

Triumph 2000 And 2 5 Pi Workshop Manual

This comprehensive restoration guide covers every model of Triumph from the first four-cylinder TR4s built in 1961 to the last six-cylinder TR6s of 1976. The detailed information is accompanied by more than 250 glorious color photos, allowing restorers, owners, potential owners, and enthusiasts to know exactly what the cars looked like the moment they rolled out of the factory.

A radical reexamination of the most extraordinary of ancient ceremonies, this book explores the magnificence of the Roman Triumph--but also its darker side, as it prompted the Romans to question as well as celebrate military glory. This richly illustrated work is a testament to the profound importance of the triumph in Roman culture--and for monarchs and generals ever since.

Automotive Industries

During the 1960s, the automobile finally secured its position as an indispensable component of daily life in Britain. Car ownership more than doubled from approximately one car for every 10 people in 1960 to one car for every 4.8 people by 1970. Consumers no longer asked "Do we need a car?" but "What car shall we have?" This well-illustrated history analyzes how both domestic car manufacturers and importers advertised their products in this growing market, identifying trends and themes. Over 180 advertisement illustrations are included.

Includes entries for maps and atlases.

Automobile Engineer

Imagine driving 16,000 miles in 25 days over some of the roughest terrain in the world, at altitudes up to 16,000 feet, where engines and lungs gasp for air. Imagine 500-mile speed trials over rocky mountain tracks, racing against the clock and 95 other cars. Imagine attempting this more than 50 years ago, without GPS or cell phones or modern safety equipment. In April 1970, 241 men and women from more than 20 nations did just that, setting out from London in cars ranging from a dune buggy to family sedans to Porsches, Rolls-Royces, camper vans and a Jeep Wagoneer, determined to get to Mexico City. Drawing on personal recollections of competitors, organizers, marshals and mechanics, this book recounts the ecstasies and agonies of perhaps the toughest endurance motorsports event ever--the London to Mexico World Cup Rally.
