Dorotheus of Sidon, who appears to have lived in Alexandria, flourished in the first century AD. He wrote his Pentateuch (five books) on astrology in Greek, in verse. This translation, from 1976 by David Pingree, is from a fourth century Pahlavi (Persian) source. The first book is on the judgement of nativities. Book two concerns marriage and children. Book three is on the length of life. Book four is on the transfer of years, i.e., forecasting. Book five is on interrogations, i.e., electional

astrology. In this book are the earliest known astrological charts. Dorotheus bases much of his interpretative methods on the triplicity rulers, by day and by night. All fire signs have the same rulers. All earth signs have their rulers, as do air and water signs. He uses Egyptian terms. He, like the Greeks of his day, also uses the Dodecatemoria, which are the twelfths of a sign. And many, many lots, all defined. For the first time in this edition: Pingree's Preface newly translated. An appendix with charts in modern format. A complete table of terms and

triplicity rulers. A table to calculate Dodecatemoria. Newly reset to match Pingree's original 1976 edition. Written a century before Ptolemy, here is the mainstream of Greek astrology. It will handsomely repay study.

afterlife . . . and if one can find redemption, even in hell. STEEL by Tony Tremblay A young woman leads a group of survivors in a dangerous, dystopian world. THE CHRISTMAS SPIRIT by Rob Smales A mother-in-law explains how a holiday tradition got its decidedly spiritual start. " . . . a creepy yet heartfelt collection of horror and suspense that is entirely worth reading. Five out of five blood-spattered stars."

Jeanette Andromeda, horormade.com "The ingredients in these three tales form a rich stew with a bit of something for everyone: an unexpectedly spirited Christmas, a taste of post-apocalyptic treachery, and a view of hell that'll make you careful what you wish for. Eat hearty!"

occult study of reading character and disposition by the "period of birth", and the meaning of the number of each day and the influence of such things on human life. It will, I hope, be seen in reading these pages how perfect is the mechanism of the Universe, by which certain characteristics, and even details as to health, may be traced by a study of such things. In the present book I have drawn largely from

my own experiences in this study of character, and I may safely state that there is not a rule I have given concerning character tendencies or health, which has not been thoroughly verified by me in my own work, which has extended in a professional way over a period of more than forty years.
