The Gospel According to My Kitchen Sink written by Susan Romero Vidal eloquently from her heart stirred powerful emotions in me, rocked my soul and inspired me to write my own tale to true reality. Read this book, and be inspired to take action towards the direction of your dreams. Like Susan and myself you are divinely guided to allow magical moments to happen in your life. Juliet Van Ruyven International Best Selling Author of The Tale of Juliet The wisdom and insights that come out from the pages of this book are rocket science achievable to only a few. It is a Jesus-kind of wisdom, open and available to everyone. It is a wisdom an example of faith that builds godly character and moves one towards Jesus’ core teaching – to “love God” and “love one another”. The Gospel According to My Kitchen Sink has the kind of appeal that will make it difficult for anyone to put it down. This wonderful book has delighted and blessed me immensely, and has filled me with thankfulness to and for the author. Bruce Sundberg Washington DC, USA

Arya is a handsome, shrewd, witty and an intelligent police officer. He fears no one and loves the Indian Penal Laws as much as he loves his life. He has a very daunting past ? in Delhi and Ghaziabad, where he was accused of mass murders. But later, all the cases were dropped due to lack of evidence. Still, he had to spend eight gruelling months in a mental asylum. Arya is brought to Chennai and commissioned to CB CID. He cleverly solves two complicated white collar murders ? as if they were children?s puzzles. His senior, Shivani Verma, a young divorcee with a four-year-old daughter, initially hates him for his off-handed remarks but later starts liking him as her daughter, Payal, gets attached to Arya. Arya?s past is vaguely revealed to Shivani by Neha and Shirley. When Shivani tries to get close to Arya, he is unfortunately thrown into a serious case where four consecutive murders shake the city. Arya eventually also finds out about a jinxed web of relationships gone dangerously wrong because of greed, money, lust, unbelievable treachery and infidelity. He tries to save the unexpected murderer, when he learns that she?s pregnant but finally his loyalty towards the Law takes over.

Weaver Press's previous collections of short stories, Writing Now and Writing Still, were highly praised for the quality of their prose and the imagination of their writers. They confirmed, for one reviewer, 'the paradoxical truth that troubled societies somehow produce some of the most interesting writing available. Laughing Now goes further, and demonstrates the enduring capacity of Zimbabweans to find humour in even the most difficult of circumstances. The stories embrace funerals, dancing competitions, family tensions, rampant inflation and endless queues for scarce goods. They take a wry look at pompous politicians, foreign filmmakers and the aspirations of the so-called 'new' farmers. Those by Gappah, Chingono and Eppel won the first three prizes in the recent Mukuru.com short story competition. Zimbabwean fiction in English has become world-renowned in recent decades, but its concerns - war, trauma and the trials of independence - have chronicled the pain of those periods. Laughing Now suggests that we are finding new ways to reflect our reality; that however many zeros we add to the rate of inflation, and however hungry we may become, humour is as good a responce as any.

This multi-volume set focuses on a key region of the world which contains four of the biggest emerging economies, a large number of highly dynamic small- and medium-sized emerging economies, and one of the leading advanced industrial countries. It is a region which contains some of the biggest hydrocarbon and mineral deposits in the world, and some of the most energy- and metal-hungry economies in the world. With half the world's population, it is one of the most dynamic regions of the globe in terms of population movement, providing a key focus of foreign investment, both inwards and outwards, with a high degree of technological dynamism. The region plays a central role in the industrial supply networks of the globe.In four volumes, focusing on, respectively, foreign investment, innovation, energy and migration, the set focuses on each of the main elements in the production system in turn — capital, innovation, raw materials and labour. Volume 1 studies patterns of interchange of financial and direct investment within the region, focusing on governance, the development of supply chains, and technology transfer. In Volume 2, the technology theme becomes dominant, with a special focus on digital technology. It includes technical issues like mobile communications standardisation, developmental dimensions, including the role of clusters and science parks, and political economy issues like the rise of techno-nationalism. Volume 3 turns to energy issues — not just issues of supply and demand, but also key problems of climate change, security and sustainability across the Eurasian and Asian landmass. Volume 4 presents the human dimension, looking at people in movement, as workers, citizens, men, women, or colonisers. Among the key issues discussed are the migration from country to town in China, the 'greying' of countries like Japan, the effect of war on migration, marriage migration, human trafficking and the depopulation of the Russian Far East.The set is a must-have for anyone keen to understand the region whose manufacturing core can be described, without exaggeration, as the 'workshop of the world' of the twenty-first century.

