The scholarship of teaching and learning (SoTL) began primarily as a discipline-based movement, committed to exploring the signature pedagogical and learning styles of each discipline within higher education, with little exchange across disciplines. As the field has developed, new questions have arisen concerning cross-disciplinary comparison and learning in multidisciplinary settings. This volume by a stellar group of experts provides a state-of-the-field review of recent SoTL scholarship within a range of disciplines and offers a stimulating discussion of critical issues related to interdisciplinarity in teaching, learning, and SoTL research.

This book is the best introduction to getting free money scholarships and grants. It is a "must read" for the parents of college-bound high school students who don't want to blow all their money on college tuition and expenses. Parents of college-bound high school students often ask when the best time is to get free money in the form of scholarships and grants to help pay for college. The answer is simple, but how you get to the answer is not. The best time to get the free money you are seeking to help pay for your students college education is January, February, and March of their senior year. That's the time when the colleges and universities are flush with scholarship and grant money. When the "free money" gets low, or is gone, it naturally becomes increasingly difficult to get any free money. In fact, if you wait too long, the only way to get money for college is through student loans and parent loans. This is an easy (but unbelievably expensive) way to pay for college. Why? It's expensive because you (or your child), could easily pay an additional \$50,000 to \$100,000+ in interest and finance charges. The not so simple answer to this question often shocks parents: Your best chance of getting the big money actually starts between the 7th and 10th grades. Some parents gasp when they find out. That's because they think that the 11th grade is the appropriate time to start planning for college. In the old days this was probably true. However, today everything has changed. The cost of college is much more than it ever was in the past. In fact, it's such a huge investment to get a college degree (\$100,000 to \$200,000+), the only thing more expensive in life will be the purchase of a family home in a nice neighborhood, or paying for a catastrophic illness if you have no health insurance. If you have a college-bound high school student, you are in for a big financial surprise. It'll be a big surprise because you and your student are going to have to come up with \$20,000 to \$60,000 PER YEAR, until your student graduates. If you are lucky and have really good student, this will be 4 consecutive years. For not so lucky parents and students, this could easily drag out to 5-7 years. If you don't have the money to throw at this "cash-eating monster," you are going to have to borrow the money through student loans, second mortgages, or dip into your retirement savings. Or, you can simply tell your student that the only way they are going to college is to get student loans or to go to a cheap community college and start with an AA degree. There are billions of dollars of free money scholarships and grants available to all college-bound high school students. The problem is that most parents are too busy living their lives, raising their families, and earning a living to take the time and expertise to find out where all this money is and how to get it. This is where this book can help you. If you are sincerely interested in sending your kids to the top colleges in America for pennies on the dollar, please read this book right away and be prepared to learn ways you can get free money scholarships and grants to cover the costs, and which colleges and universities are most likely to give your student money to attend their school.

The meaning of our concern for mortal remains—from antiquity through the twentieth century The Greek philosopher Diogenes said that when he died his body should be tossed over the city walls for beasts to scavenge. Why should he or anyone else care what became of his corpse? In *The Work of the Dead*, acclaimed cultural historian Thomas Laqueur examines why humanity has universally rejected Diogenes's argument. No culture has been indifferent to mortal remains. Even in our supposedly disenchanted scientific age, the dead body still matters—for individuals, communities, and nations. A remarkably ambitious history, *The Work of the Dead* offers a compelling and richly detailed account of how

and why the living have cared for the dead, from antiquity to the twentieth century. The book draws on a vast range of sources—from mortuary archaeology, medical tracts, letters, songs, poems, and novels to painting and landscapes in order to recover the work that the dead do for the living: making human communities that connect the past and the future. Laqueur shows how the churchyard became the dominant resting place of the dead during the Middle Ages and why the cemetery largely supplanted it during the modern period. He traces how and why since the nineteenth century we have come to gather the names of the dead on great lists and memorials and why being buried without a name has become so disturbing. And finally, he tells how modern cremation, begun as a fantasy of stripping death of its history, ultimately failed—and how even the ashes of the victims of the Holocaust have been preserved in culture. A fascinating chronicle of how we shape the dead and are in turn shaped by them, this is a landmark work of cultural history.

