Tourism Common Paper 2014

The Routledge Handbook of Tourism in AsiaRoutledge

Through expanded intelligence, the use of robotics has fundamentally transformed the business industry. Providing successful techniques in robotic design allows for increased autonomous mobility, which leads to a greater productivity and production level. Rapid Automation: Concepts, Methodologies, Tools, and Applications provides innovative insights into the state-of-the-art technologies in the design and development of robotics and their real-world applications in business processes. Highlighting a range of topics such as workflow automation tools, human-computer interaction, and swarm robotics, this multi-volume book is ideally designed for computer engineers, business managers, robotic developers, business and IT professionals, academicians, and researchers.

Though conflict is normal and can never fully be prevented in the international arena, such conflicts should not lead to loss of innocent life. Tourism can offer a bottom-up approach in the mediation process and contribute to the transformation of conflicts by allowing a way to contradict official barriers motivated by religious, political, or ethnic division. Tourism has both the means and the motivation to ensure the long-term success of prevention efforts. Role and Impact of Tourism in Peacebuilding and Conflict Transformation is an essential reference source that provides an approach to peace through tourism by presenting a theoretical framework of tourism dynamics in international relations, as well as a set of peacebuilding case studies that illustrate the role of tourism in violent or critical scenarios of conflict. Featuring research on topics such as cultural diversity, multicultural interaction, and international relations, this book is ideally designed for policymakers, government officials, international relations experts, academicians, students, and researchers.

Japan is embarked on a demographic transition without precedent in human history: the population is both declining and ageing rapidly. This raises important questions about the country's future economic geography, as public policies will need both to respond to these shifts and also to shape them.

Companies compete to gain public notoriety every day and use creativity and innovation to get ahead of their competition. In oversaturated industries, such as the tourism sector, smart strategies and global network capabilities must be adopted and improved in order to increase competitiveness. Multilevel Approach to Competitiveness in the Global Tourism Industry contains crucial reference material that discusses new intelligent practices to increase business competitiveness in the tourism sector. Featuring research on topics such as networking, artificial intelligence, and regional competitiveness, this book is ideally designed for program directors, event coordinators, tour developers, hotel managers, restaurateurs, travel agents, policymakers, academics, researchers, advanced students, entrepreneurs, government officials, and professionals in the tourism and hospitality industry.

Multilevel Approach to Competitiveness in the Global Tourism Industry

Slow Food began in the late 1980s as a response to the spread of fast food

establishments and as a larger statement against globalization and the perceived deterioration of modern life. Since then, slow practices have permeated into other areas, including cities and territories and travel and tourism. This book provides an in-depth examination of slow food, tourism and cities, demonstrating how these elements are intertwined with one other as part of the modern search for "the good life." Part 1 locates the slow concept within the larger social setting of modernity and investigates claims made by the slow movement, examining aesthetic and instrumental values inherent to it. Part 2 explores the practices and places of slow, containing both conceptual and empirical chapters in Italy, the birthplace of the movement. Part 3 provides a comparative perspective by examining the practices in Spain, the UK, Germany and Canada. Slow Tourism, Food and Cities offers key theoretical insights and alternative perspectives on the varying practices and meanings of slow from a cultural, sociological and ethical perspective. It is a valuable text for students and scholars of sociology, geography, urban studies, social movements, travel and tourism, and food studies.

This significant and timely volume focuses on the unique trajectory of tourism development in Japan, which has been characterized by an historical emphasis on promoting both domestic and international tourism to Japanese tourists, followed by the more recent policy of competing aggressively in the international incoming tourist market. Initial chapters present an overview of past and present tourism, including policy and research perspectives. Thematic perspectives on tourism and specific contexts and places in which tourism occurs are then examined. Strains of Japanese tourism such as sport, surf, forest, mountain, urban, tea, pilgrimage and even whaling heritage tourism are among those analyzed. The book also explores tourism's role in confronting difficult pasts and presents, and the challenges facing the development of tourism in contemporary Japan. A short postscript outlines some of the challenges and possible future directions tourism in Japan may take in light of the COVID-19 crisis. Written by a team of well-known editors and contributors, including academics from Japan, this volume will be of great interest to upper-students and researchers and academics in development studies, cultural studies, geography and tourism.

