Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more. With its authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Even as the television industry experiences significant transformation and disruption in the face of streaming and online delivery, the television channel itself persists. If anything, the television channel landscape has become more complex to navigate as viewers can now choose between broadcast, cable, streaming, and premium services across a host of different platforms and devices. From Networks to Netflix provides the answer to that navigational need, helping students, instructors, and scholars understand these industrial changes through the lens of television. Through examination of emerging services like Hulu and Amazon Prime Video, investigation of YouTube channels and cable outlets like Fox and Comedy Central, and critiques of broadcast giants like ABC and PBS, this book offers a concrete, tangible means of exploring the foundations of a changing industry.

Mother Jones is an award-winning national magazine widely respected for its groundbreaking investigative reporting and coverage of social and environmental issues.

A Novel

A beginner's guide to podcasting for teachers, librarians, and school media specialists explains what podcasting is and discusses how to create podcasts as a tool for reaching out to students, faculty, library patrons, and the community.

This volume breaks new ground in television studies as the first booklength study of an individual televisionmaker. Thompson examines the work of Stephen J. Cannell, one of television's most prolific and successful producers. Thompson uses theories of film authorship, revised to take into account the polyauthorial nature of the medium, for application to television texts and provides close analysis of Cannell's programs including individual episodes of *The Rockford Files*, *The A-Team*, *The Greatest American Hero* and *Hunter*.

"All that we are arises with our thoughts. With our thoughts we make the world." Buddha
Certainty from Uncertainty is a powerful collection of undisputed facts that have the capacity to enhance our spiritual thoughts and expand our awareness of the reality of God's existence and the true presence of the human Soul. Certainty from Uncertainty examines the words and thoughts of many of the world's greatest philosophers, scientists, intellectuals, and metaphysicians and develops through their thoughts a compelling argument for the existence of God, the Soul, and the evolution of the human Soul to Omega Consciousness (a state of human consciousness in which the consciousness of God and humankind are identical). Dr. Prato takes the reader for a hand-in-hand walk with the world's greatest thinkers and intellectuals. Without a preaching to the choir tone, he appeals to skeptics and believers alike, presenting compelling evidence of God's existence from many of the brightest minds in our history outside the religious realm. What were the spiritual thoughts of Socrates, Plato, and Aristotle; of renowned scientists such as Charles Darwin, Albert Einstein, Niels Bohr, Werner Heisenberg, Henry Margenau, and many others nearly all Nobel Prize winners? What thoughts of God did Baruch Spinoza, Wilhelm Leibniz, Larry Dossey and David Bohm have in common? Does the history of the thoughts of these profound thinkers allow us to understand how they came to a near-identical belief in the Universal Presence? How do their thoughts coincide with the thoughts of the Prophet David when he wrote his timeless 23rd Psalm? Certainty From Uncertainty raises the veil on these magnificent intuitive connections. Of Certainty From Uncertainty Larry Dossey, M.D., author of *Healing Words* and *Recovering the Soul* says: The great task of a lifetime is to find our way to the Absolute or God, however conceived. This "spiritual text" is a guide for our time, which many people who are engaged in spiritual work will find immensely helpful. Peter Prato shows us there is a final common pathway uniting science, spirituality and healing. His message is about unity, which our age desperately needs to recover. Certainty From Uncertainty leads us through these esoteric thoughts, filled with mystery and wonder, into the realm of the miracle and the near-death experience, then to Omega Consciousness--a state of being where humans become fully integrated with the consciousness of God.

U.S. House of Representatives Detailed Statement of Disbursements

This title examines the remarkable lives of Mike Ramsay and Jim Barton and their work building the company TiVo. Readers will learn about each founder's background and education, as well as his early career. Also covered is a look at how TiVo operates, issues the company faces, its successes, and its impact on society. Color photos and informative sidebars accompany easy-to-read, compelling text. Features include a timeline, facts, additional resources, Web sites, a glossary, a bibliography, and an index. *Technology Pioneers* is a series in *Essential Library*, an imprint of ABDO Publishing Company.

Identifying the precise line between lawful premerger coordination and unlawful gun jumping under the relevant statutes can be challenging - in part because there is limited guidance available for counseling purposes. This volume provides both (1) the theoretical underpinnings for distinguishing lawful premerger coordination and unlawful gun jumping and (2) practical

advice, drawing upon a variety of resources.

This thorough update to Benjamin Compaine's original 1979 benchmark and 1982 revisit of media ownership tackles the question of media ownership, providing a detailed examination of the current state of the media industry. Retaining the wealth of data of the earlier volumes, Compaine and his co-author Douglas Gomery chronicle the myriad changes in the media industry and the factors contributing to these changes. They also examine how the media industry is being reshaped by technological forces in all segments, as well as by social and cultural reactions to these forces. This third edition of *Who Owns the Media?* has been reorganized and expanded, reflecting the evolution of the media industry structure. Looking beyond conventional wisdom and expectations, Compaine and Gomery examine the characteristics of competition in the media marketplace, present alternative positions on the meanings of concentration, and ultimately urge readers to draw their own conclusions on an issue that is neither black nor white. Appropriate for media practitioners and sociologists, historians, and economists studying mass media, this volume can also be used for advanced courses in broadcasting, journalism, mass communication, telecommunications, and media education. As a new benchmark for the current state of media ownership, it is invaluable to anyone needing to understand who controls the media and thus the information and entertainment messages received by media consumers.

