

Triumph Bonneville T100 Workshop Manual

Triumph's Bonneville and its single-carbed sibling, the TR6, are two of the most revered models in all of motorcycling. Distinguished by their handsome lines and pace-setting performance, the Bonneville and Tiger ruled the streets and race tracks from their introduction in the late 1950s through Triumph's golden age in the 1960s. Devotion to the marque remained strong even as the sun slowly set on the company's fortunes in the late 1970s and early 1980s. The original Triumph's demise in 1983 simply served to cement the legendary status of its long-lived top guns, the Bonneville and TR6.

Triumph Bonneville: 60 Years is a celebration one of motorcycling's most iconic and beloved bikes. First manufactured in Great Britain in 1959, Triumph's legendary model resonates deeply with motorcycle enthusiasts worldwide who love its style, sound, performance, and undeniable coolness. It's no surprise that Triumph was Steve McQueen's favorite ride. The Bonneville's story is one of successes and challenges as Triumph grew steadily in the post-World War II decades to become America's most successful "import" motorcycle marque. Triumph won every championship worth winning, owned the world speed record for fifteen years, and wooed Hollywood's hottest stars. Bonneville was Triumph's halo machine, one of the highest performance motorcycles of the 1960s. However, as competing marques eventually eclipsed the Bonneville in the 1970s, Triumph management struggled, leading first to bankruptcy and then to the demise of the company in 1983. Triumph was resurrected by British industrialist John Bloor in the late 1990s to become a twenty-first century global success story, which includes a revived and thoroughly retro-contemporary Bonneville range.

Want to be an expert on Triumph's 350 and 500 unit-construction twins? Here is everything everything you need to know about these classic machines. Alongside the headline-grabbing bikes – the Bonneville and Trident – Triumph built a whole series of smaller 350/500cc machines, with all the style of their bigger brothers, but lighter in weight, easier to ride and now cheaper to buy. The Triumph 350/500s played a key role in the company's success through the 1960s, in North America as well as the UK. The range included everything from the original 350cc 3TA, a mild mannered tourer, to the final Daytona Tiger 500 (a modified version of which won the Daytona 500 race in 1967), and the TR5T trail bike. This comprehensive book covers the complete history of these bikes, with details of model variants, advice on buying and living with a Triumph 350/500, technical specifications, and a list of useful contacts.

1945 to 1955 (and later?) Models: An illustrated workshop manual covering Triumph twin-cylinder motorcycles from 1945 to 1955: This is a faithful reproduction of the Factory Workshop Manual No. 11, originally published in the US by Floyd Clymer. The major revision in the later pre-unit factory manuals was the addition of technical specifications for the T120 Bonneville (1959). Unfortunately, those revisions also included the deletion of repair data for rigid frame, sprung hub and 3T models. This makes the Factory Workshop Manual No. 11 the most comprehensive workshop manual available for pre-unit, twin-cylinder Triumph motorcycles up to and including 1962 models as it includes repair and maintenance data for the full line of rigid frame, sprung hub, swing-arm and 350cc models. Much more detailed than the owner's handbook, this manual provides the information necessary for the overhaul of engines, gear boxes, frames, swing-arm, forks, wheels, hubs, carburetors, electrics, etc., essential information for the enthusiast, owner or restorer of these classic motorcycles. Size: 5.5" x 8.5" with 224 pages and 84 illustrations, includes 8 pages of detailed technical specification charts and both an illustration index and a comprehensive index of contents. Applicable to the following models: 5T Speed Twin, T100 Tiger 100, TR5 Trophy, 6T Thunderbird, T110 Tiger 110 and 3T De-Luxe. Includes maintenance and repair data for the following engines: Twin Cylinder 350cc OHV, 500cc OHV and 650cc OHV.
