A Good Morning America ‘January Book That Can Get Us Through Anything’ A Most Anticipated Novel of 2022 by The New York Times, Good Housekeeping, Harper’s Bazaar, Entertainment Weekly, New York Post, PopSugar, Shondaland, Yahoo!, and Crime Reads
A destitute woman deceives her way into the guesthouse of a Hollywood Hills mansion and inadvertently becomes a target in the twisted game of the wealthy family upstairs in the next intoxicating novel from Eliza Jane Brazier.
Lyla has always believed that life is a game she is destined to win, but her husband, Graham, takes the game to dangerous levels. The wealthy couple invites self-made success stories to live in their guesthouse and then conspires to ruin their lives. After all, there is nothing worse than a bootstrapper. Demi has always felt like the odds were stacked against her. At the end of her rope, she seizes a risky opportunity to take over another person’s life and unwittingly becomes the subject of the upstairs couple’s wicked entertainment. But Demi has been struggling forever, and she’s not about to go down without a fight. In a twist that neither woman sees coming, the game quickly devolves into chaos and rockets toward an explosive conclusion. Because every good rich person knows: in money and in life, it’s winner takes all. Even if you want to leave a few bodies behind.

"An inspiring an powerful success guide." ESSENCE
Author and entrepreneur Dennis Kimbro combines bestselling author Napoleon Hill’s law of success with his own vast knowledge of business, contemporary affairs, and the vibrant culture of Black America to teach you the secrets to success used by scores of black Americans, including: Spike Lee, Jesse Jackson, Dr. Selma Burke, Oprah Winfrey, and many others. The result is inspiring, practical, clearly written, and totally workable. Use it to unlock the treasure you have always dreamed of—the treasure that at last is within your reach.

The solution to inequality, environmental degradation, and other deficits of capitalism is better capitalism. The Power of Creative Destruction draws on cutting-edge research to argue that what we need today is not revolution but reform: pro-competitive policies that enable innovation while compensating for the disruption it causes.

Secrets of the Millionaire Mind reveals the missing link between wanting success and achieving it! Have you ever wondered why some people seem to get rich easily, while others are destined for a life of financial struggle? Is the difference found in their education, intelligence, skills, timing, work habits, contacts, luck, or their choice of jobs, businesses, or investments? The shocking answer is: None of the above! In his groundbreaking Secrets of the Millionaire Mind, T. Harv Eker states: "Give me five minutes, and I can predict your financial future for the rest of your life!" Eker does this by identifying your "money and success blueprint." We all have a personal money blueprint ingrained in our subconscious minds, and it is this blueprint, more than anything, that will determine our financial lives. You can know everything about marketing, sales, negotiations, stocks, real estate, and the world of finance, but if your money blueprint is not set for a high level of success, you will never have a lot of money—and if somehow you do, you will most likely lose it! The good news is that now you can actually reset your money blueprint to create natural and automatic success. Secrets of the Millionaire Mind is two books in one. Part I explains how your money blueprint works. Through Eker's rare combination of street smarts, humor, and heart, you will learn how your childhood influences have shaped your financial destiny. You will also learn how to identify your own money blueprint and "revise" it to not only create success but, more important, to keep and continually grow it. In Part II you will be introduced to seventeen "Wealth Files," which describe exactly how rich people think and act differently than most poor and middle-class people. Each Wealth File includes action steps for you to practice in the real world in order to dramatically increase your income and accumulate wealth. If you are not doing as well financially as you would like, you will have to change your money blueprint. Unfortunately your current money blueprint will tend to stay with you for the rest of your life, unless you identify and revise it, and that's exactly what you will do with the help of this extraordinary book. According to T. Harv Eker, it's simple. If you think like rich people think and do what rich people do, chances are you'll get rich too!

The main driver of inequality—returns on capital that exceed the rate of economic growth—is again threatening to generate extreme discontent and undermine democratic values. Thomas Piketty’s findings in this ambitious, original, rigorous work will transform debate and set the agenda for the next generation of thought about wealth and inequality.