History shows that travellers sought to experience the unfamiliar and exotic cultures and traditions of Indigenous peoples, with early examples of Indigenous tourism in the United States, Canada, Scandinavia, Australia, New Zealand and countries throughout Asia and Latin America. Similarly, contemporary travellers demonstrate a desire to seek out opportunities to experience Indigenous peoples and their cultures. Thus, we are witnessing worldwide growth in the awareness of, and interest in, Indigenous cultures, traditions, histories and knowledges. Engagement in the tourism sector is regularly advocated for Indigenous peoples because of the socio-economic opportunities it provides; however, there are a range of cultural benefits

including the maintenance, rejuvenation and/or preservation of Indigenous cultures, knowledges and traditions for Indigenous peoples who choose tourism as a vehicle to showcase their cultures. Consequently, tourism is regularly acknowledged as a means for facilitating the sustainability of tangible and intangible Indigenous cultural heritage including languages, stories, art, dance, rituals and customs. Importantly, however, the history of Indigenous peoples' engagement in tourism has provided a range of examples of the threats to Indigenous culture that can accrue as a result of tourism (i.e., cultural degradation, commercialisation and commodification, authenticity and identity, among others). This book presents an exploration of the intersection between tourism and Indigenous culture. The chapters in this book were originally published as a special issue of the Journal of Heritage Tourism. Academically complex and challenging to apply, development and planning are increasingly relevant to the growing tourism industry. This collection contains critical studies on tourism development and planning, and calls for proactive, holistic and responsible thinking. It addresses conceptual and contemporary issues in development and planning research including political trust, innovation networks, sustainability, moral encounters, enclavisation and evolutionary economics. It argues that recognition of the contextual and historical dimensions around tourism development and planning is essential to help both researchers and practitioners better understand destination and place-based decision-making. In addition, it will lead to improvements in stakeholder relations, and explains how tourism best works with localities and localities with tourism. This book was originally published as a special issue of Tourism Geographies.

The application of linguistic optimization methods in the tourism, travel, and hospitality industry has improved customer service and business strategies within the field. It provides an opportunity for tourists to explore another culture, building tolerance and overall exposure to different ways of life. Innovative Perspectives on Tourism Discourse is a pivotal reference source for the latest research findings on the role of language and linguistics in the travel industry. Featuring extensive coverage on relevant areas such as intercultural communication, adventure travel, and tourism marketing, this publication is an ideal resource for linguists, managers, researchers, economists, and professionals interested in emerging developments in tourism and travel.

Challenges and Opportunities for Small Island Developing States

Tourism was booming until 2019 when the COVID-19 pandemic hit. Since

then, tourism and related industries have suffered from negative economic impacts. This book examines current challenges and opportunities in the tourism industry using case studies from different parts of the world. It also examines the challenges and obstacles faced by the tourism sector due to lack of environmental policies, high crime rates, and poverty.

This book outlines the status quo of worldwide wildlife tourism and its impacts on planning, management, knowledge, awareness, behaviour and attitudes related to wildlife encounters. It sets out to fill the considerable gaps in our knowledge on wildlife tourism, applied ecology, and environmental education, providing comprehensive information on and an interdisciplinary approach to effective management in wildlife tourism. Examining the intricacies, challenges, and lessons learned in a meaningful and rewarding tourism niche, this interdisciplinary book comprehensively examines the major potentials and controversies in the wildlife tourism industry. Pursuing an insightful, provocative and hands-on approach, it primarily addresses two questions: 'Can we reconcile the needs of the wildlife tourism industry, biodiversity conservation, ecological learning and animal ethics issues?' and 'What is the Future of the Wildlife Tourism Industry?'. Though primaril y intended as a research text, it also offers a valuable resource for a broad readership, which includes university and training students, researchers, scholars, tourism practitioners and professionals, planners and managers, as well as the staff of government agencies.

This book helps all those involved in international tourism develop the new skills, tools and investments required to protect irreplaceable global resources from the impacts of escalating tourism demand over the next 50 years. It documents how technology and the growing global middle class are driving a travel revolution which requires a new paradigm in managing tourism destinations. Travel and tourism supply chains and business models for hotels, tour operators, cruise lines, airlines and airports are analysed and environmental management techniques are proposed for each sector. A pragmatic set of solutions are offered to support the transition to lower impact tourism development worldwide. It recommends that decision makers assess the current and future value of natural, social, and cultural capital to guide investment in destinations and protect vital resources. Case studies illustrate why budgets to protect local destinations are consistently underestimated and offer guidance on new metrics. Innovative approaches are proposed to support the transition to green infrastructure, protect incomparable landscapes, and engage local people in the monitoring of vital indicators to protect local resources. It provides students, professionals, and policy makers with far-reaching recommendations for new educational programs, professional expertise, financing, and legal frameworks to lower tourism's rapidly escalating carbon impacts and protect the health and well-being of local populations, ecosystems, cultures, and monuments worldwide.