Red Earth by Tony Park, the author of An Empty Coast, is a full-throttle international thriller that will engross fans of Clive Cussler. On the run, with everything to lose . . . On the outskirts of Durban, Suzanne Fessey fights back during a vicious carjacking. She kills one thief but the other, wounded, escapes with her baby strapped into the back seat. Called in to pursue the missing vehicle are helicopter pilot Nia Carras from the air, and nearby wildlife researcher Mike Dunn from the ground. But South Africa's police have even bigger problems: a suicide bomber has killed the visiting American ambassador, and chaos has descended on KwaZulu-Natal. As Mike and Nia track the missing baby through wild-game reserves from Zululand to Zimbabwe, they come to realize that the war on terror has well and truly arrived . . .

Why Understanding Green Business? With every new day society has become more aware of the increasing threats to the globe due to the non-environmentally friendly practices that have been occurring in the previous years. Due to the newfound awareness, people have taken greater lengths to pass laws, alter company policies and change their everyday lives to do their part in helping to preserve the environment and prevent any further damage. Rather than taking the easy route and continuing their habits, society is putting forth a consciousness effort to go out of their way to improve the environment in any way they can. As a collective force the going green movement will better the environment and allow further generations to enjoy a clean and productive world. How is Understanding Green Business structured? Dr. Tehrani and Dr. Sinha dedicate each chapter to a different aspect of "going green" in this book such as products, transportation, networking, research and energy alternatives. In addition, the authors discuss green careers and provide useful information on how to go about working at a green company. The future of the green movement and its impacts are mentioned so as to provide a potential impact of current changes in the future. It also shows a possible interpretation of how the future green movement shall be exercised. Who is this book for? This book has been created as the core textbook for Business professionals, industry practitioners, academicians and students who would like to hone their business skills, and keep up with the latest trends in Green Business. As a result, Understanding Green Business will support students pursuing a master degree in MBA, Certificate in Management or a Diploma in Management and/or Business while undergraduate students in business programs.

The book arose from a multi-disciplinary study which looked at the development of global-local manufacturing clusters in the context of a developing, Asian economy. The study demonstrates the connection amongst theoretical perspectives such as international business, development studies, economic geography, and organisational learning clusters/production networks through an in-depth case study of the Indonesian automotive cluster. The book gives a detailed account of two automotive clusters (Toyota and Honda) and their contribution to regional economic development in emerging economies in Asian region. The book builds on existing literature to develop a theoretical framework to shed light on the study's empirical findings. The book discusses practical implications for both the business community and policy makers. The discussion on global-local networks in an Asian context supplements existing literature and case studies in the field. This is one of the few books that explicitly links regional clusters to global networks. The book offers a refreshingly international (Asian) perspective to the literature on clusters and economic geography for emerging economies.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

This book looks at the industrial policies of Southeast Asian economies in their motor vehicle industries from early import substitution to policy-making under the more liberalised WTO policy regime. The book examines how inward automotive investment, especially from Japan, has been affected by policies, and how such investment has promoted industrial development in the late-industrialising economies within ASEAN (Association of Southeast Asian Nations). It provides insights into the automotive industry of Southeast Asia in terms of production volumes, sales volumes, market structure, and trade. Through country case studies, the book is a useful reference and illustrates how industrial policies in Southeast Asia have affected the spread of automotive development in the region. It will appeal to policy-makers and researchers interested in the automobile industry, industrial policies in the industry and the spread of development from foreign investors to local firms.

