She was the pampered daughter of a wealthy manufacturer, then the bored wife of the man who took over the business, lost in suburbia, drifting through the days until she found politics. Claire Reed always believed in helping others, but it wasn't until she began working with Women Strike for Peace, an early antinuclear proliferation organization, that she saw she could actually change the world. She went on to work with one of the the icons of modern feminism, Bella Abzug, and with civil rights groups. Her story is the story of an era when women could, at last, shed the feminine mystique and become the woman they had buried inside themselves.

Tough Fronts takes the difficult issues in urban education head on by putting street-savvy students at the forefront of the discussion on how to best make successful changes for inner city schools. Individual chapters discuss scholarly depictions of black America, the social complexity of the teacher-student relationship, individual success stories of 'at-risk' programs, popular images of urban students, and implications for education policy. With close attention to the voices of individual students, this engaging book gives vitality and legitimacy to arguments for school changes that have been lacking in previous discussions. This book provides a comprehensive, up-to-date and accessible introduction to the philosophy of space and time. Ray considers in detail the central questions of space and time which arise from the ideas of Zeno, Newton, Mach, Leibniz and Einstein. Time, Space and Philosophy extends the debate in many areas: absolute simultaneity is examined as well as black holes, the big bang and even time travel. Time, Space and Philosophy will be invaluable to the student of philosophy and science and will be of considerable interest to mathematics students. The clear, non-technical approach should also make it suitable to for the general reader.

Tough Love is hope. It is help. It is a way of recovery for drug abusers, and a positive, supportive program for their families. Tough Love is a gift of love and a gift of life for those who practice its plan. It is a book for all parents, especially those whose children are now on drugs or are exposed to those who use drugs. Pauline Neff has gathered enthralling, real-life accounts of young drug users who needed help and of their parents' role in seeing that they received it. Eight families describe, in very graphic, heartrending terms, how their children successfully beat the drug habit through The Palmer Drug Abuse Program. PDAP is a privately financed twelve-step program, similar to the steps of AA. Ms. Neff explains each step to show how families can interpret and work through these steps in their own lives. Thousands of young people have found help through this method. Families have been reunited, and parents' own lives have been changed drastically in the process. If you are a parent of a young person in America today, Tough Love may be the most important book you will ever read. It may save your life.

This book describes a unique approach to smart receiver system design. It starts with the analysis of a very basic, single-path receiver structure, then using similar methods, extends the analysis to a more complicated multi-path receiver. Within the multi-path structure, two different types of phased -array architectures are discussed: Analog beam-forming, and digital beam-forming. The pros and cons are studied, and the gaps are identified. Whereas previous books in this area focus mainly on phased-array circuit implementations, this book fills a gap by providing a system-level approach and introduces new methods for developing smart systems.

Gothic cinema, typified by the films of Universal, Hammer, Amicus and Tigon, grew out of an aesthetic that stretches back to the 18th century and beyond, even to Shakespeare. This book explores the origin of Gothic cinema in art and literature, tracing its connection to the Gothic revival in architecture, the Gothic novel, landscape, ruins, Egyptology, occultism, sexuality, the mythology of werewolves, the philosophy of Hegel, and many other aspects of the Romantic and Symbolist movements.

Death Waits in the Dark

Touchstone

On the azure blue morning of 9/11 the skies were pronounced "severe clear," in the parlance of airline pilots; a gorgeous day for flying. Nearly 5,000 flights were cruising the skies over America when FAA Operations Manager Ben Sliney arrived at the Command Center for his first day on that job. He could never have anticipated the historic drama that was about to unfold as Americans who found themselves on the front lines of a totally unprecedented attack on our homeland sprang into action to defend our country and save lives. In this gripping moment-to-moment narrative, based on groundbreaking reporting, Lynn Spencer brings the inspiring true drama of their unflinching and heroic response vividly to life for the first time, taking us right inside the airliner cockpits and control towers, the

fighter jets and the military battle cabs. She makes vital corrections to the findings of the 9/11 Commission Report, and reveals many startling, utterly unknown elements of the story. As a commercial pilot herself, for whom the attacks hit terribly close to home, she knew that the true scope and nature of the response so brilliantly improvised that morning by those in the thick of the action -- with so little guidance from those at the highest levels -- had not at all been captured by the news coverage or the 9/11 Commission. To get to the truth, she went on a three-year quest, interviewing hundreds of key players, listening to untold hours of tapes and pouring through voluminous transcripts to re-create each heart-stopping moment as it happened through their eyes and in their words as the drama unfolded. From the shocking moment at 7:59 a.m. that American 11 fails to respond to a controller's call, until the last commercial flight has safely landed and military jets rule the skies, all Americans will find themselves deeply moved and amazed by the grace and fierce determination of these steely men and women as they draw on all of their exquisite training to grasp, through the fog of war, what is happening, put their lives on the line, and mount an astonishing response. This beautifully crafted and deeply affecting account of the full story of their courageous actions is a vital addition to the country's understanding of a day that has forever changed our nation. *Tough Decisions* places readers in realistic composites of cases the authors have actually seen or managed where they must make tough medical decisions. What happens in them often depends on the reader's decisions and thus gives a sense of pressures that bear on clinical-decision making.

Fintan Buckley is a pleasant, rather conventional and unimaginative man, who works as a legal adviser in an import/export firm in Dublin. He lives in Howth and is married to Colette. They have two sons who are at university, and a small daughter. As he goes about his life, working and spending time with his family, Fintan begins to experience states of altered consciousness and auditory hallucinations, which seem to take him out of a linear experience of time. He becomes interested in how we remember or imagine the past, an interest triggered by becoming aware of early photography, particularly early colour photography. He also finds himself thinking more about his own past, including time spent holidaying in the north of Ireland as a child with his father's family. Over the years he has become distanced from them, and in the course of the novel this link is re-established and helps to bring him understanding and peace, although in a most unexpected way. *Time Present and Time Past*, Deirdre Madden's eighth novel for adults, is about time: about how not just daily life and one's own, or one's family's past, intersect with each other.

KNOW YOUR ENEMIES It's good advice—and Kate always thought she did. But everything has changed: there's a new force at the head of the Thrall collective. And then Kate discovers that another part of the plan is

rescinding the rules of fair play by which the Thrall have always dealt with humans. Kate is no longer Not Prey. Now she is just like everyone else: Prey. Uncovering the plot is a start, but stopping it is another thing entirely. Kate must not only call on all of her own resources, but all of those that belong to her werewolf boyfriend Tom. But the Thrall collective has a brand new way of getting to Kate: a very personal series of attacks designed to tear her from Tom. Kate has to decide: save her relationship with Tom, or save the future from the Thrall? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
