the end of a great age for humanity, increasingly more people from all walks of what we know as "life" are asking what it all means for them, for their families and for their future existence on this planet we call "Earth." *Our Ultimate Reality, Life, the Universe and Destiny of Mankind* is your complete reference and guide for realising the Divine heritage of each and every one of us as equal aspects of our Creator, a life of perfect happiness, health, abundance, fulfilment and Spiritual evolution. This book has been written in a modern, understandable, non-mystical way, setting out in a concise, logical, easy to follow format, all you need to know in order to understand, pursue and realise your own true potential during this pivotally important era. I wish you every possible success as you follow your own true destiny on the path of return to our Divine Creator from Whom we came in the beginning, and wish that this book will prove to be

your valuable guide and companion.

ONENESS THE ULTIMATE REALITY

Metaphysics Reclaimed

This is a book that is devoted to helping inquiring spiritual thinkers find a path of genuine spirituality that leads them into spiritual growth and true harmony with the Divine. Three imaginary characters intensely and passionately debate questions concerning the reliability of Judeo-Christian scriptures, questions about whether the concept of original sin (in the Garden of Eden) is a viable concept for the twenty-first century, etc. Intense debates flare over questions about sexual morality, whether Pauline theology can be regarded as credible in our age of scientific knowledge, whether Heaven and Hell are real, and numerous other issues that are of vital concern to spiritual seekers. The three debaters in these dialogues are: 1) An independent spiritual seeker, 2) A Christian apologist -- devoted to a defense of mainstream Christianity, and 3) A devoted skeptic who questions all things religious or spiritual. If you are a spiritual seeker, one who finds that the materialist/secularist scientific paradigm for all reality leaves you cold, this book can engagingly point you in the direction of ever-deepening spiritual insights that will enable you to progressively advance toward genuine harmony with Ultimate Reality -- the Creator and Ruler of our wondrous universe. This book can show you that you need never to abandon intelligence, logic, science, or clear and rational thinking in order to attain a profound spirituality. True spirituality need not be imprisoned in the straitjackets of dogmatic or narrow thinking about reality. The Divine whom you can learn to serve faithfully

and devotedly does not demand of you a repudiation of your God-given intellect, and God is never scared of humble and earnest questions. It was not stated flippantly nor erroneously that in regard to true spirituality, "Seek and you shall find; knock and the door will be opened to you". Many of the claims made in this book incorporate the conviction that one must not necessarily buy into the theology of any extant organized religion, but can have a "direct line" to the Creator, receiving thereby inspiration, encouragement, empowerment, inner peace, and growth toward spiritual perfection. For many in our "scientifically enlightened" age, religion is pushed into the "backwaters", and passionate devotion to spirituality is regarded as passe. This need not be so, because the Divine permeates every atom in this universe, and the energy that sustains the universe is also highly willing to inspire, direct, and guide your life. We need not settle for science as the "new god", because powerful though it is as a wonderful instrument, it is nevertheless constrained by the limitations of human powers and our relatively puny intellects. Your life can transcend what science has to offer, because science is bereft of powers to master the mind and the spirit of humanity. By availing yourself of the hints and guidelines offered in this book, you can discover a glorious path of growing inner peace and joys that transcend the powers of human understanding. Freedom of your will opens for you the door to genuine choice -- a choice that could (potentially) have the significance of Heaven versus Hell.

This book draws from previously unpublished letters and interviews with physicists, theologians, and Sir John's close associates and family to present Sir John's ideas on pure unlimited love. Post, who was in dialogue with Sir John for fifteen years on this topic and who had founded the Institute for Research on Unlimited Love (www.unlimitedloveinstitute.com), addresses how John Templeton arrived at his philosophy as a youth growing up in Tennessee. Post also shares how classical Presbyterian ideas came to synergize in his mind with the more eastern influences of American transcendentalism and the Unity School of Christianity and ponders if Sir John truly believed that science and spirituality might fully converge on the same view of Ultimate Reality with their very

different ways of knowing. Is Ultimate Reality Unlimited Love? presents Sir John's hope for spiritual progress with the eventual convergence of ultimate reality and unlimited love at its very center.