"The groundbreaking investigation of how the global elite's efforts to "change the world" preserve the status quo and obscure their role in causing the problems they later seek to solve. An essential read for understanding some of the egregious abuses of power that dominate today's news. "Impassioned... Entertaining reading." —The Washington Post
Anand Giridharadas takes us into the inner sanctums of a new gilded age, where the rich and powerful fight for equality and justice any way they can—except ways that threaten the social order and their position atop it. They rebrand themselves as saviors of the poor; they lavishly reward "thought leaders" who redefine "change" in ways that preserve the status quo; and they constantly seek to do more good, but never less harm. Giridharadas asks hard questions: Why, for example, should our gravest problems be solved by the unelected upper crust instead of the public institutions it erodes by lobbying and dodging taxes? His groundbreaking investigation has already forced a great, sorely needed reckoning among the world's wealthiest and those they hover above, and it points toward an answer: Rather than rely on scraps from the winners, we must take on the grueling democratic work of building more robust, egalitarian institutions and truly changing the world—a call to action for elites and everyday citizens alike.

*Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.*

This volume presents over 200 selected original artworks from the collections of Betsy Beinecke Shirley, one of the great collectors of American children's literature. Shirley gathered an authoritative collection of books, original illustrations, manuscripts, as well as drawings and paintings from such children's classics as "Treasure Island" and "Eloise." The artwork in Shirley's collection guides the reader on a tour through the stages of childhood reading, this volume begins with ABC's and nursery books. It continues through adventure stories, magazines, and more, then concludes with a miscellany section of odds and ends. The images demonstrate how children's books evolved, from the nation's first days of independence to modern times. Artists whose works are represented include many of the favorites, among them Ludwig Bemelmans, Maurice Sendak, A.B. Frost, Wanda Gag, Peter Newell, N.C. Wyeth, Tony Sarg, Robert Lawson, and Johnny Groutle.

Measuring Entrepreneurial Businesses: Current Knowledge and Challenges brings together and unprecedented group of economists, data providers, and data analysts to discuss research on the state of entrepreneurship and to address the challenges in understanding this dynamic part of the economy. Each chapter addresses the challenges of measuring entrepreneurship and how entrepreneurial firms contribute to economies and standards of living. The book also investigates heterogeneity in entrepreneurs, challenges experienced by entrepreneurs over time, and how much less we know than we think about entrepreneurship given data limitations. This volume will be a groundbreaking first serious look into entrepreneurship in the NBER's Income and Wealth series.

It's no secret that these hard times have been even harder for the Black community. Approximately 35 percent of African Americans had no measurable assets in 2009, and 24 percent of these same households had only a motor vehicle. Dennis Kimbro, observing how the weight of the continuing housing and credit crises disproportionately impacts the African-American community, takes a sharp look at a carefully cultivated group of individuals who've scaled the heights of success and how others can emulate them. Based on a seven year study of 1,000 of the wealthiest African Americans, The Wealth Choice offers a trove of sound and surprising advice about climbing the economic ladder, even when the odds seem stacked against you. Readers will learn about how business leaders, entrepreneurs, and celebrities like Bob Johnson, Spike Lee, L. A. Reid, Herman Cain, T. D. Jakes and Tyrese Gibson found their paths to wealth; what they did or didn't learn about money early on; what they had to sacrifice to get to the top; and the role of discipline in managing their success. Through these stories, which include men and women at every stage of life and in every industry, Dennis Kimbro shows readers how to:
· Develop a wealth-generating mindset and habits
· Commit to lifelong learning
· Craft goals that match your passion
· Make short-term sacrifices for long-term gain
· Take calculated risks when opportunity presents itself

Should governments be involved in economic affairs? Challenging prevailing wisdom about the benefits of self-regulating markets, Nina Bandelj and Elizabeth Sowers offer a uniquely sociological perspective to emphasize that states can never be divorced from economy. From defining property rights and regulating commodification of labor to setting corporate governance standards and international exchange rules, the state continuously manages the functioning of markets and influences economic outcomes for individuals, firms and nations. The authors bring together classical interventions and cutting-edge contemporary research in economic sociology to discuss six broad areas of economy/state connection: property, money, labor, firms, national economic growth, and global economic exchange. A wealth of empirical examples and illustrations reveals that even if the nature of state influence on economy varies across contexts, it is always dependent on social forces. This accessible and engaging book will be essential reading for upper-level students of economic sociology, and those interested in the major economic dilemmas of our times.

