"Beaten and left for dead, fourteen-year-old Tula Bane finds herself abandoned on a space station called Yertina Feray after traveling with the colonist group, Children of the Earth"-- Hugh Holton, the highest-ranking active police officer writing books today, is well-known for powerful, passion-charged novels. Reviewers compare his books to hurricanes and firestorms, descriptions that are especially apt in the case of *Time of the Assassins*. The most controversial story in today's inner cities is the CIA's apparent funding of counterinsurgent druglords in Latin America, who, instead of fighting revolutionaries, have used that funding to wholesale crack cocaine in this country's ghettos. In this exciting new novel, Commander Larry Cole battles these Agency-funded druglords. Their "personal representative" is Baron von Rianocek, a hitman. A well-paid professional, known as a world-class "problem solver," he has successfully eliminated both high-profile British industrialists and South American dictators. The CIA, the FBI, and Interpol, all suspect him of being behind various incidents, but they have never been able to pin anything on the slippery millionaire, who claims to be descended from European royalty. Police detective Larry Cole has unwittingly crossed paths several times with the notorious assassin. Appearing at the wrong place at the wrong time, he had twice foiled the assassin's work. Now the well-heeled assassin has a new target. He has set his telescopic sights on the CPD chief of detectives--Cole himself. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

This book describes a unique approach to smart receiver system design. It starts with the analysis of a very basic, single-path receiver structure, then using similar methods, extends the analysis to a more complicated multi-path receiver. Within the multi-path structure, two different types of phased -array architectures are discussed: Analog beam-forming, and digital beam-forming. The pros and cons are studied, and the gaps are identified. Whereas previous books in this area focus mainly on phased-array circuit implementations, this book fills a gap by providing a system-level approach and introduces new methods for developing smart systems.

A mystery for the history books! River Heights Elementary School has been waiting a generation for this day to come. All the kids in Mrs. Ramirez's class, including Nancy Drew and her friends Bess and George, have gathered to watch Principal Newman dig up the time capsule that was buried over 30 years ago. But, when it's unearthed, a very important vintage doll is missing from the

capsule. How is that possible? It's been buried this whole time. Did a classmate steal it before the dig? Nancy Drew and the Clue Crew are on the case!

CRRN Exam Practice Questions are the simplest way to prepare for the CRRN test. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. If someone has never taken a practice test, then they are unprepared for the types of questions and answer choices that they will encounter on the official test. There is a tremendous advantage to someone taking the test that is already familiar with the questions and answer choices. Another advantage of taking practice tests is that you can assess your performance and see if you need to study and practice more, or if you're already prepared enough to achieve success on your test day. If you do well on the practice test, then you know you're prepared. If you struggle on the practice test, then you know you may still have more work to do to get prepared. Taking lots of practice tests helps ensure that you are not surprised or disappointed on your test day. Our CRRN Exam Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success and using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you missed (and more importantly why you missed them) to be able to avoid making the same mistakes again when you take the real test. That's why our CRRN Exam Practice Questions include answer keys with detailed answer explanations. These in-depth answer explanations will allow you to better understand any questions that were difficult for you or that you needed more help to understand.

How writers can make the best of even the worst criticism

Applying Social Cognition to Consumer-Focused Strategy, a book in the Advertising and Consumer

*Psychology series sponsored by the Society for Consumer Psychology, focuses on the most important recent developments at the interface of social cognition and marketing, and develops integrative theoretical frameworks with rich practical implications. More specifically, the chapters offer a novel and thought-provoking perspective on consumer-focused strategy--or the effects of marketing stimuli and activities on an integrated system of consumer processes and responses. Divided into four parts, this book: *offers new perspectives on consumer information processing, selective or one sided information processing, and attribution theory; *discusses how asking questions in focus groups, surveys, and experiments leads consumers to create opinions that would not have occurred to them otherwise; *advances a new approach for modeling uncertainty and a new framework for thinking about uncertainty; *summarizes recent developments concerning the Implicit Association Test and their implications for branding strategy; *develops a new approach for analyzing the effects of intention on behavior and unplanned purchase behaviors; *discusses the devaluation effect and shows both how implementation intentions can be used to increase new product consumption and also how promotion versus prevention regulatory focus influences consumer preferences; and *focuses on consumer information processing and persuasion. The text is intended for advanced graduate students, academics, and practitioners who embrace cutting-edge paradigms and methodologies in social-cognitive consumer research.*

Discusses what people understand about space and time and how science fiction is becoming less fictional as time goes on.

