have intelligence? Do they have memory? Are they better problem solvers than people? The Revolutionary Genius of Plants—a fascinating, paradigm-shifting work that upends everything you thought you knew about plants—makes a compelling scientific case that these and other astonishing ideas are all true. world-renowned scientist Stefano Mancuso reveals the surprisingly sophisticated ability of plants to innovate, to remember, and to learn, offering us creative solutions to the most vexing technological and ecological problems that face us today. Despite not having brains or central nervous systems, plants perceive their surroundings with an even greater sensitivity than animals. They efficiently explore and react promptly to potentially damaging external events thanks to their cooperative, shared systems; without any central command centers, they are able to remember prior catastrophic events and to actively adapt to new ones. and the United States to the Global South. While we typically imagine Western missionaries carrying religion to the ends of the earth, David R. Swartz shows that the line of influence has often run the other way, as evangelicals in nations such as Korea, India, and Uganda shaped the American church from abroad. Swartz tells stories of evangelicals crossing national boundaries, offering new insights into a tradition that imagines itself as simultaneously American and part of a global communion"--

English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but engaging way, always backing up observations with facts and figures. Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language.

A major theme runs throughout, describing what is needed to transition from where you are today, to happiness [recognition, wealth, and gratification of the senses], or if you are already a happy person, to find a higher level of happiness.
