Technology-Enhanced Assessment of Talent

The changes going on in today's workplace including diverse generations, shifting demographics and evolving technology are forever changing work and leadership as we know it. Now, with Decades of Differences: Making It Work, leaders have the concrete tools they need to become razor sharp, extremely adaptable and fully prepared to effectively lead and manage both the changes and the change-makers.

"This volume provides anyone using technology-enhanced assessments as part of organizational selection, promotion, or development programs, or considering their use, with both cutting-edge discussions of critical measurement issues and detailed examples of ongoing HR systems that highlight the opportunities and challenges of such assessments." —James L. Farr, professor, Department of Psychology, Pennsylvania State University "Assessment systems provide an efficient means to evaluate and deploy talent across our global business. Technology-Enhanced Assessment of Talent highlights the science behind these technologies, as well as cutting-edge solutions shown to be effective in running the talent side of business." —David A. Rodriguez, Ph.D., executive vice president, Global Human Resources, Marriott International, Inc. The Jossey-Bass SIOP Professional Practice Series was launched in 1988 to provide I-O psychologists, organizational scientists and practitioners, human resources professionals, managers, executives and those interested in organizational behavior and performance with volumes that are insightful, current, informative and relevant to organizational practice. The volumes seek to inform those interested in practice with guidance, insights and advice on how to apply the concepts, findings, methods, and tools derived from industrial and organizational psychology to solve human-related organizational problems.

This book provides a history of the origins of industrial-organizational (I-O) psychology, focusing on the late nineteenth century and early twentieth centuries. Taking an international perspective, The Early Years of Industrial-Organizational Psychology examines the context in which the field emerged, and its origins in the measurement of individual differences. Andrew J. Vinchur covers the initial applications of psychology in advertising, the study of fatigue, and especially employee selection, as well as the role industrial psychology played in World War I and the post-war expansion of the field. He also examines the education of industrial psychologists, their efforts to establish industrial psychology as a profession, and the beginnings of the organizational side of the field.

In one volume, the leading researchers in industrial/organizational assessment interpret the range of issues related to industrial/organizational tests, including test development and psychometrics, clinical applications, ethical and legal concerns, use with diverse populations, computerization, and the latest research. Clinicians and researchers who use these instruments will find this volume invaluable, as it contains the most comprehensive and up-to-date information available on this important aspect of practice.

Introduce future and current practitioners to the technical challenges, most recent research and today's most popular selection tools with Gatewood/Field/Barrick's HUMAN RESOURCE SELECTION, 7E. This book's advanced coverage details the development and implementation of effective selection programs within today's organizations. A streamlined, yet thorough, approach and numerous current examples focus on today's most important legal, global and ethical concerns; psychometric measurement concepts; job analysis; predictors of job performance; and criteria measures. A new chapter on HR recruitment and new coverage of staffing versus selection, external versus internal job candidates, and self-presentation beyond the structured interview equips readers for success in HR selection today.
