Betrayal in the City, first published in 1976 and 1977, was Kenya’s national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: “It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future.”--Page 4 of cover

For a century, almost all light-duty vehicles (LDVs) have been powered by internal combustion engines operating on petroleum fuels. Energy security concerns about petroleum imports and the effect of greenhouse gas (GHG) emissions on global climate are driving interest in alternatives. Transitions to Alternative Vehicles and Fuels assesses the potential for reducing petroleum consumption and GHG emissions by 80 percent across the U.S. LDV fleet by 2050, relative to 2005. This report examines the current capability and estimated future performance and costs for each vehicle type and non-petroleum-based fuel technology as options that could significantly contribute to these goals. By analyzing scenarios that combine various fuel and vehicle pathways, the report also identifies barriers to implementation of these technologies and suggests policies to achieve the desired reductions. Several scenarios are promising, but strong, and effective policies such as research and development, subsidies, energy taxes, or regulations will be necessary to overcome barriers, such as cost and consumer choice.

The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation’s National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. The Cigar Blueprint is a reference guide, and an active connection to some of the best cigar companies and cigar personalities in the world. It’s easy to understand and convenient to have with you at all times. The book includes the history of cigars, cigar education, cigar basics and advanced information, helpful charts and illustrations, multiple journaling pages, and QR codes providing industry links.

The story is told of Chekal, a teenage boy who survives school bullying to become a champion of peaceful coexistence in an ethnically and economically divided society. Matur County is an example of a country that faces internal divisions, one that is under increasing danger from external threats, including terrorism. Chekal is bullied by his teacher, Ms Letia and his class prefect, Goliath. This reflects the ethnic suspicions and economic inequalities that threaten to tear the society apart. However, Chekal thinks realistically about the problems in his society. Through common, he realises that they will only defeat their real enemies if they are united. Chekal wins a presidential essay writing competition and becomes a peace ambassador. He uses his new position to chart a new path on which everyone will walk. This includes those who previously bullied him, and those who had been discriminated against.

FOOD ETHICS, 2E explores the ethical choices we make each time we eat. With twenty-six readings that bring together a diverse group of voices, this textbook dives into issues such as genetically modified foods, animal rights, population and consumption, the food industry’s impact on pollution, centralized versus localized production, and more. In addition, this edition includes new introduction, new readings, a comprehensive index, and study questions that frame these significant issues for discussion and reflection. Would life be better without alcohol? It’s the nagging question more and more of us are finding harder to ignore, whether we have a “problem” with alcohol or not. After all, we yoga. We green juice. We meditate. We self-care. And yet, come the end of a long work day, the start of a weekend, an awkward social situation, we drink. One glass of wine turns into two turns into a bottle. In the face of how we care for ourselves otherwise, it’s hard to avoid how alcohol really makes us feel... terrible. How different would our lives be if we stopped drinking on autopilot? If we stopped drinking altogether? Really different, it turns out. Really better. Frank, funny, and always judgment free, Sober Curious is a bold guide to choosing to live hangover-free, from Ruby Warrington, one of the leading voices of the new sobriety movement. Drawing on research, expert interviews, and personal narrative, Sober Curious is a radical take down of the myths that keep so many of us drinking. Inspiring, timely, and blame free, Sober Curious is both conversation starter and handbook—essential reading that empowers readers to transform their relationship with alcohol, so we can lead our most fulfilling lives.

The rapid takeoff of the continent-sized national economies and the increasing expense of extraction have led to strong tensions in petrol prices and a race towards alternative driving systems. This book analyses the emergence of a second automobile revolution through the trajectories of automobile firms since the nineties.

The second edition of Automobile Mechanical and Electrical Systems concentrates on core technologies to provide the essential information required to understand how different vehicle systems work. It gives a complete overview of the components and workings of a vehicle from the engine through to the chassis and electronics. It also explains the necessary tools and equipment needed in effective car maintenance and repair, and relevant safety procedures are included throughout. Designed to make learning easier, this book contains: Photographs, flow charts and quick reference tables Detailed diagrams and clear descriptions that simplify the more complicated topics and aid revision Useful features throughout, including definitions, key facts and ‘safety first’ considerations. In full colour and with support materials from the author’s website (www.automotive-technology.org), this is the guide no student enrolled on an automotive maintenance and repair course should be without.

Wooden Glass: Tales From the City Volume 1

A Guide for the Penetration Tester

The Red Trade is the heart wrenching story of a group of small children who are abducted from their homes by ruthless, heartless men, and sold for organ harvesting, sacrifice to superstition, and to satisfy the sick and twisted desires of wealthy foreigners. Anita is a happy and healthy girl, but she has a problem, something that sets her aside from her peers, Anita is white, yet her heart and blood are pure African. For Anita is albino. A cursed child. Junior and Uncle are happy, carefree twins. Natasha is a happy go lucky schoolgirl without a care in the world. For a criminal gang is operating in their area, and customers around the world eagerly await. For luckily there are people willing to stand up and shout, “Stop! Glenn Ridgely is one such man, and with the help of his street-wise Kenyan girlfriend Ruth, and world weary Katanji police officer, Morgan. He sets about dismantling their sinister and sordid empire.

