

## Top 100 Punjabi Songs Best And Latest Punjabi Songs

This book is not intended to provide a list of the 100 'best' books ever written and published by Punjabi authors. Given the sheer range of books written by Punjabi authors and the unpredictability of individual taste, any such definitive list is quite impossible. Secondly, the choice has been restricted to books that were written by them either in Punjabi, Hindi or Urdu but have been translated into English. Thus, personal choice restricted by availability has dictated this selection. The choice of books includes autobiographies, novels, short stories, poems, and plays. Research books, religious books, and books written originally in English have not been included. From the Introduction I am amazed at the scholarship, the passion and the love with which Paramjeet Singh has written this book. It will be a reference volume for all times. Nirupama Dutt Poet, Journalist & Translator Mr. Singh's effort is commendable as he is making available some of the rarest of gems of Punjabi literature to the non-Punjabi readers. I congratulate Mr. Singh on putting together this selection and hope that non-Punjabi readers of this book would find new horizons of cultural experience opening up before them. Of course, for Punjabi readers, it may be yet another opportunity to experience a sense of genuine pride in their rich legacy of language, literature and culture. . Prof. Rana Nayar

From the physician behind the wildly popular NutritionFacts website, How Not to Die reveals the groundbreaking scientific evidence behind the only diet that can prevent and reverse many of the causes of disease-related death. The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In How Not to Die, Dr. Michael Greger, the internationally-renowned nutrition expert, physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America-heart disease, various cancers, diabetes, Parkinson's, high blood pressure, and more-and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn't have to be the case. By following Dr. Greger's advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug-and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation. Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to prevent the disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, How Not to Die includes Dr. Greger's Daily Dozen -a checklist of the twelve foods we should consume every day.Full of practical, actionable advice and surprising, cutting edge nutritional science, these doctor's orders are just what we need to live longer, healthier lives.

At the age of 81, after a lifetime of making his body, mind, and heart stronger, Fauja decided to run his first marathon.