The deliberate devaluation of Blacks and their communities has had very real, far-reaching, and negative economic and social effects. An enduring white supremacist myth claims brutal conditions in Black communities are mainly the result of Black people's collective choices and moral failings. "That's just how they are" or "there's really no excuse": we've all heard those not so subtle digs. But there is nothing wrong with Black people that ending racism can't solve. We haven't known how much the country will gain by properly valuing homes and businesses, family structures, voters, and school districts in Black neighborhoods. And we need to know. Noted educator, journalist, and scholar Andre Perry takes readers on a tour of six Black-majority cities whose assets and strengths are undervalued. Perry begins in his hometown of Wilkingsburg, a small city east of Pittsburgh that, unlike its much larger neighbor, is struggling and failing to attract new jobs and industry. Bringing his own personal story of growing up in Black-majority Wilkingsburg, Perry also spotlights five others where he has deep connections: Detroit, Birmingham, New Orleans, Atlanta, and Washington, D.C. He provides an intimate look at the assets that should be of greater value to residents—and that can be if they demand it. Perry provides a new means of determining the value of Black communities. Rejecting policies shaped by flawed perspectives of the past and present, it gives fresh insights on the historical effects of racism and provides a new value paradigm to limit them in the future. Know Your Price demonstrates the worth of Black people's intrinsic personal strengths, real property, and traditional institutions. These assets are a means of empowerment and, as Perry argues in this provocative and very personal book, are what we need to know and understand to build Black prosperity.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Social capital is a principal concept across the social sciences and has readily entered into mainstream discourse. In short, it is popular. However, this popularity has taken its toll. Social capital suffers from a lack of consensus because of the varied ways it is measured, defined, and deployed by different researchers. It has been put to work in ways that stretch and confuse its conceptual value, blurring the lines between networks, trust, civic engagement, and any type of collaboration. The New York Times bestselling "road map of conscious compassion and love" (Deepak Chopra) from actor, singer, songwriter Tyrese Gibson. Organized as a series of fundamental questions that helped Tyrese redefine who he was as a human being, and evolve into a new man, How To Get Out of Your Own Way is a guide to helping yourself, using his experiences as a learning tool. "It's not about talking down to people, it's about elevating them." Tyrese says, stressing that life becomes infinitely richer when one takes the time to know oneself and understand the true meaning of peace and fulfillment. Some of Tyrese's chapter-based questions include: How much do you love yourself? How much do you want for yourself? Why do men cheat? What is your bottom line? Are you ready for the next level? With personal experiences paired with reflective questions based on his extremely popular blog piece, "The Love Circle", Tyrese hopes to inspire readers to pursue their dreams and not let life's obstacles stand in the way. "A triumph. Tyrese will shock and amaze you with how he overcame the odds and became a superstar." --Rev Run "I've watched Tyrese for many years -- I've watched him succeed; I've watched him fail; I've seen him as a beneficiary of serendipity, and I've watched him suffer at his own hand. And in the recent years, as we've become friends, I've witnessed Tyrese Gibson learn how to get out of his own way." --Will Smith

Understanding How to Build Black Generational Wealth is the first book of its kind. Leveraging history and statistics to motivate the reader to do something about longstanding endemic Black economic disparity, Esi Kagale Agyeman Gillo does a fine job of empowering the reader to take hold of their own personal, generational and communal wealth-building processes. This book is easy to read, practical, interactive and action-oriented. Esi co-founded the nonprofit organization DIFFVeloopment with her husband, Peter Markeeo Gillo, in 2015 and is relentlessly committed to developing unique ways to foster sustainable global Black empowerment. She has an MSC in African Studies from the University of Oxford and a BA in Psychology and Afro-American Studies from Smith College.

