

Tortured Abused And Neglected By Britain S Most Sadistic Mum This Is My Story Of Survival

Novelist Grace Morgan must decide if her vigilante quest to stop animal abusers is getting out of control. Desperate to put an end to the pitiful sounds of the helpless animals she hears in her head, Grace is getting more emotionally unstable. Her Christianity is in conflict with the revenge she takes, but she feels this is the only justice the abusers are going to receive. Jack Adams, who owns a private investigation company, is a friend of Grace who helps her to get the abusers. In the beginning, he helped only when she got in too deep but now he does it to be close to her. The most recent case they are working on is about a particularly violent abuser, Michael Jacobs. He tortured and killed his girlfriend's little dog Papper. He spent a year in jail for that crime but Grace doesn't believe it was adequate punishment. Grace lives in an old asylum she bought and fixed up in which there is a treatment room in the basement that is used to punish the abuser; to do to them what they did to their victims. They also tattoo their crime on their forehead. After Grace's mother died, she found two boxes of notes her father had made before he died 17 years ago in a car accident. Now Grace thinks his death may not have been an accident. With the help of a reporter, a cop, and a tattooist, Grace and her friends try to put the pieces and scraps of information her father left to take down a Nazi scientist, a gunrunner and his psycho girlfriend whose dad is a hit-man.

Saving Graves is dedicated to protecting human burial sites from disturbance from humans or nature. The organization has offices in Norcross, Georgia, and Manchester, England. Saving Graves promotes the protection, restoration, and preservation of historic cemeteries worldwide.

The Birth of Language tackles one of the most difficult topics known to mankind, the origin of language. Kim shares his experiences of learning English as a second language after moving to the United States as a teenager. He then discusses Noam Chomsky's theories on language. Through a groundbreaking idea, Kim gives readers a demonstration of a method for potentially unifying all human languages, giving substantial support to Chomsky's theory of universal grammar (UG). Written for the general public and young readers, The Birth of Language is a must-read for people looking for the next big intellectual discovery.

A heart-rendering but uplifting story of the human spirit's ability to prevail. From the day he is five-years-old and dropped off at his foster home of the next eleven years, Stephen is mentally and physically tortured. No one in the system can help him. No one can tell him if he has a family. No one can tell him why, with obvious African-American features, he has the last name of Klakowicz. Along the way, a single faint light comes only from a neighbor's small acts of kindness and caring—and a box of books. From one of those books he learns that he has to fight in any way he can—for victory is in the battle. His victory is to excel in school.

Against all odds, the author succeeded. He attended college, graduated, became a successful corporate executive, and married a wonderful woman with whom he established a loving family of his own. Through it, he dug voraciously through records and files and found his history, his birth family—and the ultimate disappointment as some family members embrace him, but others reject him. Readers won't be the same after reading this powerful story. They will share in the hurts and despair but also in the triumph against daunting obstacles. They will share in this story with their family, with their friends, with their neighbors.

This book chronicles the unforgettable account of one of the most severe child abuse cases in California history. It is the story of Dave Pelzer, who was brutally beaten and starved by his emotionally unstable, alcoholic mother: a mother who played tortuous, unpredictable games—games that left him nearly dead. He had to learn how to play his mother's games in order to survive because she no longer considered him a son, but a slave; and no longer a boy, but an "It." Dave's bed was an old army cot in the basement, and his clothes were torn and raucy. When his mother allowed him the luxury of food, it was nothing more than spoiled scraps that even the dogs refused to eat. The outside world knew nothing of his living nightmare. He had nothing or no one to turn to, but his dreams kept him alive—dreams of someone taking care of him, loving him and calling him their son.

Great art comes from great pain. Or that's the impression left by these haunting profiles. Pieced together, they form a revealing mosaic of the creative mind. It's like viewing an exhibit from the therapist's couch as each entry delves into the mental anguish that afflicts the artist and affects their art. The scope of the artists covered is as varied as their afflictions. Inside, you will find not just the creators of the darkest of dark literature, music, and art. While it does reveal what everyday problem kept Poe's pen to paper and the great writers that kept Picasso on edge, it also uncovers surprising secrets of more unexpectedly tormented artists. From Charles Schulz's unrequited love to J.K. Rowling's fear of death, it's amazing the deep-seeded troubles that lie just beneath the surface of our favorite art. As much an appreciation of artistic genius as an accessible study of the creative psyche, Tortured Artists illustrates the fact that inner turmoil fuels the finest work.

Roger Dean Kiser, Sr., was raised by the Children's Home Society, a Florida orphanage, and then was passed on to the Florida School for Boys at Marianna. The dramatic true account of the abuse he suffered under the care of professionals will change how people view the juvenile justice system. His childhood was filled with a mixture of physical, mental, and sexual abuse that would have left a lesser man wishing for death, yet Kiser is grateful for simply being alive. This poignant moving story is true, sharp, and motivational and it will deeply affect the hearts and minds of all who read it. Chronicling his life through the eyes of the child he once was, Roger Dean Kiser takes readers on an unforgettable journey as he recounts his childhood with a wide-eyed innocence that illustrates the resiliency of the human spirit.