The papers in this volume study how all language levels are constantly

involved in promoting insignificant places as desirable tourist
destinations. Drawing on different communicative practices from
various cultures, the case studies show that language use and the
concept of the 'tourist gaze' are in a permanent strategic interplay.
Asia is regarded as the fastest growing area for international and
domestic tourism in the world today and over the next 20 years. Given
the economic, social and environmental importance of tourism in the
region, there is a need for a comprehensive and readable overview of
the critical debates and controversies in tourism in the region and
the major factors that are affecting tourism development both now and
in the foreseeable future. This Handbook provides a contemporary
survey of the region and its continued growth and development as a key
destination and generator of tourism, which is marked by a high
proportion of intra-regional travel. The book is divided into five
sections. This first section provides an introduction to the region
and context to the nationally focused chapters. The next three
sections are then broadly based on the three UNWTO Asian regions:
South-East Asia, South and Central Asia, and East and North-East Asia,
providing readers with a valuable snapshot of tourism at various
scales, and from various approaches and positions. The concluding
section considers future prospects for tourism in Asia. The handbook
is interdisciplinary in coverage and is also international in scope
through its authorship and content. It presents a range of
perspectives and understanding of the processes and forces that are
shaping tourism in this fascinating and dynamic region that is one of
the focal points of global tourism. This is essential reading for
students, researchers and academics interested in tourism in the
growth region of Asia now and in the future.

This book explores the distinct nuisances and obstacles that are brought on by the
tourism and travel industry within Caribbean small island developing countries (SIDS).
The author explores best practices and measures that can be used to overcome or
alleviate the hardship faced by the industry by giving voice to the nations that are often
overshadowed or restrained by their developed counterparts. This book reflects on and
assesses the transformative power that tourism has in Caribbean small island
developing states, while unearthing the threats that affect the longevity and economic
viability of the industry in general. It is an important and overdue text focusing on this
unique group of islands and will inform students and researchers on the struggles and
opportunities they face.
Islamic tourism is not purely motivated by religion; it also includes participants pursuing
similar leisure experiences to non-Muslims, within the parameters set by Islam.
Destinations are therefore not necessarily locations where Shari'a or full Islamic law is

enforced. Demand for Islamic tourism destinations is increasing as the Muslim population expands, with the market forecast to be worth around US$238 billion. This book explores the ever-widening gap between the religious, tourism, management and education sectors. It provides practical applications, models and illustrations of religious tourism and pilgrimage management from a variety of international perspectives, and introduces theories and models in an accessible structure. The book: - Includes a range of contemporary case studies of religious and pilgrimage activities. - Covers ancient, sacred and emerging tourist destinations. - Reviews new forms of pilgrimage, faith systems and quasi-religious activities. This book offers an engaging assessment of the linkages and interconnections between Muslim consumers and the places they visit. It provides an important analysis for researchers of religious tourism, pilgrimage and related subjects.

Tourism is an economic and social phenomenon that is centered on a tourist's experience and is dependent on the experiences that are co-created and provided to tourists. Tourism destination managers must understand what tourists perceive as engaging, intense, and memorable in order to remain successful. However, care must also be given to the residents' perception of local tourism development and how it impacts their community. This is a fundamental aspect for tourism development since host communities that support tourism development tend to be more hospitable with tourists, which influences their satisfaction and loyalty. Moreover, the interaction with residents of host communities is a crucial component of the quality of the tourist experience, contributing to the long-term success and sustainability of destinations. The The Handbook of Research on Resident and Tourist Perspectives on Travel Destinations is a collection of innovative research that examines travel destinations from the resident and tourist perspectives in order to better support and inform the tourism development process and to make the destinations attractive to visitors while at the same time contributing to resident quality of life and happiness. While highlighting topics including sustainable development, hotel management, and customer satisfaction, this book is ideally designed for government officials, tour developers, travel agencies, brand managers, advertising agencies, restaurateurs, public administrators, hotel managers, tourist industry professionals, academicians, researchers, and students.

