Years of pretending I was just like everyone else could all have been for naught. But then I heard it was Verona, and my blood ran cold. Why was I surprised? I shouldn't have been. I'd stood by and watched her ridiculed since we were younglings. I was never as brave or as unselfish as she was. But today, I would be.

A People and US Weekly Pick "An impressive feat...an immensely entertaining, moving, and believable read" (Atlanta Journal-Constitution), this debut novel in the bestselling tradition of *P.S. I Love You* revolves around a young woman with breast cancer who undertakes a mission to find a new wife for her husband before she passes away. Twenty-seven-year-old Daisy already beat breast cancer four years ago. How can this be happening to her again? She may have as few as four months left to live. Death is a frightening prospect—but not because she's afraid for herself. She's terrified of what will happen to her brilliant but otherwise charmingly helpless husband when she's no longer there to take care of him. It's this fear that keeps her up at night, until she stumbles on the solution: she has to find him another wife. With a singular determination, Daisy scouts local parks and coffee shops and online dating sites looking for Jack's perfect match. But the further she gets on her quest, the more she questions the sanity of her plan. As the thought of her husband with another woman becomes all too real, Daisy's forced to decide what's more important in the short amount of time she has left: her husband's happiness—or her own?

The explosive, first-ever insider's account of a case that continues to fascinate the public—the shocking wrongful conviction of Russell Faria for his wife's murder—a gripping read told by New York Times bestselling true crime expert Charles Bosworth Jr. and Joel J. Schwartz, the defense attorney who battled for justice, and ultimately prevailed. On December 27th, 2011, Russell Faria returned to his Troy, Missouri, home after his weekly game night with friends to an unthinkable, grisly scene: His wife, Betsy, lay dead, a knife still lodged in her neck. She'd been stabbed fifty-five times. First responders concluded that Betsy was dead for hours when Russ discovered her. No blood was found implicating Russ, and surveillance video, receipts, and friends' testimony all

supported his alibi. Yet incredibly, police and the prosecuting attorney ignored the evidence. In their minds, Russ was guilty. But prominent defense attorney Joel J. Schwartz quickly recognized the real killer. The motive was clear. Days before her murder, the terminally ill Betsy replaced her husband with her friend, Pamela Hupp, as her life insurance beneficiary. Still, despite the prosecution's flimsy case and Hupp's transparent lies, Russ was convicted—leaving Hupp free to kill again. *Bone Deep* takes readers through the perfect storm of miscalculations and missteps that led to an innocent man's conviction—and recounts Schwartz's successful battle to have that conviction overturned. Written with Russ Faria's cooperation, and filled with chilling new revelations and previously undisclosed evidence, this is the story of what can happen when police, prosecutor, judge, and jury all fail in their duty to protect the innocent—and let a killer get away with murder.

In this witty and perceptive debut, a former editor at Psychology Today shows us how magical thinking makes life worth living. Psychologists have documented a litany of cognitive biases—misperceptions of the world—and explained their positive functions. Now, Matthew Hutson shows us that even the most hardcore skeptic indulges in magical thinking all the time—and it's crucial to our survival. Drawing on evolution, cognitive science, and neuroscience, Hutson shows us that magical thinking has been so useful to us that it's hardwired into our brains. It encourages us to think that we actually have free will. It helps make us believe that we have an underlying purpose in the world. It can even protect us from the paralyzing awareness of our own mortality. In other words, magical thinking is a completely irrational way of making our lives make rational sense. With wonderfully entertaining stories, personal reflections, and sharp observations, Hutson reveals our deepest fears and longings. He also assures us that it is no accident his surname contains so many of the same letters as this imprint.

