A university is an institution for higher education and research. It can also be a place where academic brilliance leads to overinflated egos, bitter politics and finally, murder. Cirisha Narayanan, a professor who has risen meteorically, stumbles upon a cryptic message. Aditya Raisinghania, her banker husband, sets up a highly innovative financial hoax. Her profiteering father harvests Australia's largest bird—the emu—in India. The US elections are on and the debate on gun control has reached a fever pitch. Set in Mumbai, Coimbatore and Boston, Ravi Subramanian creates an impeccably researched world where everyone has a motive to kill. Nothing is as it seems in this cunningly vicious thriller where the plot turns on a dime.

“The names of places lie upon the land and tell us where we are or where we have been or where we want to go. And so much more.”—From the introduction Fifty years ago, educator and writer Robert E. Gard traveled across Wisconsin, learning the trivial, controversial, and landmark stories behind how cities, counties, and local places got their names. This volume records the fruits of Gard's labors in an alphabetical listing of places from every corner of Wisconsin, and the stories behind their often-unusual names. Gard's work provides an important snapshot of how Wisconsin residents of a bygone era came to understand the names of their towns and home places, many of which can no longer be found on any map.

Celebrated rural historian Jerry Apps introduces this reprint of Gard's work, saying that in “some ways The Romance of Wisconsin Place Names is a reference book, a place where you can go to learn a little more about your home town. But in many ways it is much more than that, for it includes the stories of places throughout the state, submitted by the people who knew them. It is a book where story, people, and place all come together.”

"In this book, the authors blend scientific knowledge and practical experience to provide a comprehensive overview of the principles, indications, and clinical techniques of plastic-esthetic periodontal and implant microsurgery, focusing especially on minimal soft tissue trauma and maximally perfect wound closure. Microsurgery provides clinically relevant advantages over conventional macrosurgical concepts for regenerative and plastic-esthetic periodontal surgery, especially in the all-important esthetic zone. The microsurgical principles and procedures presented in the book are explained step-by-step in meticulously illustrated case examples with large, exquisite images. Each case example also includes an illustrated armamentarium of the materials and instruments necessary for the practical implementation of the microsurgical procedure. The book concludes with instructions on how to manage all major complications for each procedure."--Publisher.

True love has no brakes. Running Under Caution, Book 1 Denny Clay never had much going for him, until the racing circuit took him out of the trailer park and away from his bigoted family. Luck smiled on him, and now he's settled down—in the closet—with his crew chief and boyfriend, Sully Price. Though they're winning races and the fight to keep their relationship secret, Denny can't shake the feeling he's going to have to pay up for all this happiness. He never imagined reckoning would come in the form of a rare medical condition that might cost him his career. And maybe Sully too. For once, Sully's at a loss, with nothing in his fix-everything toolbox designed to repair his broken lover—or stop Denny's inevitable slide into a black hole of self-loathing. With a little creativity and a few kinky accessories, Sully shifts into overdrive in the race to get Denny turned around. And prays that his stubborn persistence doesn't drive their love into a ditch. Warning: Broken heroes, hot sex, and one man's hardcore determination to keep his lover in one piece.

Penerbit: Airlangga University Press ISBN: 9786024737740 This book is the fourth compilation as a regular joint publishing effort since 2017 between Sultan Zainal Abidin University (UniSZA), Terengganu, Malaysia, and Airlangga University (UNAIR), Surabaya, Indonesia. Filled by lecturers and students, this book is expected to strengthen the relationship between the two universities and further strengthen the Malaysia-Indonesia relationship.

Al Biruni, one of the greatest Arab scholars, was born on September 4, 973, in what is now Uzbekistan. He showed talent at an early age and by his early 20's had written several acclaimed papers. Political unrest in his 20's and 30's found him at one point at Gurgan, on the shores of the Caspian Sea. Peace found him in Ghaznah, which is today in Afghanistan. From 1017 to 1030 he travelled extensively in India, becoming fluent in Sanskrit. From this he wrote his monumental survey, *India*, of the history, customs and beliefs of the subcontinent. His other books include *The Chronology of Ancient Nations*, the *Masudic Cannon*, *Book of Instructions*, and more than 100 others, some of which are lost. He died on December 13, 1048, aged 75. He is buried in Ghaznah. The *Book of Instruction in the Elements of the Art of Astrology* was written for Lady Rayhanah, to whom it is dedicated. R. Ramsay Wright, the translator, said it could be regarded as a primer of 11th century science. Among its highlights are a comprehensive list of more than 150 Lots, various forms of aspects and planetary relationships, planetary positions relative to the sun, an excellent text on rulerships as well as comprehensive notes on weather and meteorological phenomena. This book was unknown to medieval European astrologers. This edition, comprising the astrological part of the original (sections 347-530) has been taken from Wright's pioneering 1934 translation, itself taken from Persian and Arabic sources. For this edition, text and tables have been reset, and a new index added.