These proceedings represent the work of researchers participating in the International Conference on Tourism Research (ICTR 2018) which is being hosted by JAMK University of Applied Sciences, Jyväskylä, Finland on 23-24 March 2018.

The papers presented in this volume advance the state-of-the-art research on big data and analytics, social media, electronic marketing, mobile computing and recommender systems, mobile sensors and geosocial services, augmented reality, wearable computing, smart tourism, electronic distribution for tourism and hospitality products and services, e-learning, responsive web design and management, and eTourism for development. This book covers the most significant areas contributed by prominent scholars from around the world and is suitable for both academics and practitioners who are interested in the latest developments in e-Tourism.

Slow Tourism, Food and Cities
Pace and the Search for the "Good Life"
Heritage Conservation in Postcolonial India

Concepts, Methodologies, Tools, and Applications
International Perspectives
Tourism Employment in Nordic Countries
Proceedings of the International Conference in Lugano, Switzerland, February 3 - 6, 2015

Tourism marketing is a vital tool in promoting the overall health of the global economy by not only bringing necessary revenue to a particular region, but also providing an opportunity for tourists to explore another culture, building tolerance and overall exposure to different ways of life. Strategic Tools and Methods for Promoting Hospitality and Tourism Services provides interdisciplinary perspectives in the areas of global tourism and hospitality. Highlighting cultural boundaries of strategic knowledge management through the use of case studies and theoretical research, as well as the opportunities and challenges of tourism marketing, this publication is an essential reference source for academicians, research scholars, marketing professionals, graduate-level students, and industry professionals interested in international travel and the vacation industry.
Travel, Tourism and Identity addresses the psychological and social adjustments that occur when people make contact with others outside their social, cultural, or linguistic groups. Whether such contact is the result of tourism, seeking exile, or relocating abroad, the volume's contributors demonstrate how one's identity, cultural assumptions, and worldview can be brought into question. In some cases, the traveller finds that bridging the social and cultural gap between himself and the new society is fairly easy. In other cases, the traveller discovers that reorienting himself requires absorbing a new cultural history and traditions. The contributors argue that making these adjustments will surely enhance the traveller's or tourist's experience; otherwise the traveller or tourist will be at risk of becoming a marginalized figure, one disconnected from the society that surrounds him. This latest volume in the Culture & Civilization series features a collection of essays on travel and tourism. The essays cover a range of topics from historical travels to modern social identities. They discuss ancient travels, contemporary travels in Europe, Africa and sustainable eco-tourism, and the politics of tourism. Essays also address experiences of Grenada's "Spice Island" identity, and the effects of globalization and migrations on personal identity.
Destinations include the places, landscapes and communities where sport tourism development takes place. Whether sport tourism development takes the form of sport events, active participation in sport, and/or sports nostalgia/heritage, it draws on local resources, forms part of the complex dynamic of daily life. As such, sports tourism has implications for residents, with destination communities in a position to benefit from, or absorb the costs of, the extent to which development is sustainable. Subsequently, this book features contributions that focus on sport tourism and destination sustainability. Issues covered include, though are not limited to, destination management, surf localism, the production of space, event sustainability in national parks, utilisation

of sport heritage for destination promotion, enhancing the attractiveness of destinations through sport tourism, destination development and sport tourism, utilising sport to motivate travel to destinations and environmentally responsible behaviour in sports tourism destinations. The unique contribution of this edited volume is the multi-disciplinary approach applied to enhance conceptual understanding of issues surrounding sport tourism and destination sustainability. The chapters originally published as a special issue in the Journal of Sport & Tourism.

To maintain a healthy ecosystem for contemporary society, and for future generations, policies must be implemented to protect the environment. This can be achieved by consistent evaluation of new initiatives and strategies. Sustainable Development: Concepts, Methodologies, Tools, and Applications is a comprehensive source of scholarly information on the latest research for sustainability concerns across a multidisciplinary perspective. Highlighting a broad range of innovative topics such as renewable energy, urban development, and green technologies, this multi-volume book is ideally designed for academics, researchers, professionals, students, and practitioners interested in the preservation of the environment.