Film and television create worlds, but they are also of a world, a world that is made up of stuff, to which humans attach meaning. Think of the last time you watched a movie: the chair you sat in, the snacks you ate, the people around you, maybe the beer or joint you consumed to help you unwind—all this stuff shaped your experience of media and its influence on you. The material culture around film and television changes how we make sense of their content, not to mention the very concepts of the mediums. Focusing on material cultures of film and television reception, *The Stuff of Spectatorship* argues that the things we share space with and consume as we consume television and film influence the meaning we gather from them. This book examines the roles that six different material cultures have played in film and television culture since the 1970s—including video marketing, branded merchandise, drugs and alcohol, and even gun violence—and shows how objects considered peripheral to film and television culture are in fact central to its past and future.

Grade-specific exercises and practice tests to prepare students for various standardized tests including the California Achievement Tests, the Iowa Tests of Basic Skills, and the Stanford Achievement Tests. Provides summaries and discussions of informal interpretations given by the Premerger Notification Office of the Federal Trade Commission and enforcement actions brought by the antitrust agencies regarding the premerger notification requirements of the Hart-Scott-Rodino Antitrust Improvements Act of 1976 and the Commission's implementing regulations.

Last year I addressed the Netherlands Comparative Law Association with the following question: 'Does Comparative Law Exist At All?' (My intention then was to flog the dead (?) horse of the merger of comparative law and the sociology of law.) In presenting this voluminous collection of Netherlands national reports to the eleventh congress of the International Academy of Comparative Law I feel my misgivings giving way to the suspicion, that comparative law indeed exists. Of course national reports do not, as such, prove the existence of comparative law. It is the general reports together with the national reports, which embody the comparative effort. That is why the Netherlands Comparative Law Association took the initiative to propose the publishing of the materials on a subject to subject basis instead of publishing collections of national reports. From a comparative legal point of view, it is the topic that should form the basis of the publication, and not the origin of the materials. The general reporter for each topic should be prepared to take up the responsibilities of editing the volume, and would have to be given the right to select those national reports which he considers to be useful both in regard to their quality and the relevance of the material to the basic problems in the questionnaire. This proposal met with very favourable comments from the national committees and general reporters of some fifteen countries.

This volume provides a survey of careers throughout the communications, media, and entertainment industries. Intended for readers interested in pursuing careers in media and entertainment.

In 1971, the Sloan Commission on Cable Communications likened the ongoing developments in cable television to the first uses of movable type and the invention of the telephone. Cable's proponents in the late 1960s and early 1970s hoped it would eventually remedy all the perceived ills of broadcast television, including lowest-common-denominator programming, inability to serve the needs of local audiences, and failure to recognize the needs of cultural minorities. Yet a quarter century after the "blue sky" era, cable television programming closely resembled, and indeed depended upon, broadcast television programming. Whatever happened to the Sloan Commission's "revolution now in sight"? In this book, Megan Mullen examines the first half-century of cable television to understand why cable never achieved its promise as a radically different means of communication. Using textual analysis and oral, archival, and regulatory history, she chronicles and analyzes cable programming developments in the United States during three critical stages of the medium's history: the early community antenna (CATV) years (1948-1967), the optimistic "blue sky" years (1968-1975), and the early satellite years (1976-1995). This history clearly reveals how cable's roots as a retransmitter of broadcast signals, the regulatory constraints that stymied innovation, and the economic success of cable as an outlet for broadcast or broadcast-type programs all combined to defeat most utopian visions for cable programming.

"Hacking the TiVo" provides a central, readable, and detailed guide to upgrading, maintaining, and enhancing TiVo systems. It clearly explains how to expand and upgrade the capabilities of both Series 1 and Series 2 TiVos from any Linux, Macintosh, or Windows PC.

Mona has just made a startling discovery: a trove of puzzling citations, all taken from the same book, *The Broken Teaglass*. Billy and Mona soon learn that no such book exists. And the quotations from it are far too long, twisting, and bizarre for any dictionary. They read like a confession, coyly hinting at a hidden identity, a secret liaison, a crime. As Billy and Mona ransack the office files, a chilling story begins to emerge: a story about a lonely young woman, a long-unsolved mystery, a moment of shattering violence. And as they piece together its fragments, the puzzle begins to take on bigger personal meaning for both of them, compelling them to redefine their notions of themselves and each other.

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

In these pages you will find the story of my life, an average shmuck who's looking for that special formula to make life meaningful. In a very haphazard way, I explored the different avenues to fulfillment, or perhaps more exactly, I willingly responded to the blow of the wind. It cost me several years of my life, my only chance at education, my relationship with my parents and my formerly acute senses, but it is my belief that God himself had a plan for my life, and I was just thick-skulled enough to need those times to learn how wrong my choices could be. In the end, He directed me to Himself, and I've never been the same since...