“My days like most Nairobi motorists’ are marred by tension, nervous shivers, shortness of breath, cold sweats and involuntary muscular twitching.” This is just one of the crazy experiences the author goes through, living and working in Nairobi. Wooden Glass was launched in 2014 as an entertainment blog on life in Nairobi. This book is an anthology of short stories from the entertainment blog, all of them fiction. Volume 1 contains the first 20 stories concerning lifestyle, culture and business in Nairobi. Some stories are funny, some thrilling and some reflective. The aim of the book is to be a reference book in automotive technology, as far as automotive chassis (i.e. everything that is inside a vehicle except the engine and the body) is concerned. The book is a result of a decade of work heavily sponsored by the FIAT group (who supplied material, together with other automotive companies, and sponsored the work). The first volume deals with the design of automotive components and the second volume treats the various aspects of the design of a vehicle as a system.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide—400,000 copies sold—now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it’s even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She’s also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Jerry Izenberg’s career as a newspaper reporter and columnist spans generations. From the early 1950s to the present day, he has written about championship teams and Olympic icons, baseball and football superstars and boxing legends. Along the way he became one of the best American sports columnists. “Going 15 Rounds With Jerry Izenberg: A Collection Of Interviews With The Legendary Columnist” highlights Izenberg’s career and some of his favorite stories. Even as he approached his 90th birthday in September 2020, Izenberg remains an important voice in the sports media world. In a series of conversations with Izenberg, his illustrious career is discussed. Some of the seminal moments of his childhood and adulthood are highlighted with vivid details. A gifted storyteller, Izenberg talks about his close friendship with Muhammad Ali, about meeting Nelson Mandela at the 1992 Barcelona Olympics, about the one question he always wanted to ask Cuban leader Fidel Castro. He reminisces about his father’s love for baseball, and about his own realization as a young man that he wasn’t an aspiring jazz musician despite his love for music. Yes, music played a pivotal role in his life as a writer. But how? That’s a topic explored within these pages. He shares tales about newspaper mentors and colleagues, including Red Smith and Shirley Povich, Jim Murray and Stanley Woodward, Dick Young and Jimmy Cannon. He reflects on racism and race relations in the 20th century through the prism of sports. He discusses courage and heroism, using Olympic wrestler Jeff Blatnick and baseball player Jim Eisenreich as examples. He recalls his visit to Grambling University, a historically black university, to observe coach Eddie Robinson’s football squad when he was the first white reporter to do so. He brings horse races from the 1970s to life, reminiscing about Secretariat and Canonero II. Jerry Green, Dave Anderson, Ira Berkow, John Schulan, Dave Kindred and Jeremy Schaap, among others, offer their assessments of Izenberg’s career and what’s made it special. They also weigh in on Izenberg’s place in the pantheon of American sportswriters. Not strictly an interview book, this project creates a wide mix of opinions from and about Jerry Izenberg to help people develop a broader understanding of his background, numerous career accomplishments and commitment to the community. He was the founder of Project Pride, which provided scholarships to college-bound students from his hometown of Newark, New Jersey, and also provided a range of sports and academic activities for students for three decades. В книге даются практически рекомендации по вопросам административного права, обзоры по делам об административных правонарушениях в области дорожного движения, с учетом последних изменений законодательства. Книга будет полезна владельцам транспортных средств, лицам, привлекаемым к административной ответственности, адвокатам, практикующим юристам, студентам, аспирантам, а также всем, кто интересуется правом. Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven’t kept pace with today’s more hostile security environment, leaving millions vulnerable to attack. The Car Hacker’s Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle’s communication network, you’ll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker’s Handbook will show you how to: -Build an accurate threat model for your vehicle -Reverse engineer the CAN bus to fake engine signals -Exploit vulnerabilities in diagnostic and data-logging systems -Hack the ECU and other firmware and embedded systems -Feed exploits through infotainment and vehicle-to-vehicle communication systems -Override factory settings with performance-tuning techniques -Build physical and virtual test benches to try out exploits safely If you’re curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker’s Handbook your first stop.

This book assesses the construction, operation and effects of the international protection regime for human rights defenders, which has evolved significantly over the last twenty years in response to the risks people face as they promote and protect human rights. Drawing upon the experiences of human rights defenders who continue to persevere in their activism in Indonesia, Egypt, Kenya, Mexico and Colombia, this edited collection examines the ways in which formal protection mechanisms by state and civil society actors intersect with self-protection measures and informal protection initiatives by families and friends. It highlights that protection practices are most effective when they are designed to address the specific risks that human rights defenders face (which are gendered and intersectional); reflect how defenders understand ‘risk’, ‘security’ and ‘protection’; and are appropriate for the dynamic sociopolitical and legal contexts in which defenders operate. This book proposes ways in which the protection of human rights defenders at risk should be reimagined and practised. This book will be a thought-provoking guide for students and scholars of politics, international relations, law and human rights, as well as to practitioners engaged in the protection of human rights defenders at risk.

Гейши, «Тойота», аниме, сакура, роботы - наверняка это первые ассоциации, связанные с Японией. Но этот далекий от нас архипелаг не так прост и открыт, как иногда кажется! Идеально чистые улицы и бомжи-интеллигенты, лес самоубийц и дома гейко, рикши в районе Асакуса и технологический мир Акихабара - согласитесь, оригинальные сочетания. Но такова страна, где за каждым поворотом вас ждет очередное культурное потрясение.Япония - мир современный, но приправленный разнообразием исторических наслоений. Мир, который сложно понять, но можно почувствовать. Valued by instructors and students alike, Foundations of Marketing presents an accessible introduction to Marketing.