Beginning with a detailed discussion of Conrad's ambivalence toward the function of language and the meaning of fiction, Ted Billy explores the problematical sense of an ending in Conrad's tales and novellas. Billy demonstrates that Conrad's endings, instead of reinforcing the meaning of the narrative or lending finality, actually provide a contrasting perspective that clashes with the narrative's general drift.

Structophis is a heartwarming YA adventure from the author of *The Book of Deacon*, *Bypass Gemini*, and *Free-Wrench*. It is based upon a concept and artwork by ProjectENDO. In a small town in Colorado, Markus Spiros was just getting his life on track. By day he worked as a veterinary tech, by night he took classes. His steady little routine was rolling along nicely when his impulsive Uncle Dimitrios threw a wrench in the works. Thanks to an unannounced trip, Markus had to swing by his uncle's bistro to tend to the 'special oven.' When he arrived, he discovered it wasn't the oven that was special, it was the rare and exotic egg that had been incubating inside it. And now it had hatched. Suddenly, Markus found his life had become a good deal more complicated. The creature was a Structophis Gastrignae—a strange creature that was equal parts dragon and oven—and she'd become quite a big girl. Large as a refrigerator and curious as a toddler, the creature he'd dubbed Blodgette would have been a handful in any situation. Markus had bigger problems than figuring out how to take care of her, though. Owning such a rare and special beast was illegal, so should the cops learn of it, Markus would be destined for jail. Worse, there were certain unscrupulous people who would do anything to acquire Blodgette. Now, with the help of his old classmate Gale, Markus must scramble to stay two steps ahead of the authorities and a corrupt CEO, all while being the best 'mommy' he can be to his brand-new pizza dragon.

This book is Mr. Cater's follow up work to *The Awesome Life Force*. It contains countless gems of thought provoking ideas. In this two volume set you will discover an explanation for seemingly unexplainable phenomena. Levitation, missile weight loss in space, pyramid power and a closer look at the properties of light. Joseph Cater points out the fundamental weakness in conventional mathematics. The role of the soft electrons is expanded upon. Magnetic fields and astronomical error in determining planetary sizes and distances are fully explained. Volume 2 carries us into the mystery of the Crystal Skull. Have you ever wondered how from certain rock formations water can be produced? Everything in the process of creation proceeds from the simple to the more complex. If there is a test for the validity of a theory or concept in its ability to be explained Joseph Cater accomplishes it in this set of books. You do not have to be a genius to understand, there is something here for everyone!

Reality Itself is a set of fifteen essays exploring interactions between Buddhist and Western philosophy. The first section presents the two traditions as sharing a quest for reality itself and illustrates this in discussions of everyday life, forgiveness, and religion. The second section engages with central concepts of Mahāyāna Buddhism: emptiness in the Heart Sutra, nonduality in the Vimalakirti Sutra, and skillful means in the Lotus Sutra. The third section focuses on Nāgārjuna's Root Verses of the Middle Way, showing how their dialectical logic and their dyad of ultimate and conventional can be applied in discussing divine personality, time, and truth. The final section studies interactions between Buddhism and Western thinkers (Hume, Hegel, Husserl, and Sartre), chiefly on the topic of self and non-self. The book should be of interest to graduate students in philosophy and theology.

Is Jesus the Only Savior?

Autobiography

Creativity As Link Between East and West

A compelling and urgent case for Jesus Christ as the one and only way to salvation. Today, professing that Jesus Christ is the only way to approach God and receive his salvation may seem to some like a form of intolerance or arrogance. A growing number of Christian intellectuals, pastors, and leaders are favoring a more inclusive view of a person's path to salvation. But what does this mean in practice? Are there biblical or theological means of defending inclusivism or pluralism, or do these views simply pay tribute to modern ethical standards? The fact is that unity among Christians on this fundamental issue has disappeared. Many people of faith choose among three fundamentally different answers to the question, "Is Jesus the only Savior?" Stated succinctly, these answers are: No! (Pluralism) Yes, but... (Inclusivism) Yes, period! (Exclusivism) In *Is Jesus the Only Savior?*, Ronald Nash explores the divergent views of pluralism and inclusivism in depth, laying out the reasoning, history, and major supporters behind them; and making a resounding case for exclusivism based on firm theological standards. Christians of all walks of life will find their faith in Christ affirmed and strengthened by this vital treatise, written in accessible terms and a readable style.