An American Family in Paris describes the daily life and adventures of a family living in the Seventh Arrondissement, the heart of Paris, from 1983 to 1985. NEW YORK TIMES BESTSELLER • This essay collection from the “bitches gotta eat” blogger, writer on Hulu’s *Shrill*, and “one of our country’s most fierce and foulmouthed authors” (Amber Tamblyn, *Vulture*) is sure to make you alternately cackle with glee and cry real tears. Whether Samantha Irby is talking about how her difficult childhood has led to a problem in making “adult” budgets; explaining why she should be the new Bachelorette (she’s “35-ish, but could easily pass for 60-something”); detailing a disastrous pilgrimage-slash-romantic-vacation to Nashville to scatter her estranged father’s ashes; sharing awkward sexual encounters; or dispensing advice on how to navigate friendships with former drinking buddies who are now suburban moms (hang in there for the Costco loot!); she’s as deft at poking fun at the ghosts of her past self as she is at capturing powerful emotional truths.

The world, at large, is in crisis but so is the marriage between Tia and her husbands. She thought she could trust them all but when one man betrays her, the cracks in the relationship are revealed. In a desperate, emotional finale to the *Six Men of Alaska* saga, Tia is faced with her worst enemy one last time. A gun is placed in someone’s hands and the trigger is pulled. No one is safe and time is running out. When you play the lottery, you enter a deadly game. At least, you do when Christina Thorne is your wife. Love is a gamble, but this is one legacy worth betting on. *The Wife Legacy* is the final book in a six-book dystopian romance series, which must be read in order. The passion is high but the stakes are even higher. Tia and her rugged husbands are in the wilds of Alaska fighting for their lives – and for their love.

Six People Who Faced Adversity and Transformed Their Lives
Untangling the Betsy Faria Murder Case

Imagine for a moment that you are about to take a foreign vacation to an exotic destination. You have saved your entire life to travel there. It is a destination with almost unlimited choices of how to spend

your time and you know you will not have enough time to explore every opportunity. You are fairly certain that you will never get to take a second trip to this destination; this will be your one opportunity. Now imagine that someone informs you that there are several people in your neighborhood who have been to that country, explored every corner. Some of them enjoyed the journey and have few regrets, but others wish they could take the trip again knowing what they know now. Would you not invite them over for dinner, ask them to bring their photographs, listen to their stories, and hear their advice? This is precisely the journey explored in this book. Dr. John Izzo and his colleagues interviewed over 200 people over the age of sixty (up to 106 years of age) who were identified by others as having lived happy lives and as having found purpose and contentment. The interviewees ranged from aboriginal elders to town barbers, from Holocaust survivors to former CEO's. In these interviews, each person was asked to reflect back on his or her life to identify the sources of happiness and meaning as well as lessons learned, regrets, major crossroads, and what did not contribute to meaning in their lives. Based on these interviews, and Dr. Izzo's twenty years experience helping people find more spirit and purpose, the book explores the secrets to finding contentment, happiness, and purpose. Using a powerful narrative voice, Dr. Izzo helps the reader understand the common themes from the lives of those interviewed, the commonality of what really matters in their lives, and especially how to put this wisdom into practice.

Bear Valley: Where rugged men find more than a safe haven -- they find their mates. The gorgeous newcomer in town, Harley MacBeth, is everything I'm not. Charming, outgoing, and stubborn. So damn stubborn. Well, I guess we have that in common. I'm in bear form when I see the infuriatingly sexy woman painting by the river. In a flash, she becomes a damsel in distress. Good thing this mountain man is here to save her. I pull her from the river, kiss her sweet, pink lips, and damn — I'm a goner. After a night together, I know she's my mate — my everything. But we're opposites, and unless we're in bed, we're at odds. Her past is coming for her. And even though she may be the only woman for me, she still has a choice to walk away. Can I convince her that she belongs to me, before it's too late?

Chronicles the creation of Meredith Willson's *The Music Man*—reprinted now as the Broadway Edition Composer Meredith Willson described *The Music Man* as "an Iowan's attempt to pay tribute to his home state." Now featuring a new foreword by noted singer and educator Michael Feinstein, this book presents Willson's reflections on the ups and downs, surprises and disappointments, and finally successes of making one of America's most popular musicals. Willson's whimsical, personable writing style brings readers back in time with him to the 1950s to experience firsthand the exciting trials and tribulations of creating a Broadway masterpiece. Fresh admiration of the musical—and the man behind the music—is sure to result.

