Thinking is characterized by a fundamental appreciation for the dynamic and complex nature of business. The best strategists go out of their way to tackle dilemmas rather than merely solve problems. They use opposition, creative tension, iteration and transcendence to get to the heart of issues and involve critical others in finding the best solutions. The authors demonstrate how to apply the 2 x 2 approach to a wide range of important business challenges.

personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO<sub>2</sub> emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. Lee is considered by many to be the greatest forensic scientist in the world. He gained widespread public recognition through his testimony in the televised O. J. Simpson trial. Since that time he has helped with the Jon Benet Ramsey case and the investigations of mass murder in Croatia. This book will take the reader through the entire investigative process of five murder cases, with Dr. Lee as the tour guide. The cases include: the O. J. Simpson case, in

which Dr. Lee's analysis of the blood evidence at the crime scene revealed that the Los Angeles Police Department had missed several blood drops on the back of Nicole Simpson, a footprint belonging to a second possible assailant, and the physical improbability of Mr. Simpson's climbing a fence to return to his home; the woodchipper murder, in which an Eastern Airlines pilot murdered his wife and then put her body through a woodchipper in an attempt to dispose of the remains; the Mathison murder, in which a veteran Hawaiian police sergeant claimed to have accidentally run over his wife after she fled the family van during a dispute; the Ed Sherman murder, in which a college English professor attempted to disguise the time of his wife's death by turning up the air conditioning unit in

their house and then using the alibi that he was away from the home sailing on the day the crime allegedly took place; and the McArthur murder, in which a police sergeant shot and killed his wife, but then tried to make it appear that she had accidentally killed herself. In each case, Dr. Lee presents in scientific detail how he investigated the murders, analyzed the evidence, and used techniques that played a critical role in bringing criminals to justice. He discusses how the criminalist examines blood spatter evidence and uses blood identification, DNA analysis, and other forensic technologies developed in the world's best laboratories. This is a fascinating insider's look by a world-renowned expert into the pursuit of justice in some of the most grisly criminal cases of recent times. Dr. Henry C. Lee

The phrase “an animal a thousand miles miles long,” attributed to Aristotle, refers to a sprawling body that cannot be seen in its entirety from a single angle, a thing too vast and complicated to be knowable as a whole. For Leath Tonino, the animal a thousand miles long is the landscape of his native Vermont. Tonino grew up along the shores of Lake Champlain, situated between Vermont’s Green Mountains and New York’s Adirondacks. His career as a nature and travel writer has taken him across the country,

but he always turns his eye back on his home state. “All along,” he writes, “I’ve been exploring various parts of the animal, trying to make a prose map of its body—not to understand it in a conclusive or definitive way but rather to celebrate it, to hint at its possibilities.” This fragmented yet deep search is the overarching theme of the twenty essays in *The Animal One Thousand Miles Long*. Tonino posits that geography, natural history, human experience, and local traditions, seasons, and especially atypical outings—on skis, bicycles, sleds, and boogie boards—can open us to a place and, simultaneously, open a place to us. He looks closely at the 262-mile

length of Vermont, but his underlying mission is to demonstrate our collective need to better understand the meaning of place, especially the ones we call home and think we know best. From Laredo to Jackson Hole, San Francisco to Burlington, his sensibility is applicable to us all. In his signature piece, “Seven Lengths of Vermont,” he traverses the length of the state in seven different ways—a twenty-day hike, 500 miles on bicycle, a thirty-six-ride hitchhiking tour, 260 miles in a canoe, ten days swimming Lake Champlain, a three-week ski trek, and a two-hour “vast and fast” flyover. He plots each route with blue ink on maps strung across his

office. “Each inky thread was an animal a thousand miles long,” he writes. “Vermont appeared before me as a menagerie.” What Bill Bryson's *A Walk in the Woods* did for the Appalachian Trail and Peter Mayle's *A Year in Provence* did for the South of France, Tonino's affinity for the land he calls home gives a new perspective on the Green Mountain State. His infectious love of the outdoors, the ground of everyday life, should inspire us to explore the places just outside our own front door.

Sets the standard for introducing the field of comparative politics This text begins by laying out a proven analytical framework that is accessible for students new to the field. The framework is then consistently implemented in twelve authoritative country cases, not only to introduce students to what politics and governments are like around the world but to also understand the importance of their similarities and differences. Written by leading comparativists and area study specialists, Comparative Politics Today helps to sort through the world's complexity and to recognize patterns that lead to genuine political insight.