This portable manual provides a highly visual, rapid-reference resource that presents anesthesia in a practical and clinically-focused manner. Manual of Clinical Anesthesiology guides anesthesiologists in rapid and focused clinical decision making with its practical, clinically-focused chapters on anesthesia management. This highly formatted manual includes chapter summaries to highlight key points discussed within each chapter, color-coded sections to quickly identify information, and icons calling out pearls and pitfalls. Chapters are short and easy to read. The book includes four atlases for rapid reference: Atlas of Transesophageal Echocardiography, Atlas of Regional Anesthesia, Atlas of Anesthesia Procedures, and Crisis Management Cognitive Aids. There is also a Drug Dosing pull-out card for rapid reference. A section covering Anesthesia Phrases in Foreign Languages will enhance communication with non-English speaking patients in situations where an interpreter may not be available.

Identical twin sisters Payton and Emma Mills have "traded faces" and created "twin-dentical chaos" at school and at home. But you haven't seen anything yet. Payton and Emma are off to "twin-vade" New York City! Payton's drama club plans a field trip to see an off-Broadway show, and Emma's mathletes team will compete in an elite competition. Sounds twin-tastic! But Payton never imagined the star of the show would be Ashlynn, her old nemesis from summer camp whose chores Payton traded for designer clothes. Are Payton's "Summer Slave" days coming back to haunt her? Or will she be saved by a flip-flop twin swap?

Emma has her own nemesis to face—she and Jazmine James are on the same team. But teamwork? Not so much. Since Jazmine is in it to win it...will Emma have to “twin” it? Payton and Emma must do a ‘twins-formation’ to rescue each other again. And again! (Not again!) Toss in cute boys, crazy triplet poofy Pomeranian stage puppies, and New York City and things get a little twin-sane. Is the big city ready for Payton and Emma! (or is it Emma and Payton?) and their mixed-up mayhem? Which is which in the biggest twin switch yet!

This book traces Nava Shean's life on the stage, providing a first-hand account of life in Terezin concentration camp and the incredible artistic activity under the shadow of the transports to the death camps. It also portrays the author's reconnection with her Jewish heritage.

*Scientists are proving what Tibetan monks knew all along: there are real benefits to the pursuit of mindfulness. The practice of meditation, which includes living in the moment and being in touch with your emotions, can change your body and brain, keeping them fit, flexible and resilient as you age. TIME's special edition offers: * Mindfulness tips for everyone, from the novice to the lifetime meditator* The latest research on mindfulness, heart health and sleep* How to bring mindfulness into your day without having to sit still on a cushion.*

This book provides a comprehensive, up-to-date and accessible introduction to the philosophy of space and time. Ray considers in detail the central questions of space and time which arise from the ideas of Zeno, Newton, Mach, Leibniz and Einstein. Time, Space and Philosophy extends the debate in many areas: absolute simultaneity is examined as well as black holes, the big bang and even time travel. Time, Space and Philosophy will be invaluable to the student of philosophy and science and will be of considerable interest to mathematics students. The clear, non-technical approach should also make it suitable for the general reader.

Helene Masterson and Alexis Worth are stepsisters and best friends. When Helene lands a summer internship in London, Alexis tags along. To make their summer more interesting, the girls make a bet that one of them must hook Prince William by the end of the summer. When the girls meet Simon and Lazlo, they find their perfect matches, but will the boys get discouraged with the girls' royal distraction? In The Frog Prince, Helene and Alexis are off to Paris after Helene's estranged father invites her to stay for the summer. Helene and Alexis set out to catch the prince of Paris, chasing him all over town, but what if he turns out to be a toad?

Now both novels are available in one bind up just in time for a Royal Wedding!

Provides a guide to movies based on the emotions that they evoke, providing a look at the cinematic history behind nine emotions--joy, anger, desire, fear, sadness, exhilaration, regret, contempt, and wonder--along with a "food for thought" section for mo