In April 2007, 62-year-old Eunice Spry was sentenced to 14 years in prison for the systematic wounding, cruelty and assault of the vulnerable children whose welfare had been entrusted to her. Her Gloucestershire home should have been a refuge. Instead it became a prison where, over the course of 20 years, her charges were routinely abused and tortured. To the outside world, Jehovah's Witness Spry presented herself as a pillar of the community. Behind closed doors she was a sadistic tyrant who beat the children with metal bars, forced wooden sticks down their throats and made them eat lard, bleach, vomit and faeces. The details of the trial horrified the nation, and attracted considerable press attention. Now, for the first time, one of the victims - known in the case as 'Child C' and now 19 years old - tells the full, shocking story of what went on in Eunice Spry's house of evil. Child C is a gripping, heartbreaking story of enforced isolation, psychological and physical abuse and a childhood denied. Despite all he has been through, Christopher Spry is a survivor with a zest for life. With his former foster mother in prison, he can finally tell the story of his suffering and what it is like to grow up brutalised and abandoned with no one to hear your plight.

The landmark history of France and French culture in the eighteenth-century, a winner of the Los Angeles Times Book Prize When the apprentices of a Paris printing shop in the 1730s held a series of mock trials and then hanged all the cats they could lay their hands on, why did they find it so hilariously funny that they choked with laughter when they reenacted it in pantomime some twenty times? Why in the eighteenth-century version of Little Red Riding Hood did the wolf eat the child at the end? What did the anonymous townsman of Montpellier have in mind when he kept an exhaustive dossier on all the activities of his native city? These are some of the provocative questions the distinguished Harvard historian Robert Darnton answers The Great Cat Massacre, a kaleidoscopic view of European culture during in what we like to call "The Age of Enlightenment." A classic of European history, it is an essential starting point for understanding Enlightenment France.

As a child, Victoria Spry was brutally beaten, neglected and starved by the woman she called Mummy. To the outside world Eunice Spry was a devoted parent, but behind closed doors she was an evil tyrant. Instead of protecting, loving and caring for Victoria, she forced bleach and urine down her throat, knocked out her teeth, tied her up naked and made her live in squalor. It took eighteen years of heartache and despair before she found the courage to expose her mum. Tortured is Victoria's gripping story of survival. Presents the proceedings of the Nov. 1996 hearing before the Committee on Labor and Human Resources, U.S. Senate, which explored how the well-being of abused and neglected children can be improved through clarifying the reasonable efforts requirement of the Adoption Assistance and Child Welfare Act to make the child's health and safety the primary concern. Testimony and statements are included from Mike DeWine, U.S. Senator from Ohio; Olivia Golden, Acting Assistant Secretary for Children and Families, U.S. Dept. of Health and Human Services; and representatives from other child and family service organizations.

The dentist or related professional who treats children has a moral and legal obligation to diagnose correctly suspected maltreatment and to report it to the proper authorities. These obligations may bring the doctor into contact with the child protection system as well as the courts. The practitioner needs to be prepared for court testimony, and a foundation of knowledge about child maltreatment is essential. This book provides unparalleled images to assist the physician and dentist in recognizing, diagnosing, and reporting child abuse and neglect. Written by and for professionals in disciplines ranging from general and child abuse pediatrics, to surgery, emergency medicine, pathology, dentistry, nursing and social work, the book reflects current, and increasing, knowledge in this field. The authors stress throughout the importance of including a broad and representative range of possibilities in their differential diagnoses so that a non-inflicted condition is not labeled child abuse, and an inflicted injury cannot be mistaken for a more innocent condition.

My Journey from Abuse and Madness to Surviving and Thriving

When Nancy Kilgore was nine years old, her eleven-year-old sister Sherry led her into the scorching midday sun, tied her to a chair, and taped her eyelids to her eyebrows with electrical tape, leaving Nancy helpless for hours to stare into a blinding blue sky. For years, Sherry physically tortured her younger sister and threatened to kill her if the cruelty was revealed. Each time Nancy walked into her own bedroom she would have to repeat self-deprecating passwords: "I am ugly and stupid." "I am ugly, stupid, and no one loves me." "Please may I come in?" Girl in the Water details the most shattering examples of sibling abuse, the untold secret in millions of homes. Each year, 19 million children are abused by their siblings and well over 80 million adults have suffered this type of abuse. With vivid imagery and heartbreaking accounts, Kilgore leads readers on a journey into the prison she was born into, where she is confronted with her childhood dreams, family bonds, coming of age in the shadow of terror, and the complex after-effects of bullying and sibling abuse that followed her into adulthood. Struggling to piece together her haunted past before it consumed her, Kilgore shares her inspiring metamorphosis and victorious battle from a fragile, shattered survivor to that of an eventual speaker and activist. Girl in the Water is the story of one woman, with a phoenix-like power, who came up against all odds and won. Her story will resonate with millions of adult sibling-abuse survivors who have never felt free to tell their stories . . . until now.

