It examines opportunities for establishing a policy framework for the development and implementation of mobile-communication-based cooperative intelligent transport systems (C-ITS) using connected vehicle-to-vehicle and vehicle-to-road infrastructure technologies. Some C-ITS applications identified and relevant to the People's Republic of China are cooperative hazard warning systems and enhanced driver awareness and control. Government and industry—particularly the automobile industry—are the key stakeholders to realizing the deployment of C-ITS.***

**book explore both the theories and applications of crowdsourcing for geographic knowledge production with three sections focusing on 1). VGI, Public Participation, and Citizen Science; 2). Geographic Knowledge Production and Place Inference; and 3). Emerging Applications and New Challenges. This book argues that future progress in VGI research depends in large part on building strong linkages with diverse geographic scholarship. Contributors of this volume situate VGI research in geography's core concerns with space and place, and offer several ways of addressing persistent challenges of quality assurance in VGI. This book positions VGI as part of a shift toward hybrid epistemologies, and potentially a fourth paradigm of data-intensive inquiry across the sciences. It also considers the implications of VGI and the exaflood for further time-space compression and new forms, degrees of digital inequality, the renewed importance of geography, and the role of crowdsourcing for geographic knowledge production.**

The Istanbul Travel Guide 2022 is the most up-to-date, reliable and complete guide to this magical city. Travelers will find everything they need for an unforgettable visit presented in a convenient and easy-to-use format. Includes quick information on planning a visit, navigating the city, experiencing Turkish culture and exploring the beauty of Istanbul. Includes a Turkish phrasebook! Istanbul is a major city in Turkey that straddles Europe and Asia across the Bosphorus Strait. Its Old City reflects cultural influences of the many empires that once ruled here. In the Sultanahmet district, the open-air, Roman-era Hippodrome was for centuries the site of chariot races, and Egyptian obelisks also remain. The iconic Byzantine Hagia Sophia features a soaring 6th-century dome and rare Christian mosaics. In today's fast growing digital world, the web, mobile, social networks and other digital platforms are producing enormous amounts of data that hold intelligence and valuable information. Correctly used it has the power to create sustainable value in different forms for businesses. The commonly used term for this data is Big Data, which includes structured, unstructured and hybrid structured data. However, Big Data is of limited value unless insightful information can be extracted from the sources of data. The solution is Big Data analytics,

and how managers and executives can capture value from this vast resource of information and insights. This book develops a simple framework and a non-technical approach to help the reader understand, digest and analyze data, and produce meaningful analytics to make informed decisions. It will support value creation within businesses, from customer care to product innovation, from sales and marketing to operational performance. The authors provide multiple case studies on global industries and business units, chapter summaries and discussion questions for the reader to consider and explore. Big Data for Managers also presents small cases and challenges for the reader to work on – making this a thorough and practical guide for students and managers.

A critical analysis of public policy decisions requires a greater depth of knowledge than can be received from news reports and political speeches. Issues such as how best to reduce traffic congestion, reduce acid rain, improve airline safety or develop a parcel of land are better understood by organizing, measuring and weighing the effects of alternative policies. The Economic Analysis of Public Policy, now in its second edition, is the ideal

introduction to benefit-cost analysis, the economics of efficiency, risk analysis and present value, and is suitable for those with only a modest background in mathematics and economics. This brand new edition of the book has been rigorously updated throughout in terms of examples and data references, issues covered, and layout and pedagogical features. Key concepts are reinforced through multiple problems and discussion questions within each chapter. This latest edition contains extra material on loss aversion, global warming, technology, and US health care reform, as well as a wider range of international examples. Extra tables have been included in order to clarify more complicated issues. Instructors will also benefit from the new companion website, which will offer power point presentations, answers to end of chapter questions, and a test bank. This textbook encourages its readers to understand and apply key concepts whilst also learning to appreciate policy analysis as part of an interdisciplinary, analytical, and political process that can lead to better government policy decisions. It is an ideal teaching tool for undergraduate and postgraduate students engaged in Public Administration, Public Economics, and Public Policy. The four-volume set LNCS 8517, 8518, 8519 and 8520 constitutes the proceedings of the Third International Conference on Design, User Experience and Usability, DUXU 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCI 2014, held in Heraklion, Crete, Greece in June 2014, jointly

with 13 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCI 2014 conferences were carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 256 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in the four-volume set. The 66 papers included in this volume are organized in topical sections on design theories, methods and tools; user experience evaluation; heuristic evaluation; media and design; design and creativity.

With hundreds of full-color photographs, hand-drawn illustrations, and custom maps that illuminate every page, DK Eyewitness Travel Guide Istanbul truly shows you this city as no one else can. In recent years, the increasing number of tourists traveling to specific urban and resort destinations has caused challenges for the effective management of tourism in these areas, with a resulting negative impact on tourism cities, and host communities. Such issues have included placing undue pressure on infrastructure; destruction of the physical, economic, and socio-cultural environment; and affecting the quality of residents' daily lives by impacting their mobility and, in some cases, the price and rent of resident accommodation, goods, and services. To achieve a certain level of balance between the interests of local residents and visitors, new regulatory measures and legislation in high tourism areas must be discussed. The Handbook of Research on the Impacts, Challenges, and Policy Responses to Overtourism is a collection of innovative research on best practices and legislative solutions for the management of tourism destinations suffering from overtourism, tourismophobia, or antitourism movement issues. While highlighting topics including overcrowding, social displacement, and tourism management, this book is ideally designed for local government officials, policymakers, lawmakers,

researchers, entrepreneurs, industry professionals, travel agencies, hotels, academicians, and students seeking current innovative empirical research on destination-management practices and application techniques.