Timegods' World

Time Series Analysis and Forecasting by Example

Surviving motherhood? It's all about having the right support network. Lawyer Cassie has a new baby, a husband who converses mainly through jokes, a best friend on the other side of the world, and a taskforce of Babycraft mums who make her feel she has about as much maternal aptitude as a jellyfish. Husband Jonathan dismisses Cassie's maternal anxieties, but is he really paying attention to his struggling wife? He's started sleep talking and it seems there's more on his mind than he's letting on. Then sexy, swaggering ex-boyfriend Malkie saunters into Cassie's life again. Unlike Jonathan, he 'gets' her. He'd like to get her into bed again, too... And on top of all her emotional turmoil, she also finds herself advising a funeral director on ghost protocol and becomes involved in an act of hotel spa fraud, never mind hiding cans of wasp spray all over the house to deal with the stalker who seems to be lurking everywhere she looks. Marriage and motherhood isn't the fairytale Cassie thought it would be. Will her strange new world fall apart around her or will tiny acts of love be enough to get her through? Funny, perceptive and real, *Tiny Acts of Love* portrays the rawness of motherhood, the flipside of love and the powerful lure of paths not taken. PRAISE FOR TINY ACTS OF LOVE 'A beautiful portrayal of the tribulations of becoming a new mum, it's a fantastic debut.' OK MAGAZINE 'Funny, poignant and honest, this is a cracker of a debut novel.' THE SUN 'With tear-provoking moments and chapters that will make you laugh out loud, this page-turner is impossible to put down.' CLOSER MAGAZINE (4 Stars) 'If you have ever been a new parent, every moment of this novel will resonate with you. If you have not, you are still in for a fantastic and invigorating peek into one fictional family's life ... Really cannot recommend this highly enough.' LIZLOVESBOOKS (Blog)

The Starship Titan continues on her outward voyage of discovery. Ranging farther and farther from Federation space, Captain William Riker and the crew look forward to living Starfleet's mission: seeking out new life, discovering new civilizations. Striking a "sandbank" -- a spatial distortion -- the Titan is knocked out of warp, her crew shaken up but uninjured. Titan has stumbled across a battlefield, and floating in it, shattered and in pieces, are the remains of a ship. Searching for survivors, they discover the ship never had a crew. The away team removes the computer core, looking for answers. Once the device is restored, it becomes clear this is not just a computer, but a thinking, reasoning artificial intelligence. It identifies itself as SecondGen White-Blue, and it comes from a civilization composed entirely of sentient computers. Eons ago these artificial intelligences were charged to be the first line of defense against The Null -- a destructive force so all-consuming that generation upon generation have waged unending war trying to find a way to beat back this terror. Captain Riker offers to assist them, but years of war have left the AIs distrustful and suspicious, especially of organics. The tide of the battle is turning, and The Null is winning. Set free, it will destroy everything in this system and then, unchecked, spread its mindless destruction into the heart of the Federation.

This book provides a comprehensive country overview of Southeast Asia's newest nation, Timor Leste (East

Timor). This book focuses on its cultural and ethno-linguistic diversity, and its political history from the pre-Portuguese period up to 2009. The book pays particular attention to the historical roots of the current challenges to nation-building by reviewing the Indonesian occupation; guerrilla warfare by the Timorese against the occupiers; the politics leading up to the United Nations' popular consultation and the vote for independence in 2002. Explaining the structure of the government and its parliamentary system, this book highlights the problems and historical and cultural underpinnings of the challenges Timor Leste faces in building a stable viable nation. The author presents a synopsis of selected issues including: language, truth and reconciliation, the Catholic Church's political activism, internal security problems, the 'politics of oil', and the fact that violent conflicts, from 2005 to date, have made it necessary for the United Nation's peacekeeping forces to return. Thus far, the book argues, Timor Leste's nation-building efforts have been hampered by the dynamic interaction of number of national and international factors. The first comprehensive political and cultural history of East Timor to date, this book fills a gap and will be an important single reference resource for students and researchers in the field of Southeast Asian Studies, Anthropology and Political Science.

Judith Whitman always believed in the kind of love that "picks you up in Akron and sets you down in Rio." Long ago, she once experienced that love. Willy Blunt was a carpenter with a dry wit and a steadfast sense of honor. Marrying him seemed like a natural thing to promise. But Willy Blunt was not a person you could pick up in Nebraska and transport to Stanford. When Judith left home, she didn't look back. Twenty years later, Judith's marriage is hazy with secrets. In her hand is what may be the phone number for the man who believed she meant it when she said she loved him. If she called, what would he say? To Be Sung Underwater is the epic love story of a woman trying to remember, and the man who could not even begin to forget.

