A brand-new series in which murder is anything but elementary After Tarver Elementary School's unpopular principal is murdered, PTA secretary and mother of two Beth Kennedy puts aside bake sales and class trip fund-raisers to catch a killer. And when members of the PTA become suspects, she realizes solving this murder will not be as easy as ABC... This book revisits the early systemic formation of meditation practices called 'yoga' in South Asia by employing metaphor theory. Karen O'Brien-Kop also develops an alternative way of analysing the reception history of yoga that aims to decentric the Eurocentric and imperialist enterprises of the nineteenth-century to reframe the cultural period of the 1st – 5th cen South Asian intellectual history. Buddhist traditions were just as concerned as Hindu traditions with meditative disciplines of yoga. By exploring the intertextuality of the Patanjalyogasastra with texts such as Vasubandhu's Abhidharmakosabhasya and Asanga's Yogacarabhūmisastra, this book highlights and clarifies many ideologically Buddhist concepts and practices demonstrates that 'classical yoga' was co-constructed systemically by both Hindu and Buddhist thinkers who were drawing on the same conceptual metaphors of the period. This analysis demystifies early yoga-meditation as a timeless 'classical' practice and locates it in a specific material context of agrarian and urban economies.

The Crazy Crumpet Kerfuffle

2005-2007

The book follows the two children as they embark on an adventure, which begins with the discovery of a hidden witch's haven in a graveyard and Jordan's first encounter with the spirit world - but by know means the first for Sebastian. Then a haunted observatory on the outskirts of town yields a clue - a piece of an intriguing map leading to, what they believe to be, hidden treasure. After collecting the rest of the clues from around the town, Jordan and Sebastian search for the treasure, but instead of rubies, emeralds and gold doubloons, they find themselves lead to a doorway into another world, called the Phantom Realm.

The 100th Day of School

A psychological thriller in the tradition of Patricia Highsmith about two couples caught in a web of conflicting passions while deep-sea diving off the beautiful Canary Islands In the late 1990s, Sven Fiedler and his girlfriend, Antje, left Germany for the island of Lanzarote, rejecting what Sven considered a vulgar culture of materialism and judgment. The young couple set up a diving service catering to tourists eager to bask in the warm sunshine and explore the silent, gleaming marine paradise that makes this otherwise barren volcanic island such a remarkable retreat. Sven's approach was simple: take the mechanics of diving seriously, instruct his clients clearly, and stay out of their personal business as best he can. And life on the island goes smoothly until two German tourists--Jola von der Pahlen, a daytime soap star on the verge of cinematic success, and Theo Hast, a stalled novelist--engage Sven for a high-priced, intensive two-week diving experience. Staying in a guest house on Sven and Antje's property, the two visitors and their hosts quickly become embroiled in a tangle of jealousy and suspicion. Sven is struck by Jola's beauty, her evident wealth, and her apparently volatile relationship with the much older Theo. Theo quickly leaps to the conclusion that Sven and Jola are having an affair, but, oddly, he seems to facilitate it rather than trying to intervene. Antje, looking on, grows increasingly wary of these particular clients. As the point of view shifts from one character to the next, the reader is constantly kept guessing about who knows what, and, more important, who is telling the truth. A brutal game of defusion, temptation, and manipulation plays out, pointing toward a violent end. But a quiet one, down in the underwater world beneath the waves.

*Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide—400,000 copies sold—now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.*

*As today's spark-ignition and diesel engines have to fulfil constantly increasing demands with regard to CO2 reduction, emissions, weight and lifetime, detailed knowledge of the components of an internal combustion engine is absolutely essential. Automotive engineers can no longer survive without such expertise, regardless of whether they are involved in design, development, testing or maintenance. This text book provides answers to questions relating to the design, production and machining of cylinder components in a comprehensive technical analysis.*

Welcome to Pip Street! The very ordinary place where extraordinary things happen. Full of quirky black-and-white illustrations throughout, as well as fun activity sheets at the back. Can crumpets be cool? When Bobby's dad becomes the manager of the local crumpet factory, Bobby thinks his moving worries are at last over. He likes it here on Pip Street, especially now he has found a new best friend in fizzy Imelda from next door. Except crumpets are boring! And no one is buying them. Unless someone (and I bet it'll have to be Bobby) comes up with a fantabulous plan to make crumpets more interesting. Bobby's dad might lose his job and that means ... uh-oh ... moving again. And who's that even newer boy across the street acting like he's better than everyone else, and making eyes at Imelda and trying to be her best friend instead? Looks like there's a crumpety calamity on Pip Street! Keep your eyes peeled for more PIP STREET adventures: A WHISKERY MYSTERY (9781407132815) "Utterly charming and delightful" Mel Giedroyc

Dodging the Toxic Bullet presents workable strategies that show how we can live longer, healthier lives by breathing clean air, eating healthy food, drinking safe water, and using non-toxic products. Author David R. Boyd provides accessible background on a range of hazards including mercury in fish, carcinogens in cleaning products, lead in toys, and lethal E. coli in ground beef. His clear directions for reducing risk include growing lots of houseplants, choosing whole foods, avoiding consumer products with strong or long-lasting smells, and using green cleaning products. Easy-to-follow advice and informative sidebars and checklists make this a must-have guide, especially for parents of infants and children.

For the Hollywood aficionado this visual feast makes a perfect gift; while for graphic designers, both professional and students, this makes for a great source of ideas and inspiration.*

*When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the Ameri can occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American mili tary motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University.*

*Watching that mag nificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst.*
