The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

The Garland Handbook of African Music is comprised of essays from The Garland Encyclopedia of World Music: Volume 1, Africa, (1997). Revised and updated, the essays offer detailed, regional studies of the different musical cultures of Africa and examine the

ways in which music helps to define the identity of this particular area. Part One provides an in-depth introduction to Africa. Part Two focuses on issues and processes, such as notation and oral tradition, dance in communal life, and intellectual property. Part Three focuses on the different regions, countries, and cultures of Africa with selected regional case studies. The second edition has been expanded to include exciting new scholarship that has been conducted since the first edition was published. Questions for Critical Thinking at the end of each major section guide and focus attention on what musical and cultural issues arise when one studies the music of Africa -- issues that might not occur in the study of other musics of the world. An accompanying audio compact disc offers musical examples of some of the music of Africa.

Act 4 of 2000

Combines verses from the gospels of Matthew, Luke, and John to tell the Easter story from Jesus' triumphant entry into Jerusalem through his resurrection.

Explores the universal yearning for love and romance.

A Xhosa prince reluctantly leaves the University College of Fort Hate and goes back to the land of his ancestors to take his place as king of the Mpondomise. The clash of his modern ideas and the traditional beliefs of his people mirrors the dash of the western way of life with African custom and tradition -- church-people versus traditionalists, school people versus 'red-ochre people', boarding school activities versus the inkundla or

assembly at the royal place. The conclusion, that disaster can be averted only by the willingness of opposing forces to work together for mutual comprehension of the legitimate claims of tradition and modernity, gives a foretaste of the spirit that governed modern South Africa's political transformation. Ingqumbo Yeminyanya -- The Wrath of the Ancestors -- is a classic of Xhosa literature. A C Jordan has a keen eye for detail, a delightful sense of humour and a dramatic style. Literal translations of Xhosa images, idioms and proverbs transport readers to the Tsolo district and conjure up the memorable speeches of the Mpondomise counsellors.

This book presents a comprehensive, systematic approach to the development of learning strategies.

This book broadens the scope of the subject of rural education and enlivens the ways in which the subject may be studied.

Through textual and visual analysis of a range of sources – including young adult novels, the farming simulation game ‘ Hay Day ’ and reality television programs – the contributors investigate how the lives of young people in rural spaces are mediated by a range of social locations including class, ethnicity and sexuality. Additionally, through rich and detailed ethnographic work, the book explores the complicated and multifaceted meanings of rural places and examines how these meanings shape experiences of schooling for teachers and students. In doing so, the book embeds the study of rural education in explorations of patrilineal inheritance on family farms, international migration, globalisation and economic restructuring. It aims to start a conversation about the robust and complex ways in which the confluence between ‘ rural ’ and ‘ education ’ may be imagined, experienced and researched. This book was originally published as a special issue of Discourse: Studies in the Cultural Politics of Education.
