*This complete guide to LEGO® Therapy contains everything you need to know in order to set up and run a LEGO® Club for children with autism spectrum disorders or related social communication difficulties and anxiety conditions. By providing a joint interest and goal, LEGO® building can become a medium for social development such as sharing, turn-taking, making eye-contact, and following social rules. This book outlines the theory and research base of the approach and gives advice on all practical considerations including space, the physical layout of the room and choosing and maintaining materials, as well as strategies for managing behaviour, further skill development, and how to assess progress. Written by the pioneer of the approach alongside those who helped form it through their research and evaluation, this evidence-based manual is essential reading for professionals working with autism who are interested in running a LEGO® Club or learning more about the therapy.*

**"As a budding spy, what better way to conceal your clandestine activities than to miniaturize your secret agent arsenal? Hide a mini catapult in a breath mint tin. Turn a Tic Tac case into vest-pocket candy shooter. Or transform a milk jug cap onto a fake wristwatch that launches tiny paper darts. Toy designer and author John Austin provides detailed, step-by-step instructions with diagrams to show James Bondiacs how to build 35 different spy weapons and surveillance tools.All of the projects in MiniWeapons of Mass Destruction 2 are built from common household items-binder clips, playing cards, rubber bands, markers, clothespins, paper clips, and discarded packaging—clearly detailed on materials lists. In addition to movie-inspired sidearms and other "weapons," you'll find plans to construct periscopes, bionic ears, grappling hooks, and decipher pens. Once you have assembled your arsenal, the author provides a number of ideas on how to hide your stash—inside a deck of cards, a false-bottom soda bottle, or a cereal box briefcase—and targets for practicing your spycraft, including a flip-down firing range, a fake security camera, and sharks with laser beams. And if you think yourself more of an evil-genius in training, this book also has projects to keep you busy while you finish planning your volcano lair—a Q-pick blow gun, a paper throwing star, a bowler hat launcher, and more. Fluffy Persian cat not included"---Provided by publisher.**

**A classic reissued for a new generation Andrew Henry has two younger brothers, who are always together, and two older sisters, who are always together. But Andrew Henry is in the middle—and he's always with himself. He doesn't mind this very much, because he's an inventor. But when Andrew Henry's family doesn't appreciate him or his inventions, he decides it's time to run away. Many children in the neighborhood feel the same way and follow him to his meadow, where he builds each of his friends a unique house of their very own. But in town the families miss their children and do everything they can to find them. And the kids realize that it feels a little lonely out in the meadow without their parents. Just as relevant today as it was in 1967, this is a heart-warming story about children who want to feel special and appreciated for who they are. With a new jacket and expanded trim size, Andrew Henry is ready to enchant the next generation of kids.**