Derived from the renowned multi-volume International Encyclopedia of Laws, this convenient volume provides comprehensive analysis of the law affecting the physician-patient relationship in Austria. Cutting across the traditional compartments with which lawyers are familiar, medical law is concerned with issues arising from this relationship, and not with the many wider juridical relations involved in the broader field of health care law. After a general introduction, the book systematically describes law related to the medical profession, proceeding from training, licensing, and other aspects of access to the profession, through disciplinary and professional liability and medical ethics considerations and quality assurance, to such aspects of the physician-patient relationship as rights and duties of physicians and patients, consent, privacy, and access to medical records. Also covered are specific issues such as organ transplants, human medical research, abortion, and euthanasia, as well as matters dealing with the physician in relation to other health care providers, health care insurance, and the health care system. Succinct and practical, this book will prove to be of great value to professional organizations of physicians, nurses, hospitals, and relevant government agencies. Lawyers representing parties with interests in Austria will also find this very useful guide, and academics and researchers will appreciate its comparative value as a contribution to the study of medical law in the international context.

"The day I disappeared in 2002, not many people even seemed to notice. I was twenty-one, a young mom who stopped at a Family Dollar store one afternoon to ask for directions. For the next eleven years I was locked away in hell. That's the part of my story you may already know. There's a whole lot more that you don't." —from Finding Me Michelle Knight, the first of three women abducted by notorious Cleveland kidnapper Ariel Castro, recounts the full story of her years in captivity, her escape, and the powerful inner strength and capacity for hope that has helped her rebuild her life. Michelle was a young single mother fighting for custody of her young son when she was kidnapped on August 21, 2002, by a local school bus driver named Ariel Castro. For more than a decade afterward, she endured unimaginable torture at the hands of her abductor. In 2003 Amanda Berry joined her in captivity, followed by Gina DeJesus in 2004. Their escape on May 6, 2013, made headlines around the world. In Finding Me, Michelle reveals the heartbreaking details of her story, including the thoughts and prayers that helped her find courage to endure unimaginable circumstances and now build a life worth living. By sharing both her past and her efforts to create a future, Michelle becomes a voice for the voiceless and a powerful symbol of hope for the thousands of children and young adults who go missing every year. Now with additional material describing her second year of freedom

Scared Selfless

Now in paperback, a powerful and inspirational memoir of a shocking and improbable journey from torture to recovery. Michelle Stevens has a photo of the exact moment her childhood was stolen from her: She's only eight years old, posing for her mother's boyfriend, Gary Lundquist—an elementary school teacher, neighborhood stalwart, and brutal pedophile. Later that night, Gary locks Michelle in a cage, tortures her repeatedly, and uses her to quench his voracious and deviant sexual whims. Little does she know that this will become her new reality for the next six years. Stevens can also pinpoint the moment she reconstituted the splintered pieces of her life: She's in cap and gown, receiving her Ph.D. in psychology—and the university's award for best dissertation. The distance between these two points is the improbable journey from torture, loss, and mental illness to healing, recovery, and triumph that is Stevens's powerful memoir, Scared Selfless. In this harrowing tale, Stevens, who was inspired to help others heal by becoming a psychotherapist, sheds light on the all-too-real threat of child sexual abuse, its subsequent psychological effects, and the best methods for victims to overcome their ordeals and, ultimately, thrive. Scared Selfless is both an examination of the extraordinary feats of the mind that are possible in the face of horrific trauma and Stevens's courageous testament to their power.

The Sunday Times top ten bestseller... You're not going home. You're not going anywhere. You're mine now. Growing up in a deeply troubled family, 15-year-old Anna felt lost and alone in the world. So when a friendly taxi driver befriended her, Anna welcomed the attention, and agreed to go home with him to meet his family. She wouldn't escape for over a decade. Held captive by a sadistic paedophile, Anna was subjected to despicable levels of sexual abuse and torture. The unrelenting violence and degradation resulted in numerous miscarriages, and the birth of four babies... each one stolen away from Anna at birth. Her salvation arrived thirteen years too late, but despite her shattered mind and body, Anna finally managed to flee. This is her harrowing, yet uplifting, true story of survival.

"This, quite simply, is the most devastating and detailed investigation into a question that has remained a no-no in the current debate on American torture in George Bush's war on terror: the role of military physicians, nurses and other medical personnel. Dr. Miles writes in a white rage, with great justification—but he lets the facts tell the story."—Seymour M. Hersh "Steven Miles has written exactly the book we require on medical complicity in torture. His admirable combination of scholarship and moral passion does great service to the medical profession and to our country."—Robert Jay Lifton, author of The Nazi Doctors: Medical Killing and the Psychology of Genocide and Home from the War: Vietnam Veterans - Neither Victims nor Executioners