" . . . A novel about an autistic boy whose drawings represent something much deeper than even the doctors who study can grasp; his father, serving 25 to life for murder; his mother, trying to hold herself together and fix her broken child. It's a supernatural journey of crime and punishment, retribution and redemption that ultimately leads to a father saving his son, a mother connecting with her child, and an American family reclaiming itself"--

Mac McKenzie is rich. So rich that he's left his job as a Twin Cities police officer and spends his time doing favors large and small for friends. So when an old Marine buddy of his father's

calls with a request Mac takes the time to help him out. And it is one of the stranger favors he's ever been asked: the elderly Mr. Mosley, a beekeeper, wants Mac to find out why his bees are suddenly dying in droves. Mac does some digging and before long turns up a hornet's nest of trouble in the person of Frank Crosetti, a new neighbor on the property abutting Mosley's bees. What started out as an innocent investigation into some unregulated pesticide quickly turns lethal. Crosetti sticks around long enough to make some very specific threats, then disappears into the wind leaving behind a vicious rape, a lifeless body, and a very angry McKenzie bursting for someone to blame. With only the faintest of trails to follow and a suspicious group of federal agents gunning for him, Mac dives underground, taking only a stash of cash and a small arsenal with him on his undercover mission. Before long Mac's deep in the forgotten corners of Minneapolis sniffing for any sign of Crosetti, unable to rest until he gets results. Combining engaging humor and wit with action-packed storytelling, Edgar Winner David Housewright's second Mac McKenzie novel is clever, compelling, and thoroughly enjoyable.

An intuition-based approach enables you to master time series analysis with ease Time Series Analysis and Forecasting by Example provides the fundamental techniques in time series analysis using various examples. By introducing necessary theory through examples that showcase the discussed topics, the authors successfully help readers develop an intuitive understanding of seemingly complicated time series models and their implications. The book presents methodologies for time series analysis in a simplified, example-based approach. Using graphics, the authors discuss each presented example in detail and explain the relevant theory while also focusing on the interpretation of results in data analysis. Following a discussion of why autocorrelation is often observed when data is collected in time, subsequent chapters explore related topics, including: Graphical tools in time series analysis Procedures for developing stationary, non-stationary, and seasonal models How to choose the best time series model Constant term and cancellation of terms in ARIMA models Forecasting using transfer function-noise models The final chapter is dedicated to key topics such as spurious relationships, autocorrelation in regression, and multiple time series. Throughout the book, real-world examples illustrate step-by-step procedures and instructions using statistical

software packages such as SAS®, JMP, Minitab, SCA, and R. A related Web site features PowerPoint slides to accompany each chapter as well as the book's data sets. With its extensive use of graphics and examples to explain key concepts, Time Series Analysis and Forecasting by Example is an excellent book for courses on time series analysis at the upper-undergraduate and graduate levels. it also serves as a valuable resource for practitioners and researchers who carry out data and time series analysis in the fields of engineering, business, and economics. Temporal and spatiotemporal data form an inherent fabric of the society as we are faced with streams of data coming from numerous sensors, data feeds, recordings associated with numerous areas of application embracing physical and human-generated phenomena (environmental data, financial markets, Internet activities, etc.). A quest for a thorough analysis, interpretation, modeling and prediction of time series comes with an ongoing challenge for developing models that are both accurate and user-friendly (interpretable). The volume is aimed to exploit the conceptual and algorithmic framework of Computational Intelligence (CI) to form a cohesive and comprehensive environment for building models of time series. The contributions covered in the volume are fully reflective of the wealth of the CI technologies by bringing together ideas, algorithms, and numeric studies, which convincingly demonstrate their relevance, maturity and visible usefulness. It reflects upon the truly remarkable diversity of methodological and algorithmic approaches and case studies. This volume is aimed at a broad audience of researchers and practitioners engaged in various branches of operations research, management, social sciences, engineering, and economics. Owing to the nature of the material being covered and a way it has been arranged, it establishes a comprehensive and timely picture of the ongoing pursuits in the area and fosters further developments.