This comprehensive volume was put together in response to the growing amount of research on tourism in Asia and an increasing number of authors from Asian countries. It concentrates on two aspects of Asian Tourism: first, the Asian tourists themselves, and second, economic development and tourism in the Asian region. The first part of the collection focuses on three areas: the motivations of different types of Asian tourist; the characteristics and behaviour of particular Asian tourist segments; and, finally, an analysis of specific research issues. The second part of the book then goes on to explore the governance and organisation of tourism in the Asian region, and the nature of Asian growth and competitiveness as it relates to tourism. The articles in this book were originally published in the journal Current Issues in Tourism.

Contemporary Cases and Emerging Issues

Heritage Conservation in Postcolonial India seeks to position the conservation profession within historical, theoretical, and methodological frames to demonstrate how the field has evolved in the postcolonial decades and follow its various trajectories in research, education, advocacy, and practice. Split into four sections, this book covers important themes of institutional and programmatic developments in the field of conservation; critical and contemporary challenges facing the profession; emerging trends in practice that seek to address

contemporary challenges; and sustainable solutions to conservation issues. The cases featured within the book elucidate the evolution of the heritage conservation profession, clarifying the role of key players at the central, state, and local level, and considering intangible, minority, colonial, modern, and vernacular heritages among others. This book also showcases unique strands of conservation practice in the postcolonial decades to demonstrate the range, scope, and multiple avenues of development in the last seven decades. An ideal read for those interested in architecture, planning, historic preservation, urban studies, and South Asian studies.

This handbook explores and critically examines both positive and negative impacts of tourism development focusing on the past, present and future issues, challenges and trends from a multidisciplinary global perspective. Through a comparative approach involving international case studies, this book explores our understanding of tourism impacts and contributes to the theoretical development on relationships between tourism impacts and community support for tourism development. This handbook focuses on a variety of geographical locations, drawing from the knowledge and expertise of highly regarded academics from around the world. Specifically, it explores the adoption and implementation of various tourism development and impact management approaches in a wide range of global contexts, while identifying their trends, issues and challenges. It addresses strategies relating to innovation, sustainability and social responsibility, and critically reviews the economic, sociocultural, environmental, political and technological impacts of tourism. The text also identifies future trends and issues, as well as exploring the methods used to study tourism impacts. Conveying the latest thinking and research, this handbook will be a key reference for students, researchers and academics of tourism, as well as development studies, geography, cultural studies, sustainability and business, encouraging dialogue across disciplinary boundaries and areas of study.

China's Belt and Road Initiative (BRI) has attracted growing attention from around the world since it was first announced. It is, along with the Asian Infrastructure Investment Bank (AIIB), a critical instrument for realizing what the Chinese government calls the Community of Common Destiny (CCD).The core idea presented in this volume is that the CCD represents a new paradigm for promoting regional collaboration in socio-economic development, and plays a crucial role in reshaping the international geopolitical landscape. Contributors show that the belief in common development and common security transcends differences in cultural tradition and pre-existing level of development. This belief underlies the commitments among countries and regions participating in the BRI to working closely together in pursuit of shared and sustained prosperity.The chapters are based on papers presented at 'Building the Community of Common Destiny between China and Its Neighbors: Challenges and the Future', an international forum co-organized by the National Institute for Global Strategy of the Chinese Academy of Social Sciences and the University of International

Relations (China). Thirty experts from more than twenty countries have contributed to this volume.

The European Journal of Tourism Research is an interdisciplinary scientific journal in the field of tourism, published by Varna University of Management, Bulgaria. Its aim is to provide a platform for discussion of theoretical and empirical problems in tourism. Publications from all fields, connected with tourism such as management, marketing, sociology, psychology, geography, political sciences, mathematics, statistics, anthropology, culture, information technologies and others are invited. The journal is open to all researchers. Young researchers and authors from Central and Eastern Europe are encouraged to submit their contributions. Regular Articles in the European Journal of Tourism Research should normally be between 4 000 and 20 000 words. Major research articles of between 10 000 and 20 000 are highly welcome. Longer or shorter papers will also be considered. The journal publishes also Research Notes of 1 500 – 2 000 words. Submitted papers must combine theoretical concepts with practical applications or empirical testing. The European Journal of Tourism Research includes also the following sections: Book Reviews, announcements for Conferences and Seminars, abstracts of successfully defended Doctoral Dissertations in Tourism, case studies of Tourism Best Practices. The European Journal of Tourism Research is published in three Volumes per year. The full text of the European Journal of Tourism Research is available in the following databases: EBSCO Hospitality and Tourism CompleteCABI Leisure, Recreation and TourismProQuest Research Library Individual articles can be rented via journal's page at DeepDyve. The journal is indexed in Scopus and Thomson Reuters' Emerging Sources Citation Index. The editorial team welcomes your submissions to the European Journal of Tourism Research.

