Quality Management

The process of globalisation in world markets, and the growing number of enterprises competing with one another in terms of the products and services they offer, naturally leads to the improved efficiency of management systems. Efficiency is required in order for these

entities to maintain competitiveness. To assess the efficiency of their management systems, enterprises use quality cost calculation. This book fills the research gap concerned with the scientific study of the quality cost calculation, with regard to service companies. It offers the authors' concept of using the

companies. The book

consists of six chapters

that present both a

theoretical and an

empirical part. In the

theoretical part, the

following issues are

discussed: quality costs;

the evolution of quality