The familiar stories of the book of Genesis affirm that God made the universe, planet earth, and you and me. However, various anomalies in the text clue us that we are not reading the original version of these stories. So what were the original narratives and what did they say about who we are and where we all came from? What was the earlier story of human origins, almost obliterated from the Hebrew Scriptures in the 6th century BC, and suppressed from Christian writing in the 2nd and 3rd centuries AD? And what does any of this have to do with Extra Terrestrials? Escaping from Eden will take you on a journey around the world and into the mythologies of ancient Sumeria, Mesoamerica, India, Africa, and Greece to reveal a profound secret, hidden in plain sight in the text of the Bible. Far reaching and deeply controversial, this book points to truths about ourselves, the universe and everything that you may have long suspected but not dared to speak!

Can one car transform a nation? The Ford Model T did do so a century ago when it replaced the horse, brought about a revolution in agriculture, became a stimulus to urbanization that eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto, became engines of growth for India, these cars neither drove away the cow nor changed the way Indians travelled. Tata’s Nano was expected to change all that and become the ultimate people’s car, capturing the imagination of the middle class across nations and cultures. In spite of its petite dimensions, the Nano was meant to stand tall. Yet it did not. What caused it to fail and fall from grace despite being lauded as the ‘right product at the right time’ and ‘the most significant new car since the Ford Model T was introduced 100 years ago’? But is it really all over or is there still hope for India’s ‘little wonder’? What will the people’s cars of tomorrow be like? A Million Cars for a Billion People delves into the questions, concerns and doubts, as well as the many misconceptions and myths, that have gathered momentum over the years about India’s automotive history and the industry’s mission to create a true ‘people’s car’. The very first cars that came to India; the early beginnings of the industry; the nascent history of the automobile across nations like Germany, France, US, the UK, Italy, Japan and South Korea, is narrated with authority and charm, from the viewpoint of the quest for the ultimate people’s car.

The international conference "Sustainable Collaboration in Business, Technology, Information and Innovation (SCBTII) 2019" has brought together academics, professionals, entrepreneurs, researchers, learners, and other related groups from around the world who have a special interest in theories and practices in the development of the field of digital economy for global competitiveness. Considering that, at present, technology and industry 4.0 are still a leading trend and offer great opportunities for global businesses, the rise of industry 4.0 makes competition in the business world more attractive, yet fierce. Opportunities and challenges for business development in industry 4.0 are becoming firm and it also provides businesses the possibility to compete globally. Companies that desire to enter this global competition should pay attention to customer benefits and business fairness in order to achieve sustainability in this digital economy. This proceedings volume contains selected papers from this conference and presents opportunities to communicate and exchange new ideas and experiences. Moreover, the conference provided opportunities, both for the presenters and the participants, to establish research relations, and find global partners for future collaboration.

The Mirror

Educated, young, no-nonsense bearing, able administrator-these are the equalities that won Sesha the loyalties of the people after three years of rule as the Chief Minister of Tamil Nadu. An allegation that he was the mastermind behind the murder of 73 Kannadigas threatens to bring him down but he is miraculously saved at the 11th hour. Even before he can relish his victory, Sesha is slapped with the charge of sexually offending a young nurse. This time around, the case is strong and his supporters are uncertain. Worse, his teenage daughter calls him 'vile' and walks out of the house. While Mythili, his wife promises her full support, her secretive activities-undertaken with the help of a retired cop-is cause of concern for Sesha. Will Zarina, the human-rights activist, succeed in bringing him down? What about the insinuations of a celebrity lawyer that he is casteist and anti-minorities? When the young nurse is found dead, the case becomes even more complex. Who is innocent? Who is guilty? And who is the mastermind?

The ability to bring new and innovative products to market rapidly is the prime critical competence for any successful consumer-driven company. All industries, especially automotive, are slashing product development lead times in the current hyper-competitive marketplace. This book is the first to thoroughly examine and analyze the truly effective product development methodology that has made Toyota the most forward-thinking company in the automotive industry. Winner of the 2007 Shingo Prize For Excellence In Manufacturing Research! In The Toyota Product Development System: Integrating People, Process, and Technology, James Morgan and Jeffrey Liker compare and contrast the world-class product development process of Toyota with that of a U.S. competitor. They use extensive examples from Toyota and the U.S. competitor to demonstrate value stream mapping as an extraordinarily powerful tool for continuous improvement. Through examples and case studies, this book illustrates specific techniques and proven practices for dealing with challenges associated with product development, such as synchronizing multiple disciplines, multiple function workload leveling, compound process variation, effective technology integration, and knowledge management. Readers of this book can focus on optimizing the entire product development value stream rather than focus on a specific tool or technology for local improvements.