A remarkable literary debut—shortlisted for the Man Booker Prize! The unflinching and powerful story of a young girl’s journey out of Zimbabwe and to America. Darling is only ten years old, and yet she must navigate a fragile and violent world. In Zimbabwe, Darling and her friends steal guavas, try to get the baby out of young Chipso’s belly, and grasp at memories of Before. Before their homes were destroyed by paramilitary policemen, before the school closed, before the fathers left for dangerous jobs abroad. But Darling has a chance to escape: she has an aunt in America. She travels to this new land in search of America’s famous abundance only to find that her options are perilously few. NoViolet Bulawayo’s debut calls to mind the great storytellers of displacement and arrival who have come before her—from Junot Diaz to Zadie Smith to J.M. Coetzee—while she tells a vivid, raw story all her own.

"By telling the little-known stories of six pioneering African American entrepreneurs, Black Fortunes makes a worthy contribution to black history, to business history, and to American history."—Margot Lee Shetterly, New York Times Bestselling author of Hidden Figures
Between the years of 1830 and 1927, as the last generation of blacks born into slavery was reaching maturity, a small group of industrious, tenacious, and daring men and women broke new ground to attain the highest levels of financial success. Mary Ellen Pleasant, used her Gold Rush wealth to further the cause of abolitionist John Brown. Robert Reed Church, became the largest landowner in Tennessee. Hannah Elias, the mistress of a New York City millionaire, used the land her lover gave her to build an empire in Harlem. Orphan and self-taught chemist Annie Turnbo-Malone, developed the first national brand of hair care products. Mississippi school teacher O. W. Gurley, developed a piece of Tulsa, Oklahoma, into a "town" for wealthy black professionals and craftsmen that would become known as "the Black Wall Street." Although Madam C. J Walker was given the title of America's first female black millionaire, she was not. She was the first, however, to flaunt and openly claim her wealth—a dangerous and revolutionary act. Nearly all the unforgettable personalities in this amazing collection were often attacked, demonized, or swindled out of their wealth. Black Fortunes illuminates as never before the birth of the black business titan.

Foreword by Morgan Housel Psychology and the Secret to Investing Success in The Laws of Wealth, psychologist and behavioral finance expert Daniel Crosby offers an accessible and applied take on a discipline that has long tended toward theory at the expense of the practical. Readers are treated to real, actionable guidance as the promise of behavioral finance is realized and practical applications for everyday investors are delivered. Crosby presents a framework of timeless principles for managing your behavior and your investing process. He begins by outlining 10 rules that are the hallmarks of good investor behavior, including "Forecasting is for Weathermen" and "If You're Excited, It's Probably a Bad Idea." He then goes on to introduce a unique new classification of behavioral investment risk that will enable investors and academics alike to understand behavioral risk in a coherent and comprehensive manner. The Laws of Wealth is a finance classic and a must-read for those interested in deepening their understanding of how psychology impacts financial decision-making. "Should be read by all those new to investing." JIM O'SHAUGHNESSY, International Bestselling Author "Don't let your mind ruin your investing outcomes." LOUANN LOFTON, The Motley Fool "Step away from CNBC and into financial therapy!" MEBETHITH A. JONES, Author, Women of the Street

A groundbreaking investigation of how and why, from the 19th century to the present day, American resistance to our ruling elites has vanished. From the American Revolution through the Civil Rights movement, Americans have long mobilized against political, social, and economic privilege. Hierarchies based on inheritance, wealth, and political preferment were treated as obnoxious and a threat to democracy. Mass movements envisioned a new world supplanting dog-eat-dog capitalism. But over the last half-century that political will and cultural imagination have vanished. Why? THE AGE OF ACQUIESCENCE seeks to solve that mystery. Steve Fraser's account of national transformation brilliantly examines the rise of American capitalism, the visionary attempts to protect the democratic commonwealth, and the great surrender to today's delusional fables of freedom and the politics of fear. Effervescent and razor-sharp, THE AGE OF ACQUIESCENCE will be one of the most provocative and talked-about books of the year.