Around 550 B.C.E. the Persian people—who were previously practically unknown in the annals of history—emerged from their base in southern Iran (Fars) and engaged in a monumental adventure that, under the leadership of Cyrus the Great and his successors, culminated in the creation of an immense Empire that stretched from central Asia to Upper Egypt, from the Indus to the Danube. The Persian (or Achaemenid, named for its reigning dynasty) Empire assimilated an astonishing diversity of lands, peoples, languages, and cultures. This conquest of Near Eastern lands completely altered the history of the world: for the first time, a monolithic State as vast as the future Roman Empire arose, expanded, and matured in the course of more than two centuries (530–330) and endured until the death of Alexander the Great (323), who from a geopolitical perspective was “the last of the Achaemenids.” Even today, the

*remains of the Empire—the terraces, palaces, reliefs, paintings, and enameled bricks of Pasargadae, Persepolis, and Susa; the impressive royal tombs of Naqsh-e Rostam; the monumental statue of Darius the Great—serve to remind visitors of the power and unprecedented luxury of the Great Kings and their loyal courtiers (the “Faithful Ones”). Though long eclipsed and overshadowed by the towering prestige of the “ancient Orient” and “eternal Greece,” Achaemenid history has emerged into fresh light during the last two decades. Freed from the tattered rags of “Oriental decadence” and “Asiatic stagnation,” research has also benefited from a continually growing number of discoveries that have provided important new evidence—including texts, as well as archaeological, numismatic, and iconographic artifacts. The evidence that this book assembles is voluminous and diverse: the citations of ancient documents and of the archaeological evidence permit the reader to follow the author in his role as a historian who, across space and time, attempts to understand how such an Empire emerged, developed, and faded. Though firmly grounded in the evidence, the author’s discussions do not avoid persistent questions and regularly engages divergent interpretations and alternative hypotheses. This book is without precedent or equivalent, and also offers an exhaustive bibliography and thorough indexes. The French publication of this magisterial work in 1996 was acclaimed in newspapers and literary journals. Now *Histoire de l’Empire Perse: De Cyrus à Alexandre* is translated in its entirety in a revised edition, with the author himself reviewing the translation, correcting the original edition, and adding new documentation. Pierre Briant, *Chaire Histoire et civilisation du monde achéménide et de l’empire d’Alexandre*, Collège de France, is a specialist in the history of the Near East during the era of the Persian Empire and the conquests of Alexander. He is the author of numerous books. Peter T. Daniels, the translator, is an independent scholar, editor, and translator who studied at Cornell University and the University of Chicago. He lives and works in New York City.*

This book deals with the early development of Jainism in ancient Dakṣiṇa Kosala, the region that roughly corresponds to the modern state of Chhattisgarh, plus the districts of Sambalpur, Balangir and Kalahandi of Odisha (formerly Orissa). At the end of the sixth and the beginning of the seventh century, this region was under the control of the Pāṇḍava king Śivagupta alias ‘Bṛhadrjuna’ hailing from Śrīpura (the modern village of Sirpur), who was a great patron of religion. Epigraphical evidence, supported by archaeological remains, has shown that by the time of Śivagupta’s reign, which lasted for at least fifty-seven years, Dakṣiṇa Kosala was already a rich center of early Jainism. In the context of this setting the following research questions were formulated: what circumstances fostered the rise and development of Jainism in this area, and did the Skandapurāṇa, an important and contemporaneous religious scripture, play any role in that development? An answer to these questions would not only shed light on the religious processes at work in Dakṣiṇa Kosala, but would also touch upon the interplay of political, social, economic and geographical factors.