While scientific knowledge is based on tested truths, religion is founded on blind assent to divinely revealed truths. Such is the gap between religion and science. It appears unbridgeable. Or is it? Upon close examination of the Scriptures, from "Genesis" to "Revelation", a mystical object (depicting the Nature and Kingdom of God) emerges as the central theme of Divine Revelation. Its structural features and attributes were described in different epochs, by different biblical personages. This Hidden Structure--Mount Zion (a Cryptogram)--is variously portrayed in the Scriptures as a rock or a mountain, and frequently associated with fire (combustion). Through a combustion experiment, the three dimensional picture of this Divine Emblem--a Pictogram--was made manifest, in the first edition, replete with a pair of mathematical functions. Thus, the authentication of

the Scriptures no longer depends on blind faith, but on the systematic verification of this Structure with the testimonies of biblical personages who espied and described its features long before the dawn of science. The Structure together with the mathematical functions were later determined to be a particular solution. An in-depth examination of the experimental data resulted in a general solution, giving rise to a dual Complex Structure: a Mountain and a Valley. Thus, the (carbon monoxide) combustion process is, now, expressed as a system of competing matrices of energy hills and valleys. (These results challenge some of the currently held notions in quantum mechanics; notably, the idea that there is a wave function "collapse" or a "reduction" of the wave packet in the process of measurement.) The spiritual meaning of the Hill--Mount Zion was the focus of the first edition. In the second edition, the Valley--Death Valley often identified in the Scriptures as a Pit or the Netherworld, was established as a complementary Spiritual Form (Psalms 23:4 & 28:1). These metaphysical structures represent the Ultimate Reality. While Mount Zion relates to Goodness, Death Valley pertains to Evil; together, they constitute the Complex Whole. Even so, each embodies the attributes of the other a fractal feature. As determined from the combustion experiment, the Mountain is dominant over the Valley. And given the fractal properties of the Complex Whole, Mount Zion is, inherently, the Simple Whole Form: the Emblem of Ultimate Reality, and the exemplar of Occam's razor; as evidenced by the pervasive reference to this Structure in the Scriptures. The Complex Structure, however, enabled a fuller discussion of the relative attributes of the Divine. It is useful for addressing some of the ambiguities in the Scriptures. For instance, the Morning Star is an appellation of the Exalted Christ (Rev. 22:16), yet, it shares meaning with "Lucifer", the Evil One, who is, nevertheless, the Prince of Darkness (Isa. 14:12; Lk. 10:18). By virtue of the Cryptogram, the Model of Mount Zion, the Cosmic Atonement Sacrifice has, now, been shown to be a Tripartite Agency--the Sin-offering Bullock, the Sin-offering Goat, and the Scapegoat--reminiscent of the Judaic Day of atonement (cf., Lev. 16). As Cosmic Sin-offering Goat "for the Lord", Jesus ascended Mount Zion, and then entered into the Holy of Holies, through the loss of His body (that is, with His blood). Whereas, Muhammad, as Cosmic Scapegoat, ascended Mount Zion, alive, and with an escort, then rose to the Gate of the Heavenly Sanctuary, before being banished into the wilderness-valley "for Azazel". Having descended from Abraham, Jesus and Muhammad, each, identified with Abraham's lineage: Jesus through Isaac (the prototypical human sin-offering goat) and Muhammad through Ishmael (the archetypal human scapegoat). As for the Cosmic Sin-offering Bullock for the Royal, Heavenly, High Priest, He remained, like Melchizedek, a mystery until now. The Revelation of the Cryptogram enabled the authentic interpretation of the Third Part of the Secret of Fatima (Third Secret for short). Attention is called to the last section of this Book (13.4.h) which was first published in 1993 (Library of Congress Catalog Card Number: 93-93712) and endorsed with the Divine Seal: the Cryptogram. It, especially, anticipated the