This shocking exposé of the insidious machinery of inequality is essential reading for anyone wanting the inside story of our age of plutocratic plunder and stashed cash.

Runyon Heights, a community in Yonkers, New York, has been populated by middle-class African Americans for nearly a century. This book[[the first history of a black middle-class community]]tells the story of Runyon Heights, which sheds light on the process of black suburbanization and the ways in which residential development in the suburbs has been shaped by race and class. Relying on both interviews with residents and archival research, Bruce D. Hayes describes the progressive stages in the life of the community and its inhabitants and the factors that enabled it to form in the first place and to develop solidarity, identity and political consciousness. He shows how residents came to recognize common political interests within the community, how racial consciousness provided an axis of social solidarity as well as partial insulation from racial slights, and how the suburbs afforded these middle-class residents a degree of physical and social distance from the ghetto. As Hayes explores the history of Runyon Heights, we learn the ways in which its black middle class dealt with the tensions between the political interests of race and the material interests of class.

In his previous bestsellers, Think and Grow Rich and What Makes the Great Show, Dennis Kimbro revealed the success secrets of highly touted entrepreneurs, corporate climbers, and Olympic athletes, as well as famous black Americans from George Washington Carver to Bill Cosby, Oprah Winfrey, and Jesse Jackson. In What Keeps Me Standing, he turns to another group of sages and mentors: the grandmothers who have long been the backbone of the African American family and community. Over a period of five years, Kimbro contacted one thousand grandmothers—women from a wide range of backgrounds and locations—asking, "If you had to write a one page letter to your children or the next generation, what would you tell them about life?" Their answers, collected here, show that success in life cannot be measured in terms of wealth and material goods alone. The lives they describe and the advice they proffer capture both a richness in spirit and a strong belief in the power of every individual to take charge of his or her own destiny. In the face of racism, both blatant and subtle, financial struggles, and personal setbacks, black grandmothers have helped their communities in thousands of tangible and intangible ways, providing support, inspiration, and love not only to their own children and grandchildren but also to neighbors, friends, and extended families. Filled with examples of how even the smallest acts of kindness and compassion can make a difference in the world, What Keeps Me Standing is a treasure trove of the wisdom that comes with years of experience, transformation, and growth. It is the perfect gift.

Understanding How to Build Black Generational Wealth

10TH ANNIVERSARY EDITION
Is the financial plan of mediocrity -- a dream-stealing, soul-sucking dogma known as "The Slowlane" your plan for creating wealth? You know how it goes; it sounds a lil something like this: "Go to school, get a good job, save 10% of your paycheck, buy a used car, cancel the movie channels, quit drinking expensive Starbucks mocha lattes, save and penny-pinch your life away, trust your life-savings to the stock market, and one day, when you are oh, say, 65 years old, you can retire rich." The mainstream financial gurus have sold you blindly down the river to a great financial gamble: You've been hoodwinked to believe that wealth can be created by recklessly trusting in the uncontrollable and unpredictable markets: the housing market, the stock market, and the job market. This impotent financial gamble doubly promises wealth in a wheelchair -- sacrifice your adult life for a financial plan that reaps dividends in the twilight of life. Accept the Slowlane as your blueprint for wealth and your financial future will burn carelessly asunder on a sailboat of HOPE: HOPE you can find a job and keep it, HOPE the stock market doesn't tank, HOPE the economy rebounds, HOPE, HOPE, and HOPE. Do you really want HOPE to be the centerpiece for your family's financial plan? Drive the Slowlane road and you will find your life deteriorate into a miserable exhibition about what you cannot do, versus what you can. For those who don't want a lifetime subscription to "settle-for-less" and a slight chance of elderly riches, there is an alternative; an expressway to extraordinary wealth that can burn a trail to financial independence faster than any road out there. Why jobs, 401(k)s, mutual funds, and 40-years of mindless frugality will never make you rich young. Why most entrepreneurs fail and how to immediately put the odds in your favor. The real law of wealth: Leverage this and wealth has no choice but to be magnetized to you. The leading cause of poorness: Change this and you change everything. How the rich really get rich - and no, it has nothing to do with a paycheck or a 401K match. Why the guru's grand deity - compound interest - is an impotent wealth accelerator. Why the guru myth of "do what you love" will most likely keep you poor, not rich. And 250+ more poverty busting distinctions... Demand the Fastlane, an alternative road-to-wealth; one that actually ignites dreams and creates millionaires young, not old. Change lanes and find your explosive wealth accelerator. Hit the Fastlane, crack the code to wealth, and find out how to live rich for a lifetime.

