*The Vikings maintain their grip on our imagination, but their image is too often distorted by myth. It is true that they pillaged, looted, and enslaved. But they also settled peacefully and traveled far from their homelands in swift and sturdy ships to explore. The Age of the Vikings tells the full story of this exciting period in history. Drawing on a wealth of written, visual, and archaeological evidence, Anders Winroth captures the innovation and pure daring of the Vikings without glossing over their destructive heritage. He not only explains the Viking attacks, but also looks at Viking endeavors in commerce, politics, discovery, and colonization, and reveals how Viking arts, literature, and religious thought evolved in ways unequalled in the rest of Europe. A newly discovered material rewrites early Danish Viking history. In 2014 a 11-year-old girl, Maja Sielski, and her younger sister Julia, made a sensational discovery among their deceased grandmother's belongings. They found a small golden plate with a Latin script telling the story of the legendary Viking king Harald Bluetooth. It soon turned out that the golden plate was once placed in the king's tomb and this tomb contained world's largest known golden treasure of Viking-era. ecclesiae pontificum" from the 990s has also been found. The manuscript was written by the king's own priest Avico, probably in an attempt to canonize the king after his death in year 985. Avico has been in the service of the king since the 950s. His extensive account gives a remarkable and dramatic picture of the Viking age Scandinavia during the 10th century. Here is a story of the struggle for power and the foundation of the future dynasties in Denmark, Sweden and Norway as well as Viking raids in Ireland and England. The account also tells of the founding of the legendary Viking fortress of Jomsborg and the fortress's powerful mercenaries. The book describes in detail these unique facts, but it also

The Curmsun Disc The Curmsun Disc is a concave gold disc of a weight of 25.23 grams (0.890 oz) and a diameter of 4.5 centimetres (1.8 in). The Danish Viking king Harald Bluetooth and the name of the stronghold of Jomsborg is mentioned in the latin inscription on the disc. The disc was reportedly found as part of a Viking Age hoard discovered in 1841 in the cellar crypt of the ruined chapel at Groß-Weckow village in Pomerania. This location is just east of the bank of the river Dievenow and near the place where the semi-legendary Viking stronghold of Jomsborg stood between the 960's and 1043. According