The spirit of our times can appear to be one of joyless urgency. As a culture we have become less interested in the exploration of the glorious mind, and more interested in creating and mastering technologies that will yield material well-being. But while cultural pessimism is always fashionable, there is still much to give us hope. In *The Givenness of Things*, the incomparable Marilynne Robinson delivers an impassioned critique of our contemporary society while arguing that reverence must be given to who we are and what we are: creatures of singular interest and value, despite our errors and depredations. Robinson has plumbed the depths of the human spirit in her novels, including the National Book Critics Circle Award-winning *Lila* and the Pulitzer Prize-winning *Gilead*, and in her new essay collection she trains her incisive mind on our modern predicament and the mysteries of faith. These seventeen essays examine the ideas that have inspired and provoked one of our finest writers throughout her life. Whether she is investigating how the work of the great thinkers of the past, Calvin, Locke, Bonhoeffer--and Shakespeare--can infuse our lives, or calling attention to the rise of the self-declared elite in American religious and political life, Robinson's peerless prose and boundless humanity are on display. Exquisite and bold, *The Givenness of Things* is a necessary call for us to find wisdom and guidance in our cultural heritage, and to offer grace to one another.

How to Get Free Money for College!

An Antidote to the College Admissions Mania

Between the sixteenth and the nineteenth centuries, the west central African kingdom of Kongo practiced Christianity and actively participated in the Atlantic world as an independent, cosmopolitan realm. Drawing on an expansive and largely unpublished set of objects, images, and documents, Cecile Fromont examines the advent of Kongo Christian visual culture and traces its development across four centuries marked by war, the Atlantic slave trade, and, finally, the rise of nineteenth-century European colonialism. By offering an extensive analysis of the religious, political, and artistic innovations through which the Kongo embraced Christianity, Fromont approaches the country's conversion as a dynamic process that unfolded across centuries. The African kingdom's elite independently and gradually intertwined old and new, local and foreign religious thought, political concepts, and visual forms to mold a novel and constantly evolving Kongo Christian worldview. Fromont sheds light on the cross-cultural exchanges between Africa, Europe, and Latin America that shaped the early modern world, and she outlines the religious, artistic, and social background of the countless men and women displaced by the slave trade from central Africa to all corners of the Atlantic world.

"The epic story of the rise and fall of the empire of cotton, its centrality in the world economy, and its making and remaking of global capitalism. Sven Beckert's rich, fascinating book tells the story of how, in a remarkably brief period, European entrepreneurs and powerful statesmen recast the world's most significant manufacturing industry combining imperial expansion and slave labor with new machines and wage workers to change the world. Here is the story of how, beginning well before the advent of machine production in 1780, these men created a potent innovation (Beckert calls it war capitalism, capitalism based on unrestrained actions of private individuals; the domination of masters over slaves, of colonial capitalists over indigenous inhabitants), and crucially affected the disparate realms of cotton that had existed for millennia. We see how this thing called war capitalism shaped the rise of cotton, and then was used as a lever to transform the world. The empire of cotton was, from the beginning, a fulcrum of constant global struggle between slaves and planters, merchants and statesmen, farmers and merchants, workers and factory owners. In this as in so many other ways, Beckert makes clear how these forces ushered in the modern world. The result is a book as unsettling and disturbing as it is enlightening: a book that brilliantly weaves together the story of cotton with how the present global world came to exist"--Résumé de l'éditeur.

James Joyce’s big blue book, Ulysses, ushered in the modernist era and changed the novel for all time. But the genius of Ulysses was also its danger: it omitted absolutely nothing. Joyce, along with some of the most important publishers and writers of his era, had to fight for years to win the freedom to publish it. The Most Dangerous Book tells the remarkable story surrounding Ulysses, from the first stirrings of Joyce’s inspiration in 1904 to the book’s landmark federal obscenity trial in 1933. Written for ardent Joyceans as well as novices who want to get to the heart of the greatest novel of the twentieth century, The Most Dangerous Book is a gripping examination of how the world came to say Yes to Ulysses.