New York Times bestselling author Laura Thompson returns with Heiresses, a fascinating look at the lives of heiresses throughout history and the often tragic truth beneath the gilded surface. Heiresses: surely they are among the luckiest women on earth. Are they not to be envied, with their private jets and Chanel wardrobes and endless funds? Yet all too often those gilded lives have been beset with trauma and despair. Before the 20th century a wife ' s inheritance was the property of her husband, making her vulnerable to kidnap, forced marriages, even confinement in an asylum. And in modern times, heiresses fell victim to fortune-hunters who squandered their millions. Heiresses tells the stories of these million dollar babies: Mary Davies, who inherited London ' s most valuable real estate, and was bartered from the age of twelve; Consuelo Vanderbilt, the original American " Dollar Heiress " , forced into a loveless marriage; Barbara Hutton, the Woolworth heiress who married seven times and died almost penniless; and Patty Hearst, heiress to a newspaper fortune who was arrested for terrorism. However, there are also stories of independence and achievement: Angela Burdett-Coutts, who became one of the greatest philanthropists of Victorian England; Nancy Cunard, who lived off her mother's fortune and became a pioneer of the civil rights movement; and Daisy Fellowes, elegant linchpin of interwar high society and noted fashion editor. Heiresses is about the lives of the rich, who—as F. Scott Fitzgerald said—are ' different ' . But it is also a bigger story about how all women fought their way to equality, and sometimes even found autonomy and fulfillment.

While neo-classical analysis works well for studying impersonal exchange in markets, it fails to explain why people conduct themselves the way they do in their personal relationships with family, neighbors, and friends. In Humanomics, Nobel Prize-winning economist Vernon L. Smith and his long-time co-author Bart J. Wilson bring their study of economics full circle by returning to the founder of modern economics, Adam Smith. Sometime in the last 250 years, economists lost sight of the full range of human feeling, thinking, and knowing in everyday life. Smith and Wilson show how Adam Smith's model of sociality can re-humanize twenty-first century economics by undergirding it with sentiments, fellow feeling, and a sense of propriety - the stuff of which human relationships are built. Integrating insights from The Theory of Moral Sentiments and the Wealth of Nations into contemporary empirical analysis, this book shapes economic betterment as a science of human beings.

Part vocational pep rally, part how-to book, in What Makes the Great Great, bestselling author Dennis Kimbro explores the strategies and thought processes of successful African-Americans. What Makes the Great Great elaborates on the inspiring message Dennis Kimbro put forth in his first book Think and Grow Rich--A Black Choice. Through dozens of interviews and the inspirational stories of people like John H. Johnson, Publisher of Ebony magazine, Condoleeza Rice, Provost of Stanford University, and Ann Fudge, President of Maxwell House Coffee, Dr. Kimbro outlines the nine strategies that determine success. According to Dr. Kimbro, being great depends on a commitment to making dreams come true: "All high achievers make choices, not excuses." We all have the seeds of greatness in us, and his book gives readers the tools to discover and nurture those seeds, showing them how to motivate themselves to master every aspect of their lives.