Third Secret that was released in 2000; that is, to the extent that the theme and Principal Characters described in the Third Secret were portrayed there (and in other passages), presciently. Indeed, it is no coincidence that the scene of events in the Third Secret was an anonymous Mountain invested with God's Presence: towards whom the pilgrims streamed (as pre-portrayed by the Cryptogram). God's Presence on that Mountain establishes it as Mount Zion, God's Abode (cf., Ps. 74:2; 48:2; Isa. 18:8; Heb. 12:22). The Third Secret encoded a Spiritual War between two anonymous Combatants, with an ominous result: a frequent eschatological theme in the Scriptures. This edition reveals clues in the Third Secret which identify the Antagonists in the "Vision", and correlate them to those named presciently in the first edition; thus, facilitating the authentic interpretation of the Third Secret. So, the Author's foreknowledge of the Third Secret constitutes Divine ratification of the "Vision and Prophet", literally and figuratively, in fulfillment of Daniel's prophecy (Dan. 9:24). Evidence is presented in this Book, also, showing the fulfillment of several prophecies in connection with the transfer of Divine Authority from Judah to a foreigner. Indeed, several prophecies are cited pertaining to the relocation of the Messianic Capital: from the Old Jerusalem to a New City of God. In the Scriptures, Abraham paid tribute to the prototypical priest-king, Melchizedek: a foreigner to Abraham. This Personage is, often, identified in the Scriptures with the Messiah. Jesus's Messianism, however, is Abrahamic, through Judah. How, then, could He be likened to Melchizedek? Also, Jacob prophesied that the Scepter would devolve upon Shiloh (He to whom it belongs) from Judah. By the same token, Jesus cannot be identified with Shiloh, since Jesus is a descendant of Judah, through David (cf., Gen. 49:10). Furthermore, according to a Judaic tradition at Passover (commemorating a saving act): A place is usually set for (the phantom) Elijah on the ceremonial dinner table of a typical Jewish home, with the belief that Elijah would return to the house of Jacob as an unknown guest stranger. Could these Distinguished Ones Melchizedek, Shiloh and Elijah; all of them strangers to Judah refer to the same Personage? The implication of the foregoing discussion is the reality of another Messianic Personage (One distinct from Abraham). This is the idea of two Messiahs raised, independently here, and implied in the Book of Daniel (9:24-27). The Qumran writings also made reference, explicitly, to two Messiahs. Consider the various appellations of these Messianic Personages in the Qumran texts: "Interpreter of the Law", "[Eschatological] Prophet", "Prince of Light", "Prince of the Whole Congregation", "Messiah of Aaron", "Messiah of Israel", "Heavenly Messiah", and "Priestly Messiah". And compare these with the information advanced in this Book. Other metaphysical systems are discussed also in context; and the Cryptogram is inferred to underlie them all: Heraclitus' Logos; Lao Tsu's Yang-and-Yin; and Zoroaster's Good-and-Evil. Although many books deal individually with each of the major writers treated in Poets of Reality, none attempts through analyses of these particular men and

their works, to identify the new directions taken by twentieth-century literature. J. Hillis Miller, challenging the assumption that modern poetry is merely the extension of an earlier romanticism, presents critical studies of the six central figures—Joseph Conrad, W. B. Yeats, T. S. Eliot, Dylan Thomas, Wallace Stevens, and William Carlos Williams—who played key roles in evolving a poetry in which reality comes to be present to the senses, and present in the words of the poem which ratify this possession. A new kind of poetry has appeared in the twentieth century, the author claims, a poetry which, growing out of romanticism and symbolism, goes far beyond it. The old generalizations about the nature and use of poetry are no longer applicable, and it is the gradual emergence of new forms, culminating in the work of Williams, that Miller traces and defines.