"Another rip-roarin' entry into the genre of Spy Fiction. Chuck Van Soye seems to be drawing on his military years as well as his knowledge of the oil situation from being an editor at Chemical Engineering. Or maybe he just has a great imagination. But it all sounds real to me!" - Barthélemy Banks, author of Mumm and Mumm's Curse. After 20 years working for the U.S. Army Research Center, Bret Lee, a 44-year-old chemical engineer, retires to look for work in private industry, only to learn that in the tough 2010 economy, he's unable to find a job. But thanks to a quasi-government contact from his past, he's offered high-paying employment at a Venezuelan fertilizer plant just outside Caracas. There's only one catch; he has to become a spy. Bret and his Chinese wife, Chu-Lin, accept the challenge, and both become enmeshed in the military, political and diplomatic aspects of life within the most dangerous city of the world. With help from the local CIA, Lee uncovers an international plot that could throw Latin America into turmoil, and that could strangle strategic oil shipments to the U.S. Life gets even more intense when he finds himself locked up by SEBIN, the intelligence arm of the Venezuelan government. In the 21st century poker game of international petroleum supply, China puts big money and a lot more on the game table to ensure that it will be the ultimate winner of Venezuela's oil production. But the Lees have an "ace in the hole," and their hand trumps China's plans. Spy Mates skillfully blends real-world tensions with a thrilling plot that will keep you enthralled.

Spy Mates: Operation Ace In the Hole

After the success of "Operation Fox-Hunt", Sanjay Khanna is back in action. And this time the stakes are higher. Hurt and pushed to the back foot by Indian political actions in Kashmir, the Pakistani Military establishment is angry and decides to strike, hard! Their man for the job, Major Mansoor Khan of the Pakistan Army is given a target. A deadly weapon from an old conflict is summoned back from its exile to deliver a crippling blow that will change the history of the subcontinent. Mansoor and his men have their tasks cut out. With a handpicked team and a well-oiled plan, they are on their way. Can they be stopped in time? Will the Indian security agencies be able to detect and neutralise the attack? Operation Hellfire unfolds across the crystal-clear waters off Thailand to the mountains of Chakrata in India, via the dusty expanse of Afghan countryside through the intrigue filled city of Quetta, right through to the heart of India, Delhi. A heady mix of thrilling detective work combined with high octane explosive action keeps you turning the pages.

In Buddhism greed, hatred and delusion are known as The Three Poisons. The most destructive of these three is hatred: The Second Poison. When Tony, a former US Army interrogator, travels to Thailand to track down those responsible for ripping off his father in a boiler room telesales scam, he soon finds himself embroiled in the murky underworld of illegal muay thai kickboxing gambling, money laundering, sex work and digital crime. The Second Poison explores hatred, revenge and redemption in present-day Thailand from a number of perspectives: the hardened farang (Caucasian) army veteran; the compassionate Thai girl born a boy, who once murdered her sister's rapists; the godfather of a Hong Kong gambling syndicate and the Thai cop who turns a blind eye to crimes of passion ▯ their stories intertwining throughout the book.

Public Relations Planning provides students with an in-depth understanding of the steps involved in planning and executing a successful PR campaign. Taking a strategic approach to the subject, the author brings years of practical experience to the project, helping students see how it all fits together in reality. The book goes beyond an introductory discussion of the theory of PR planning, incorporating material from cutting-edge research in the field. A discussion of the psychological aspects of communication, material on in-house/employee communication, as well as a chapter dedicated to discussing how social media strategies fit into a PR campaign, give students a real edge when it comes to executing an effective campaign. Plenty of global examples and a companion website featuring PowerPoint slides, a test bank, and answer key for end-of-chapter questions round out this excellent resource for students of public relations and corporate communication.