Navigating Transgender Issues in a Changing Culture

We have all read the headlines featuring a fortunate college-bound student who received \$100,000 or more in scholarship awards. Assuming that the scholarships were renewable annually, this amount could easily pay for four years of college at any American college or university. However, these success stories are the exception, not the rule. They are aberrations among the pool of millions of aspiring college students who submit scholarship applications to the hundreds of companies, foundations, and non-profit groups that offer them. The reality is a much different, and sobering, picture. According to the College Board, the average cumulative student debt balance in 2017 was \$26,900 for graduates of public four-year schools and \$32,600 for graduates of private nonprofit four-year schools. 101 Scholarship Applications: What It Takes to Obtain a Debt-Free College Education was written specifically to address the issue of college loan debt, and help students and their parents identify scholarship opportunities, as well as develop strategies for submitting applications and winning awards. This book’s author, Gwen Richardson, is a parent who spent several years carefully researching scholarship sources for her daughter, who attended an out-of-state college at the cost of \$30,000 per year. Her daughter graduated in May 2018 with all costs financed entirely with scholarships and grants. The highlight of this book is a comprehensive listing of more than 300 scholarship sources, including award amounts, eligibility requirements, and direct website links. All sources have been vetted and researched for accuracy

This book can save you more than \$100,000. These days, most people assume you need to pay a boatload of money for a quality college education. As a result, students and their parents are willing to go into years of debt and potentially sabotage their entire financial futures just to get a fancy name on their diploma. But Zac Bissonnette is walking proof that this assumption is not only false, but dangerous—a class con game designed to rip you off and doom your student to a post-graduation life of near poverty. From his unique double perspective—he’s a personal finance expert (at Daily Finance) AND a current senior at the University of Massachusetts—Zac figured out how to get an outstanding education at a public college, without bankrupting his parents or taking on massive loans. Armed with his personal knowledge, the latest data, and smart analysis, Zac takes on the sacred cows of the higher education establishment. He reveals why a lot of the conventional wisdom about choosing and financing college is not only wrong but hazardous to you and your child’s financial future. You’ll discover, for instance, that: * Student loans are NOT a necessary evil. Ordinary middle class families can- and must-find ways to avoid them, even without scholarships. * College “rankings” are useless—designed to sell magazines and generate hype. If you trust one of the major guides when picking a college, you face a potential financial disaster. * The elite graduate programs accept lots of people with non-elite bachelors degrees. So do America’s most selective employers. The name on a diploma ultimately won’t help your child have a more successful career or earn more money. Zac can prove every one of those bold assertions - and more. No matter what your current financial situation, he has a simple message for parents: “RELAX! Your kid will be able to get a champagne education on a beer budget!”

The New York Times bestselling true story of an all-American girl and a boy from Zimbabwe -- and the letter that changed both of their lives forever. It started as an assignment. Everyone in Caitlin's class wrote to an unknown student somewhere in a distant place. Martin was lucky to even receive a pen-pal letter. There were only ten letters, and fifty kids in his class. But he was the top student, so he got the first one. That letter was the beginning of a correspondence that spanned six years and changed two lives. In this compelling dual memoir, Caitlin and Martin recount how they became best friends--and better people--through their long-distance exchange. Their story will inspire you to look beyond your own life and wonder about the world at large and your place in it.

Miriam, a freshman Calculus student at Louisiana State University, made 37.5% on her first exam but 83% and 93% on the next two. Matt, a first year General Chemistry student at the University of Utah, scored 65% and 55% on his first two exams and 95% on his third—These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book. What is preventing your students from performing according to expectations? Sandra McGuire offers a simple but profound answer: If you teach students how to learn and give them simple, straightforward strategies to use, they can significantly increase their learning and performance. For over a decade Sandra McGuire has been acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success. This book encapsulates the model and ideas she has developed in the past fifteen years, ideas that are being adopted by an increasing number of faculty with considerable effect. The methods she proposes do not require restructuring courses or an inordinate amount of time to teach. They can often be accomplished in a single session, transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning. Sandra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement. First, she demonstrates how introducing students to metacognition and Bloom's Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth. Next, she presents a specific study system that can quickly empower students to maximize their learning. Then, she addresses the importance of dealing with emotion, attitudes, and motivation by suggesting ways to change students' mindsets about ability and by providing a range of strategies to boost motivation and learning; finally, she offers guidance to faculty on partnering with campus learning centers. She pays particular attention to academically unprepared students, noting that the strategies she offers for this particular population are equally beneficial for all students. While stressing that there are many ways to teach effectively, and that readers can be flexible in picking and choosing among the strategies she presents, Sandra McGuire offers the reader a step-by-step process for delivering the key messages of the book to students in as little as 50 minutes. Free online supplements provide three slide sets and a sample video lecture. This book is written primarily for faculty but will be equally useful for TAs, tutors, and learning center professionals. For readers with no background in education or cognitive psychology, the book avoids jargon and esoteric theory.