Thirteen-year-old Napoleon Augustus Smythe (Battle Boy 005) is now Battle Agent 005. Along with BA004, BA009 and super soldier TEX, he is a member of Omega Squad - an elite team of Time Troopers sent back into history for Operation Battle Book. But Professor Perdu, their mission controller, is worried. Someone is stealing TIME and ENERGY bundles from the Battle Books. Someone is determined to sabotage Operation Battle Book. But who? And why? How to make it to the online big time! Titanium eBay® is for everyone who aspires to reach

From Marc Lecard, the critically acclaimed author of Vinnie's Head, comes a fast-paced crime story about an eccentric thug chasing after a piece of nano-technology and the scientist that created it. Aaron Rogell is a brilliant San Francisco scientist with a nanotech start-up, a beautiful wife, and a brand-new baby. But Aaron has an ugly little problem; he just can't keep it in his pants. Ignoring business and family, he spends most of his quality time with an upscale call girl named Aphrodite, a toothless street hooker, and other less presentable companions. But when one of Aphrodite's lowlife acquaintances--the fearsome Pablo Clench--learns that her new boyfriend has invented a miraculous technology that may be worth fabulous sums of money, life for Aaron Rogell will never be the same again. And soon, Aaron, his wife and child, the bad guys, and just about everyone else ends up with lots of tiny little troubles.

The adventures of a school teacher in 1927 who treks across the northern tundra to the remote gold-rush settlement of Chicken. Learn how to optimize the planning and administration of your employees' working times and activities using SAP ERP HCM Time Management. This detailed reference will teach you everything you need for understanding, implementing, and configuring Time Management. Beginning with an overview, the book progresses through the basics of implementation, including what is important during the blueprinting stage, and how to integrate Time Management with other components. From there it moves on to cover the segments of Time Management configuration and customization that an implementer will follow. It also includes design considerations on how to use each infotype and which infotypes are required based on particular decisions. In addition, the book offers insight into how to configure the particular components, and how the items of the configuration fit together. The book concludes with a chapter on more advanced topics, including incentive wages, concurrent employment, web applications, and security and authorizations.

There was no Reichstag fire. No storming of the Bastille. No mutiny on the Aurora. Instead, the mediocre have seized power without firing a single shot. They rose to power on the tide of an economy where workers produce assembly-line meals without knowing how to cook at home, give customers instructions over the phone that they themselves don't understand, or sell books and newspapers that they never read. Canadian intellectual juggernaut Alain Deneault has taken on all kinds of evildoers: mining companies, tax-dodgers, and corporate criminals. Now he takes on the most menacing threat of all: the mediocre. Includes Timediver's Dawn and The Timegod, tales reminiscent of the author's Fritz Lieber Change War stories and for particular appeal to fans of the Recluce tales. Original.

Fintan Buckley is a pleasant, rather conventional and unimaginative man, who works as a legal adviser in an import/export firm in Dublin. He lives in Howth and is married to Colette. They have two sons who are at university, and a small daughter. As he goes about his life, working and spending time with his family, Fintan begins to experience states of altered consciousness and auditory hallucinations, which seem to take him out of a linear experience of time. He becomes interested in how we remember or imagine the past, an interest triggered by becoming aware of early photography, particularly early colour photography. He also finds himself thinking more about his own past, including time spent holidaying in the north of Ireland as a child with his father's family. Over the years he has become distanced from them, and in the course of the novel this link is re-established and helps to bring him understanding and peace, although in a most unexpected way. Time Present and Time Past, Deirdre Madden's eighth novel for adults, is about time: about how not just daily life and one's own, or one's family's past, intersect with each other.

This companion volume to Easwaran's "Passage Meditation" brings the world's timeless wisdom within reach of the modern seeker. The author chooses texts that are positive, practical, and meaningful for readers today, making them suitable for study and meditation.

Once a creature is extinct, it's gone for ever, isn't it? Not any more - as a butterfly from the past proves. The physicist mother of Kizzy Rye and Fraser Rye has invented an amazing time machine that can travel back into the past, snatch a plant or animal now extinct and bring it

back into the present. It's a wonderful achievement, a real scientific breakthrough. But the machine - 'Rye's Apparatus' - has a horrifying potential. Suddenly Kizzy and Fraser find themselves caught up in a terrifying spiral of events - events that lead finally to a monstrous demand from a sinister and violent organization... WINNER OF THE 1995 EARTHWORM AWARD, 7-11 YEAR-OLD CATEGORY

This book provides a complete overview of timeshare development and operation models. The authors take a comprehensive look at the present and future of this growing segment of the hospitality industry, including specialized approaches to marketing, human resources, service quality, finance, legal considerations and professional ethics. Timeshare, or vacation ownership, is a relatively recent leisure phenomenon. It emerged in the late 1950s as a way to secure extra capital resources to fund property expansion. Shareholders had the right to use these properties on a regular basis. Although arrangements have grown in complexity and variation, the model allows for customers to buy rights to use a property for a fixed time period each year. Timeshare arrangements have experienced rapid international growth particularly in the last fifteen to twenty years and are now an important vacation arrangement. Most of the world's major hotel and resort developers now operate timeshare properties. Firms like Marriott, Hilton, Hyatt, Disney and Ramada have brought a new formality and legitimacy to timeshare development and operation. * Covers the fastest growing area in the hospitality industry * Takes operational approach the entire timeshare product, not just marketing & sales * Clarifies the mystery of the timeshare product, cuts through preconceptions