This timely Research Agenda explores and proposes critical lines of research to support understanding of the conditions under which urban tourism contributes to the development of urban systems, and what can be done to create and conserve these conditions. Chapters highlight conceptual discussions, concrete case studies and policy reviews to address the issues surrounding the economic, environmental and social impacts of tourism on cities.

Handbook of Research on Resident and Tourist Perspectives on Travel Destinations

Tourism gentrification is a critical shaping force of socio-economic and contemporary urban landscapes. This book aims to be the first substantive text on this subject, explaining

the multiple and complex relationships between tourism and gentrification and their outcomes and manifestations in contemporary metropolises. This is achieved by drawing on in-depth case analyses addressing the different issues at stake. Part I deals with the manifestations of tourism gentrification and the ways it affects urban landscapes through heritagization and urban regeneration strategies. Part II looks at the correlations between tourism gentrification and culture. Finally, the last two parts aim to identify and examine forms and expressions of tourism gentrification, distinguishing among the actors, beneficiaries, and victims of the phenomenon while looking at its implications for intra-metropolitan territories and metropolitan governance. The book approaches these issues in an innovative way, by looking at a variety of metropolises in a diverse range of countries and by dealing with the different relations and management issues generated by gentrification in relation to tourism. Through interdisciplinary approaches, this groundbreaking text sheds light on the role tourism plays in contemporary metropolises, furthering knowledge of urban tourism. For these reasons, it will be of particular interest to scholars and students of tourism, urban studies, geography, anthropology and sociology.

"Aftermath: Fukushima and the 3.11 Earthquake" is a comprehensive analysis of recovery and reconstruction following the triple disaster in Japan on March 11, 2011. This collection addresses the question of why, despite the relative success of network governance in brokering a response to the disaster and to reconstruction, politics failed either to prepare for the disaster or to respond adequately to it. In examining Japan's political system leading up to 3/11, Aftermath looks at the system of network governance that operated between various organizations and levels of government. The book scrutinizes the political influence network that united politicians and the bureaucracy with the major corporations and created a system to promote nuclear power. Through political, policy, economic and social analysis, Aftermath aims to contribute to the development of mechanisms and structures to minimize the impact of disasters. (Series: Japanese Society Series) [Subject: Politics, Governance, Japanese Studies, Nuclear Studies]

This book examines the contribution and importance of alliances and partnerships to the tourism, travel and leisure industries. It concludes by providing management and marketing implications and recommendations for tourism business, destination managers and local planners to enable them to successfully operate such alliances.

This book approaches the tourism and hospitality industry from a regional science perspective. By analyzing the spatial context of tourist travels, the hospitality sector, and the regional impacts of tourist activities, it demonstrates the value of the regional science paradigm for understanding the dynamics and effects of tourism and hospitality-related phenomena. Written by leading regional science scholars from various countries as well as professionals from organizations such as OECD and AirBnB, the contributions address topics such as migration, new types of accommodation, segmentation of tourism demand, and the potential use of tracking technologies in tourism research. The content is divided into five parts, the first of which analyzes spatial effects on the development of firms in the tourism industry, while the second approaches temporal and spatial variability in tourism through analytical regional science tools. The broader economic and social impacts of tourism are addressed in part three. Part four assesses specific tourism segments and tourist behaviors, while part five discusses environmental aspects and tourism destination policies. The book will appeal to scholars of regional and spatial science and tourism, as well as tourism specialists and policymakers interested in developing science and evidence-based tourism policies. Companies and destinations in the tourism sector are confronted with increasing managerial challenges and have to deal with a competitive, turbulent, and fast-changing environment. The understanding that both tourism companies and destinations endowed with the best assets (natural and cultural) cannot survive the escalating international competition without good managerial practices, has provided significant momentum for the development of the disciplinary field of tourism management in the last three decades. This volume recognizes the relevance of travel, tourism, and tourism activities as major economic drivers in the contemporary global economy, with a specific focus on performance, strategies, and sustainability. It is the

collective intellectual effort of a number of international
scholars, who cultivate original research on tourism
management from a variety of theoretical perspectives.
Together, they outline the importance for tourism companies
and destinations to achieve and maintain a sustained
competitive advantage by embracing sustainability and a
Triple Bottom Line (TBL) approach to performance.