Over twenty years ago a gentleman in Asbury Park, N. J. began manufacturing and advertising a preparation for the immediate and unfailing straightening of the most stubborn Negro hair. This preparation was called Kink-No-More, a name not wholly accurate since users of it were forced to renew the treatment every fortnight. During the intervening years many chemists, professional and amateur, have been seeking the means of making the downtrodden Aframerican resemble as closely as possible his white fellow citizen. The temporarily effective preparations placed on the market have so far proved exceedingly profitable to manufacturers, advertising agencies, Negro newspapers and beauty culturists, while millions of users have registered great satisfaction at the opportunity to rid themselves of kinky hair and grow several shades lighter in color, if only for a brief time. With America's constant reiteration of the superiority of whiteness, the avid search on the part of the black masses for some key to chromatic perfection is easily understood. Now it would seem that science is on the verge of satisfying them.

In his book, Richard discusses the ins and outs and dos and don'ts of buying lottery tickets to increase your chances of winning. He has created a method that he and members of his family use that has enabled them to WIN several lottery game GRAND prizes. This is a very easy to use method and will work with any type lottery games (scratch tickets or number games) in any state or country. Here are some quotes from people who have used his method: "My husband and I used Richard Lustig's lotto method and within months of starting the method we hit a Mega Money jackpot for 2 million dollars! It was really easy to follow. You only play what you can and you can still win! Shaun and I will only play lotto from now on using these strategies." -Jennifer and Shaun, Florida "Since we've been using your method, we have definitely been winning more than we used to. It's easy to follow" -Dale, Florida "I just wanted to let you know that my husband and I read through your lottery method last night. It seems great. It seems to be just simple logic and makes sense." -Kate, Illinois

A Cognitive Scientist Answers Questions About How the Mind Works and What It Means for the Classroom

"Mesmerizing & fascinating..." —The Seattle Post-Intelligencer "The Freakonomics of big data." —Stein Kretsinger, founding executive of Advertising.com Award-winning | Used by over 30 universities | Translated into 9 languages An introduction for everyone. In this rich, fascinating — surprisingly accessible — introduction, leading expert Eric Siegel reveals how predictive analytics (aka machine learning) works, and how it affects everyone every day. Rather than a "how to" for hands-on techies, the book serves lay readers and experts alike by covering new case studies and the latest state-of-the-art techniques. Prediction is booming. It reinvents industries and runs the world. Companies, governments, law enforcement, hospitals, and universities are seizing upon the power. These institutions predict whether you're going to click, buy, lie, or die. Why? For good reason: predicting human behavior combats risk, boosts sales, fortifies healthcare, streamlines manufacturing, conquers spam, optimizes social networks, toughens crime fighting, and wins elections. How? Prediction is

