An insider perspective on contemporary Mexico, this text examines the meaning of democracy in the lives of working-class residents in Mexico City in 2002. It provides a detailed, bottom-up exploration of what men and women think about national and neighbourhood democracy.

International Women's Year, a time to focus on the issues facing all members of the female sex on a global level. The capstone event of the year was the International Women's Year conference, dubbed "the greatest consciousness-raising event in history," held in Mexico City that summer. It attracted delegates from 133 countries, in addition to non-governmental organizations and press. The attendees included the famous--Betty Friedan, Jane Fonda, Angela Davis, and Soviet cosmonaut Valentina Tereshkova, among them;

Splits were anticipated between white, Western liberal feminists and "Third World"/Communist/indigenous women, but what emerged from the conference was a far more complex realization that sisterhood was not more powerful than the issues that divided women, among them economic inequality, prostitution, reproductive rights, professional

opportunities, Zionism, and disarmament. The conference was a major watershed in second-wave feminism, but in a larger sense, it marked the consolidation of transnational feminist organizing and a turning point in the role of NGOs in international activism, organizing, and governance. That this conference took place at the height of the Cold War, the Vietnam War, and the Arab-Israeli conflict, and raised issues then being debated in diplomatic settings, heightens the importance of the IWY conference. When the postwar boom began to dissipate in the late 1960s, Mexico's middle classes awoke to a new, economically terrifying world. And following massacres of students at peaceful protests in 1968 and 1971, one-party control of Mexican politics dissipated as well. The ruling Institutional Revolutionary Party struggled to recover its legitimacy, but

instead saw its support begin to erode. In the following decades, Mexico's middle classes ended up shaping the history of economic and political crisis, facilitating the emergence of neo-liberalism and the transition to democracy. Waking from the Dream tells the story of this profound change from state-led development to neo-liberalism, and from a one-party state to electoral democracy. It describes the fraught history of these tectonic shifts, as politicians and citizens experimented with different strategies to end a series of crises. In the first study to dig deeply into the drama of

In Citizens of Scandal, Vanessa Freije explores the causes and consequences of political scandals in Mexico from the 1960s through the 1980s. Tracing the process by which Mexico City reporters denounced official wrongdoing, she shows that by the 1980s political scandals were a common feature of the national media diet. News stories of state embezzlement, torture, police violence, and electoral fraud provided collective opportunities to voice dissent and offered an important, though unpredictable and inequitable, mechanism for political representation. The publicity of wrongdoing also disrupted top-down attempts by the ruling Partido Revolucionario Institucional to manage public

discourse, exposing divisions within the party and forcing government officials to grapple with popular discontent. While critical reporters denounced corruption, they also withheld many secrets from public discussion, sometimes out of concern for their safety. Freije highlights the tensions—between free speech and censorship, representation and exclusion, and transparency and secrecy—that defined the Mexican public sphere in the late twentieth century. African scholarly research is relatively invisible globally because even though research production on the continent is growing in absolute terms, it is falling in comparative terms. In addition, traditional metrics of visibility, such as the Impact Factor, fail to make legible all African scholarly production. Many African

Since 1990, when the phrase "education for all" was first coined at the World Bank conference in Jomtien, Thailand, a battle has raged over its meaning and its impact on education in Africa. In this thought-provoking new volume, Dr. Brock-Utne argues that "education for all" really means "Western primary schooling for some, and none for others." Her incisive analysis demonstrates how this construct robs Africans of their indigenous knowledge and language, starves higher education in Africa, and thereby perpetuates Western dominion. In Dr. Brock-Utne's

Higher education institutions (HEIs) have a unique role and responsibility for the future and for driving the development of a sustainable society. HEIs are charged with the task of fostering sustainability in the leaders of tomorrow, developing solutions and methods for addressing a sustainable future and ensuring that knowledge is contributed to society. HEIs must also ensure that their everyday operations and practices are

consistent with a sustainable future, and that they work toward holistically integrating sustainability into both the mission of a university and its daily tasks. This Special Issue builds on papers presented during the 2018 International Sustainable Campus Network Conference and also includes other contributions. The articles reflect the many aspects of sustainability in higher education institutions and illustrate innovation in approach, outcomes, and impact. The papers cover a range of perspectives on sustainability both on and around campuses. These include organization and management issues, networking and city partnership themes, and metrics and indicators related to sustainable development goals. The Special Issue also includes papers on education,

This book provides a first-hand account of the author's encounter as a social geographer, based on his field research and travels in Mexico and the Caribbean. The interlocutors of different classes and races introduce the reader to a variety of urban and rural communities, many of them involved in development projects. Two leitmotifs of the 1960s and 1970s recur throughout the volume: decolonization, state formation, and the quest for democracy in post-colonial societies of Mexico and the Caribbean; and the conditions which were likely to constrain or challenge these developments, quintessentially associated with the 1959 Cuban revolution, the cold war and student radicalism.

- How are research doctoral education and the research PhD degree evolving in different national contexts?
- How do researchers in early stage of their careers assess the value of doctoral education?
- What are the challenges of using international demographic data from existing PhD programs to analyze trends in doctoral education?
- What can happen when regional issues intersect with the need to evaluate doctoral education and ensure its quality? Which quality-assurance model has been gaining favor in PhD education, and what challenges does it pose?
- What accounts for the conflict between national interests and international collaboration?

neoclassical economists. In 1993, the Economist suggested that Mexico had the most economically literate government in the world--a trend that has continued since Mexico's transition to multiparty democracy. To the accompanying fanfare of U.S. politicians and foreign investors, these technocrats embarked on the ambitious program of privatization, deregulation, budget-cutting, and openness to free trade--all in keeping with the prescriptions of mainstream American economics. This book chronicles the evolution of economic expertise in Mexico over the course of the twentieth century, showing how internationally credentialed experts came to set the agenda for the Mexican economics profession and to dominate Mexican economic policymaking. It also reveals how the familiar language of Mexico's new experts overlays a professional structure that is still alien to most American economists. Sarah

Babb mines diverse sources--including Mexican undergraduate theses, historical documents, and personal interviews--to address issues relevant not only to Latin American studies, but also to the sociology of professions, political sociology, economic sociology, and neoinstitutionalist sociology. She demonstrates with skill how peculiarly national circumstances shape what economic experts think and do. At the same time, Babb shows how globalization can erode national systems of economic expertise in developing countries, creating a new class of "global experts."

The history of Mexico in the twentieth century is marked by conflict between church and state. This book focuses on the efforts of the Roman Catholic Church to influence Mexican society through Jesuit-led organizations such as the Mexican Catholic Youth Association, the National Catholic Student Union, and the Universidad Iberoamericana. Dedicated to the education and indoctrination of Mexico ' s middle- and

upper-class youth, these organizations were designed to promote conservative Catholic values. The author shows that they left a very different imprint on Mexican society, training a generation of activists who played important roles in politics and education. Ultimately, Espinosa shows, the social justice movement that grew out of Jesuit education fostered the leftist student movement of the 1960s that culminated in the Tlatelolco massacre of 1968. This study demonstrates the convergence of the Church, Mexico ' s new business class, and the increasingly pro-capitalist PRI, the party that has ruled Mexico in recent decades.