Viewed through a politico-economic lens, Nordic countries
share what is often referred to as the 'Nordic model',
characterised by a comprehensive welfare state; higher
spending on childcare; more equitable income distribution;
and lifelong-learning policies. This edited collection
considers these contexts to explore the complex nature of
tourism employment, thereby providing insights into the
dynamic nature, characteristics, and meaning of work in
tourism. Contributors combine explorations of the impact of
policy on tourism employment with a more traditional human
resources management approach focusing on employment issues
from an organizational perspective, such as job
satisfaction, training, and retention. The text points to
opportunities as well as challenges relating to issues such
as the notion of 'decent work', the role and contribution of
migrant workers, and more broadly, the varying policy
objectives embedded within the Nordic welfare model.
Offering a detailed, multi-faceted analysis of tourism
employment, this book is a valuable resource for students,
researchers and practitioners interested in tourism
employment in the region.
Transport and sustainability are intrinsically linked. This
book examines the links between transport, tourism, and
sustainability by means of a series of large case studies
covering several countries.
Research and development in agriculture is a very relevant
topic in today's society, especially given the evolution of
land ownership structures and resources exploitation. These
transformations have paved the way for new approaches in the

allocation and management of agricultural systems. Agricultural Management Strategies in a Changing Economy brings together emergent research and best practices in the area of agricultural management, policy, and structures. Highlighting theoretical concepts and empirical research, this book will be an all-encompassing reference source for professionals, researchers, academicians, practitioners, and students in the field of agricultural economics and sustainable development, as well as in related disciplines. This book describes, analyses, celebrates and interrogates the rise of rural tourism in the developed world over the last thirty years, while explaining its need to enter a new, second generation of development if it is to remain sustainable in all senses of that word. Contributors include 29 leading researchers, practitioners and commentators from ten countries around the world. Subjects covered include the ongoing evolution of rural tourism as a genre; its numerous niche markets, and market trends; community involvement, and its impacts on rural landscape conservation and society. Special attention is paid to product development in rural tourism, including food and beverage tourism, avitourism and landscape appreciation. Management Issues are also dealt with, as is the impact of internet booking systems on both commercial performance and regional and national rural tourism governance. There is a review of trends in academic research in rural tourism with an analysis of 1848 refereed and published research papers since 2000. This book is a worthy successor to Bramwell & Lane's pioneering 1994 publication, Rural Tourism and Sustainable Rural Development. This book was originally published as a special issue of the Journal of Sustainable Tourism. This text provides an innovative approach to the pedagogy of contemporary planning processes within different cultural contexts globally. It adopts an innovative multi-disciplinary social science approach and through the inclusion of international case studies, considers the extent to which intelligent design has enabled the needs of disabled residents and visitors to have universal access to social spaces and facilities. In incorporating the consideration into the fabric of the book it will encourage the mainstreaming of universal design and accessible tourism, as keystones of planning processes within the C21st.

This book argues that there is an inherent relationship between EU fundamental rights and EU citizenship: they both have the same objective of guaranteeing protection for the individual. This is underpinned by the development of case law in the field by the Court of Justice of the EU (CJEU). Here, however, the author proposes that that relationship has weakened in recent years as the CJEU has entered increasingly sensitive territory in regard to the protection of citizenship rights and fundamental rights. Writing in the post UK–EU referendum environment, the author argues that this decline is attributable to increasing Euroscepticism, which has worsened since the Eurozone crisis and even more so in light of Brexit, and arguments made that leaving the EU would reduce immigration. This argument is particularly important to note given the rising fears of immigration that underlie much of the dissatisfaction with the EU project: a feeling prevalent not only in the UK. The chapters look at the rights of migrant EU citizens in Member States other than their own, and the guarantees that exist as a matter of protecting their fundamental human rights, which are present alongside rights enjoyed as part of being an EU citizen.