The Ultimate Scholarship Book 2022: Billions of Dollars in Scholarships, Grants and Prizes

Read award-winning journalist Frank Bruni's New York Times bestseller: an inspiring manifesto about everything wrong with today's frenzied college admissions process and how to make the most of your college years. Over the last few decades, Americans have turned college admissions into a terrifying and occasionally devastating process, preceded by test prep, tutors, all sorts of stratagems, all kinds of rankings, and a conviction among too many young people that their futures will be determined and their worth established by which schools say yes and which say no. In *Where You Go is Not Who You'll Be*, Frank Bruni explains why this mindset is wrong, giving students and their parents a new perspective on this brutal, deeply flawed competition and a path out of the anxiety that it provokes. Bruni, a bestselling author and a columnist for the New York Times, shows that the Ivy League has no monopoly on corner offices, governors' mansions, or the most prestigious academic and scientific grants. Through statistics, surveys, and the stories of hugely successful people, he demonstrates that many kinds of colleges serve as ideal springboards. And he illuminates how to make the most of them. What matters in the end are students' efforts in and out of the classroom, not the name on their diploma. Where you go isn't who you'll be. Americans need to hear that--and this indispensable manifesto says it with eloquence and respect for the real promise of higher education.

A radically new way of thinking about form and context in literature, politics, and beyond *Forms* offers a powerful new answer to one of the most pressing problems facing literary, critical, and cultural studies today—how to connect form to political, social, and historical context. Caroline Levine argues that forms organize not only works of art but also political life—and our attempts to know both art and politics. Inescapable and frequently troubling, forms shape every aspect of our experience. Yet, forms don't impose their order in any simple way. Multiple shapes, patterns, and arrangements, overlapping and colliding, generate complex and unpredictable social landscapes that challenge and unsettle conventional analytic models in literary and cultural studies. Borrowing the concept of "affordances" from design theory, this book investigates the specific ways that four major forms—wholes, rhythms, hierarchies, and networks—have structured culture, politics, and scholarly knowledge across periods, and it proposes exciting new ways of linking formalism to historicism and literature to politics. Levine rereads both formalist and antiformalist theorists, including Cleanth Brooks, Michel Foucault, Jacques Rancière, Mary Poovey,

and Judith Butler, and she offers engaging accounts of a wide range of objects, from medieval convents and modern theme parks to Sophocles's *Antigone* and the television series *The Wire*. The result is a radically new way of thinking about form for the next generation and essential reading for scholars and students across the humanities who must wrestle with the problem of form and context.

The definitive history of Katrina: an epic of citymaking, revealing how engineers and oil executives, politicians and musicians, and neighbors black and white built New Orleans, then watched it sink under the weight of their competing ambitions. Hurricane Katrina made landfall in New Orleans on August 29, 2005, but the decisions that caused the disaster extend across the twentieth century. After the city weathered a major hurricane in 1915, its Sewerage and Water Board believed that developers could safely build housing away from the high ground near the Mississippi. And so New Orleans grew in lowlands that relied on significant government subsidies to stay dry. When the flawed levee system surrounding the city and its suburbs failed, these were the neighborhoods that were devastated. The homes that flooded belonged to Louisianans black and white, rich and poor. Katrina's flood washed over the twentieth-century city. The flood line tells one important story about Katrina, but it is not the only story that matters. Andy Horowitz investigates the response to the flood, when policymakers reapportioned the challenges the water posed, making it easier for white New Orleanians to return home than it was for African Americans. And he explores how the profits and liabilities created by Louisiana's oil industry have been distributed unevenly among the state's citizens for a century, prompting both dreams of abundance—and a catastrophic land loss crisis that continues today. Laying bare the relationship between structural inequality and physical infrastructure—a relationship that has shaped all American cities—Katrina offers a chilling glimpse of the future disasters we are already creating.