THE HIMALAYAS, 5000 BC: Commissioner Daiho is dead, but there's no question of foul play. The murder of a Home Timer is about as likely as unauthorized interference with the work of a Correspondent. . . . Isfahan, Arabia, 1029: Abu Ali was startled. He hadn't heard the stranger enter. The Correspondent was even more alarmed—his enhanced senses would have picked up the arrival of any normal human. Then the stranger spoke, and it was the language of the Home Time. Seconds later, Correspondent RC/1029's world went dark. The Home Time, 2000 Years Later: Field Operative Rico Garron is about to have a very bad day.

NOTHING IS MORE INTOXICATING- Reynaud St. Aubyn has spent the last seven years in hellish captivity. Now half mad with fever he bursts into his ancestral home and demands his due. Can this wild-looking man truly be the last earl's heir, thought murdered by Indians years ago? OR DANGEROUS- Beatrice Corning, the niece of the present earl, is a proper English miss. But she has a secret: No real man has ever excited her more than the handsome youth in the portrait in her uncle's home. Suddenly, that very man is here, in the flesh-and luring her into his bed. THAN SURRENDERING TO A DEVIL. Only Beatrice can see past Reynaud's savagery to the noble man inside. For his part, Reynaud is drawn to this lovely lady, even as he is suspicious of her loyalty to her uncle. But can Beatrice's love tame a man who will stop at nothing to regain his title-even if it means sacrificing her innocence?

To help TJ with a science fair, Gran introduces him to model rockets that actually fly, but his initial failure with rocket flight leaves him afraid to take any chances.

The extraordinary life of a former top model and television star. Tina Grenville always wanted to be an actress. Widowed at the age of 20, in mysterious and still unresolved circumstances, she was forced to find work as a housekeeper on a remote Hawke's Bay farm. Eventually able to move to Auckland with her young son, she became first a radio actress, then a leading photographic and catwalk model. One of Paddy's Girls, an elite stable of top models, in 1964 she won 'Model of the Year'. Encouraged to move to Australia, she was a resounding success, in demand with leading couturiers and top fashion magazines. Finally achieving her childhood ambition, she became a long-standing cast member on Logie award-winning series THE GODFATHERS. A regular guest on television game shows and Paramount telemovies, she stayed in Australia for 14 years before moving back to New Zealand in 1980, to host her own show, GOOD MORNING, for Northern television. A panellist on BEAUTY AND THE BEAST, with the legendary Selwyn Toogood, and a regular at Wellington's Downstage theatre, she has continued working as an actress, having recently completed a supporting role in the movie adaptation of Ronald Hugh Morrieson's work PREDICAMENT. This is her story - tragic, absorbing, funny, poignant and uplifting, and her insights into life, love and the lives of the lovely will have you laughing and crying in equal measure.

Titanic on Trial

Time Series Analysis, Modeling and Applications

To Be Sung Underwater

Time Thieves, The: Omega Squad 1

To Desire a Devil

Time of the Assassins

On 15 April 2012, it will be 100 years since the Titanic sank. Since that fateful night, stories about the sinking have become legendary – how the band played to the end, how lifeboats were lowered half-empty – but amongst the films, novels and academic arguments, only those who were there can separate truth from fiction. After the sinking, inquiries into the loss of 1,517 lives (out of 2,223 aboard) were held in both the UK and US. The proceedings produced 1,000 pages of transcripts. Some of the testimonies were inevitably less than impartial, but as a whole the transcripts represent the most thorough and complete account of the sinking, told in the voices of those who were there. For the first time these transcripts have been specially edited and arranged chronologically, so that they tell the story of the Titanic's sinking as a narrative, rather than a list of questions and answers in a courtroom. The witnesses are transformed into characters in a much bigger story, and the events are described from different perspectives of people in every part of the ship, from a stoker in the boiler room escaping his section before the watertight doors sealed behind him, to first class passengers trying to buy their way onto lifeboats. Capturing the disbelief, the chaos and the terror of the disaster, this unique book brings to life the tragedy through the voices of those who survived it.