powered by the world's most potent, flourishing unnatural resource: data. Accumulated in large part as the by-product of routine tasks, data is the unsalted, flavorless residue deposited en masse as organizations churn away. Surprise! This heap of refuse is a gold mine. Big data embodies an extraordinary wealth of experience from which to learn. Predictive analytics (aka machine learning) unleashes the power of data. With this technology, the computer literally learns from data how to predict the future behavior of individuals. Perfect prediction is not possible, but putting odds on the future drives millions of decisions more effectively, determining whom to call, mail, investigate, incarcerate, set up on a date, or medicate. In this lucid, captivating introduction — now in its Revised and Updated edition — former Columbia University professor and Predictive Analytics World founder Eric Siegel reveals the power and perils of prediction: What type of mortgage risk Chase Bank predicted before the recession. Predicting which people will drop out of school, cancel a subscription, or get divorced before they even know it themselves. Why early retirement predicts a shorter life expectancy and vegetarians miss fewer flights. Five reasons why organizations predict death — including one health insurance company. How U.S. Bank and Obama for America calculated the way to most strongly persuade each individual. Why the NSA wants all your data: machine learning supercomputers to fight terrorism. How IBM's Watson computer used predictive modeling to answer questions and beat the human champs on TV's Jeopardy! How companies ascertain untold, private truths — how Target figures out you're pregnant and Hewlett-Packard deduces you're about to quit your job. How judges and parole boards rely on crime-predicting computers to decide how long convicts remain in prison. 182 examples from Airbnb, the BBC, Citibank, ConEd, Facebook, Ford, Google, the IRS, LinkedIn, Match.com, MTV, Netflix, PayPal, Pfizer, Spotify, Uber, UPS, Wikipedia, and more. How does predictive analytics work? This jam-packed book satisfies by demystifying the intriguing science under the hood. For future hands-on practitioners pursuing a career in the field, it sets a strong foundation, delivers the prerequisite knowledge, and whets your appetite for more. A truly omnipresent science, predictive analytics constantly affects our daily lives. Whether you are a consumer of it — or consumed by it — get a handle on the power of Predictive Analytics.

'A love letter to English horticulture written by a passionate gardener. A must-read for anyone who has dreamt of cultivating their own patch of land' Jane Perrone 'Skymeadow is a fascinating book . . . Every flower, every passing bud, every change in the season is described with rapture' Jilly Cooper When Charlie Hart first visited Peverels, a small farmhouse that sits lazily on the lip of a hill running down into the Peb Valley, he was at breaking point, grieving the loss of his father and anxious about the impending death of his mother. He and his wife Sybilla felt that their London life had been steadily growing in noise: the noise of grief, the noise of busyness, the noise that comes from the expectations of others and, for Charlie, the constant clamour of dissatisfaction at work. At Peverels, Charlie found an expanse of untouched meadowland, the perfect setting for an audacious garden. Charlie felt an unquenchable urge to dig, to create something. The days he spent wrestling with the soil in the rose garden were the days in which he mourned the loss of his parents. Gardening has taught him that you can dig for victory, but you can also dig for mental health. As the garden formed around Charlie, he buried his fears and anxieties within it. A garden that is now

known as Skymeadow and grows with a lusty, almost biblical vigour. In Skymeadow, Charlie seamlessly weaves together his own memoir with that of his garden. The result is a lyrical and incisive story of mental health at an all-time low, the healing powers of digging and, ultimately, a celebration of nature.

The Wife Lottery: Fallon (Six Men of Alaska Book 1) Frankie Love

NEW YORK TIMES BESTSELLER • “ Driving, wild and hilarious ” (The Washington Post), here is the incredible “ memoir ” of the legendary actor, gambler, raconteur, and Saturday Night Live veteran. When Norm Macdonald, one of the greatest stand-up comics of all time, was approached to write a celebrity memoir, he flatly refused, calling the genre “ one step below instruction manuals. ” Norm then promptly took a two-year hiatus from stand-up comedy to live on a farm in northern Canada. When he emerged he had under his arm a manuscript, a genre-smashing book about comedy, tragedy, love, loss, war, and redemption. When asked if this was the celebrity memoir, Norm replied, “ Call it anything you damn like. ”

Winner of the Hugo and Nebula Awards for best novel Four travelers come to the ringworld.

. . Louis Wu: human and old; bored with having lived too fully for far too many years.

Seeking a challenge, and all too capable of handling it. Nessus: a trembling coward, a puppeteer with a built-in survival pattern of nonviolence. Except that this particular puppeteer is insane. Teela Brown: human; a wide-eyed youngster with no allegiances, no experience, no abilities. And all the luck in the world. Speaker-To-Animals: kzin; large, orange-furred, and carnivorous. And one of the most savage life-forms known in the galaxy. Why did these disparate individuals come together? How could they possibly function together? And where, in the name of anything sane, were they headed?
