Throughout the northern circumpolar tundras and forests, and over many millennia, human populations have based their livelihood wholly or in part upon the exploitation of a single animal species—the reindeer. Yet some are hunters, others pastoralists, while today traditional pastoral economies are being replaced by a commercially oriented ranch industry. In this book, drawing on ethnographic material from North America and Eurasia, Tim Ingold explains the causes and mechanisms of transformations between hunting, pastoralism and ranching, each based on the same animal in the same environment, and each viewed in terms of a particular conjunction of social and ecological relations of production. In developing a workable synthesis between ecological and economic approaches in anthropology, Ingold introduces theoretically rigorous concepts for the analysis of specialized animal-based economies, which cast the problem of 'domestication' in an entirely new light.

Transference of orientalist images and identities to the American landscape and its inhabitants, especially in the West—in other words, portrayal of the West as the “Orient”—has been a common aspect of American cultural history. Place names, such as the Jordan River or Pyramid Lake, offer notable examples, but the imagery and its varied meanings are more widespread and significant. Understanding that range and significance, especially to the western part of the continent, means coming to terms with the complicated, nuanced ideas of the Orient and of the North American continent that European Americans brought to the West. Such complexity is what historical geographer Richard Francaviglia unravels in this book. Since the publication of Edward Said’s book, Orientalism, the term has come to signify something one-dimensionally negative. In essence, the orientalist vision was an ethnocentric characterization of the peoples of Asia (and Africa and the “Near East”) as exotic, primitive “others” subject to conquest by the nations of Europe. That now well-established point, which expresses a postcolonial perspective, is critical, but Francaviglia suggest that it overlooks much variation and complexity in the views of historical actors and writers, many of whom thought of western places in terms of an idealized and romanticized Orient. It likewise neglects positive images and interpretations to focus on those of a decadent and ostensibly inferior East. We cannot understand well or fully what the pervasive orientalism found in western cultural history meant, says Francaviglia, if we focus only on its role as an intellectual engine for European imperialism. It did play that role as well in the American West. One only need think about characterizations of American Indians as Bedouins of the Plains destined for displacement by a settled frontier. Other roles for orientalism, though, from romantic to commercial ones, were also widely in play. In Go East, Young Man, Francaviglia explores a broad range of orientalist images deployed in the context of European settlement of the American West, and he unfolds their multiple significances.

This book, originally published in 1944, has 5,000 words of cowboy language as vibrant now as it was in the old American frontier. The native cowman forged his own language. Like other men of the soil, he created similes & metaphors, salty & unrefined, but sparkling with stimulating vigor. In the early days, many men with college degrees came west, fell in love with the freedom of range life, & remained. Not bound by conventions, they soon drifted into the infectious parlance of the cow country. This volume has been prepared to help preserve this lingo for posterity. The terms have been gathered from every part of the range. Within the cowman's figures of speech lie the rich field of his subtle humor & strength -- unique, original, full-flavored. Illus.
