Bullying has long been tolerated as a rite of passage among children and adolescents. There is an implication that individuals who are bullied must have "asked for" this type of treatment, or deserved it. Sometimes, even the child who is bullied begins to internalize this idea. For many years, there has been a general acceptance and collective shrug when it comes to a child or adolescent with greater social capital or power pushing around a child perceived as subordinate. But bullying is not developmentally appropriate: it should not be considered a normal part of growing up. Bullying behavior endures through generations, the milieu is changing. Historically, bulling has occurred at school, the physical setting in which most of childhood is centered and the primary source for peer group formation. In recent years, however, the physical setting is not the only place bullying is occurring. Technology allows for an entirely new type of digital electronic aggression, cyberbullying, which takes place through chat rooms, instant messaging, social media, and other forms of digital electronic communication. Composition of peer groups, shifting of social contexts that must be considered to understand and effectively react to bullying in the United States. Youth are embedded in multiple contexts and each of these contexts interacts with individual characteristics of youth in ways that either exacerbate or attenuate the association between these individual characteristics and bullying perpetration or victimization. Recognizing that bullying behavior is a major public health problem that demands the concerted and coordinated time and attention of parents, educators and school administrators, health care providers, and the legal system, this report evaluates the state of the science on biological and psychosocial consequences of peer victimization and the risk and protective factors that either increase or decrease peer victimization behavior and consequences.

The Covid-19 pandemic has changed our activities, like teaching, researching, and socializing. We are confused because we haven't experienced before. However, as Earth's smartest inhabitants, we can adapt new ways to survive the pandemic without losing enthusiasm. Therefore, even in pandemic conditions, we can still have scientific discussions, even virtually. The main theme of this symposium is "Reinforcement of the Sustainable Development Goals Post Pandemic" as a part of the masterplan of United Nations for sustainable development goals in 2030. This symposium is attended by 348 presenters from Indonesia, Malaysia, UK, Scotland, Thailand, Taiwan, Tanzania and Timor Leste which published 202 papers. Furthermore, we are delighted to introduce the proceedings of the 2nd Borobudur Symposium Borobudur on Humanities and Social Sciences 2020 (2nd BIS-HSS 2020). We hope our later discussion may result transfer of experiences and research findings from participants to others and from keynote speakers to participants. Also, we hope this event can create further research network.

Assigned to a quiet corner of Ireland's most remote county, Martin Ridge was heading for retirement after a long career with An Garda Síochána, the Irish police force. All that changed when a call from a local priest set in motion what would become the most horrific sex abuse investigation the island had ever known. At Christmas 1997 a local priest Fr Eugene Greene reported to the Gardaí that a man had tried to blackmail him. This call, an act of hubris, set in motion a Garda investigation that revealed him to be a serial abuser of children. As word of the investigation spread, 26 men came forward. Most were from the tiny Irish-speaking parish of Gort an Choirce. All had been abused by Greene as children. Soon after, another man came forward to say that he had been sexually abused by a local schoolteacher, Denis McGinley. As Ridge dug deeper, he discovered that McGinley had been systematically abusing children in his classroom for decades. He had at least 50 victims. The Greene and McGinley cases both involved the Catholic Church. Greene was a priest, and McGinley a teacher in a Catholic school answerable to religious managers. As Ridge investigated, he discovered that the Church knew about the abuse, but ignored the problem. Brilliantly written and unsparring in its fidelity to the truth, *Breaking the Silence* is more than an account of a police investigation: it 's the story of an entire community 's struggle to come to terms with its betrayal by those in whom it placed the most trust.

This broad and thought-provoking volume provides an overview of recent intellectual and scientific advances that intersect psychiatry and neuroscience, offering a wide range of penetrating insights in both disciplines. The fourth volume on the topic in the last several years from a varying panel of international experts identifies the borders, trends and implications in both fields today and goes beyond that into related disciplines to seek out connections and influences. Similar to its predecessors, this volume offers a range of interesting topics in the main disciplines – psychiatry and neuroscience – and attempts to provide deeper comprehension or explication of the normal and diseased human mind, its biological correlates and its biographical and existential implications. This engaging volume continues the previous style of exploring different disciplines and trying to integrate disciplinary evidence from varying points of view in an organic manner. The first section is about epistemological considerations, including, for example, the topic of phenomenological psychopathology and phenomenological psychiatry in relation to schizophrenia and substance misuse, among other topics. Section 2 addresses issues around the translation of basic neuroscience to expression in the human brain and behavioral implications. Section 3 discusses the issues of learning, teaching and the role of social environment in the field of neuroscience. Finally section 4 reviews various perspectives on explaining the nature of bullying.

Why do we say we have zero tolerance for bullying, but adult society is rife with it and it is an epidemic among children? Because the injuries that all forms of bullying and abuse do to brains are invisible. We ignore them, fail to heal them, and they become cyclical and systemic. Bullying and abuse are at the source of much misery in our lives. Because we are not taught about our brains, let alone how much they are impacted by bullying and abuse, we do not have a way to avoid this misery, heal our scars, or restore our health. In *The Bullied Brain* readers learn about the evidence doctors, psychiatrists, neuropsychologists and neuroscientists have gathered, that shows the harm done by bullying and abuse to your brain, and how you can be empowered to protect yourself and all others. Not only is it critically important to discover how much your mental health is contingent on what has sculpted and shaped the world inside your head, it is also the first step in learning ways to recover. While your brain is vulnerable to bullying and abuse, it is at the same time remarkably adept at repairing all kinds of traumas and injuries. The first part of *The Bullied Brain* outlines what the research shows bullying and abuse do to your brain. The second part of the book, *"The Stronger Brain"* provides case studies of adults and children who have undergone focused training to heal their neurological scars and restore their health. These accessible and practical lessons can be integrated into your life. Strengthening your brain acts as an effective antidote to the bullying and abuse that are rampant in society. Foreword by Dr. Michael Merzenich, "the father of neuroplasticity," and he also contributes his knowledge, insights, and research in *The Bullied Brain* to help show you how to empower your brain to fulfill its power and potential.

The self-descriptive title, A Universal Template For Research Position and Life Experience Papers, implies that there is a position that writers take in even the simplest of essays. As such, Template provides an opportunity to accomplish two tasks at once: consider the definitive differences between Research, Position, and Experience papers, and explore the issues that impound and empower contemporary urban education. Dale Benjamin Drakeford provides an interactive workshop to guide student writing on any social science subject. Agreeing with many scholars that public and free pedagogy is indispensable, the author also argues that there is no wrong or right in scholastic debate, only correct presentation of objective thoughts or non-objective attitudes. This the author says, is what is sometimes forgotten in the heat of getting ideas on paper. Hence, Template provides structure for planning papers, and in-process cues for staying on task to complete them with proper formality.

This book looks at innovative tools developed by Japanese and Korean researchers and practitioners to tackle cyberbullying and internet-related problems (addiction, cybercrimes, etc.). The contributors have created preventative and intervention measures for children using games, apps, manga and anime videos, which are more accessible for children than textbooks or classroom-based lessons. The contributors cover their experiences of developing these new approaches with children, parents and teachers as well as giving insights and evidence into how these innovative techniques and methods work. By sharing their expertise, the authors hope to contribute to further improvements of games, apps, manga and anime and to improve the safety of children online.