The dietary prohibitions in Leviticus 11 and Deuteronomy 14 represent one of the most detailed textual overlaps in the Pentateuch between the Priestly material and Deuteronomy, yet study of them is often stymied by the rare terminology. This is especially the case for the birds: their identities are shrouded in mystery and the reasons for their prohibition debated. Peter Altmann attempts to break this impasse by setting these flyers within the broader context of birds and flying creatures in the Ancient Near East. His investigation considers the zooarcheological data on birds in the ancient Levant, iconographic and textual material on mundane and mythic flyers from Egypt and Mesopotamia, as well as studying the symbolic functions of birds within the texts of the Hebrew Bible itself. Within this context, he undertakes thorough terminological studies of the expressions for the types of birds, concluding with possible reasons for their exclusion from the prescribed diet and the proposed composition-critical location for the texts in their contexts.

Mister B: Living with a 98-Year-Old Rocket Scientist, is a humorous 351 page compilation of scientific memoirs that matter in world history, for the cold war, and to aerospace. Like Forest Gump & Tuesdays with Morrie. What Aesop and his fables are to children, Mister B and his memoirs are to adults. Born in 1916, to a Polish speaking mother, Joseph Byk begins his early schooling in rope-tied-baggy-pants-poverty. He is every teachers' dreaded student. Ending his senior year at Woonsocket High, Rhode Island, however, he begs a high school counselor to help him make up the deficiencies in his missing math education. Why? Because, suddenly, he aspires to design vehicles that defy gravity. Mister B eventually helps design the space shuttle Gemini, the first moon landing gear for Apollo and the beginnings of Google Earth.

After "coming out" at school, sixteen-year-old Russel decides to take a counselor job at a camp for burn victims to get away from the antagonism of his classmates, but finds ten-year-old boys have just as many problems as he does.

Deals with the period beginning at the close of the Neolithic era, from around the eighth millennium before our era. This period of some 9,000 years of history has been subdivided into four major geographical zones, following the pattern of African historical research. Chapters 1 to 12 cover the corridor of the Nile, Egypt and Nubia. Chapters 13 to 16 relate to the Ethiopian highlands. Chapters 17 to 20 describe the part of Africa later called the Maghrib and its Saharan hinterland. Chapters 21 to 29, the rest of Africa as well as some of the islands of the Indian Ocean.--Publisher's description

Facing Mount Kenya, first published in 1938, is a monograph on the life and customs of the Gikuyu people of central Kenya prior to their contact with Europeans. It is unique in anthropological literature for it gives an account of the social institutions and religious rites of an African people, permeated by the emotions that give to customs and observances their meaning. It is characterised by both insight and a tinge of romanticism. The author, proud of his African blood and ways of thought, takes the reader through a thorough and clear picture of Gikuyu life and customs, painting an almost utopian picture of their social norms and the sophisticated codes by which all aspects of the society were governed. This book is one of a kind, capturing and documenting traditions fast disappearing. It is therefore a must-read for all who want to learn about African culture.

Nearly seven million Muslims live in the United States today, and their relations with non-Muslims are strained. Many Americans associate Islam with figures such as Osama bin Laden, and they worry about "homegrown terrorists." To shed light on this increasingly important religious group and counter mutual distrust, renowned scholar Akbar Ahmed conducted the most comprehensive study to date of the American Muslim community.

Journey into America explores and documents how Muslims are fitting into U.S. society, placing their experience within the larger context of American identity. This eye-opening book also offers a fresh and insightful perspective on American history and society. Following up on his critically acclaimed **Journey into Islam: The Crisis of Globalization** (Brookings, 2007), Ahmed and his team of young researchers traveled for a year through more than seventyfive cities across the United States—from New York City to Salt Lake City; from Las Vegas to Miami; from the large Muslim enclave in Dearborn, Michigan, to small, predominantly white towns like Arab, Alabama. They visited homes, schools, and over one hundred mosques to discover what Muslims are thinking and how they are living every day in America. In this unprecedented exploration of American Muslim communities, Ahmed asked challenging questions: Can we expect an increase in homegrown terrorism? How do American Muslims of Arab descent differ from those of other origins (for example, Somalia or South Asia)? Why are so many white women converting to Islam? How can a Muslim become accepted fully as an “American,” and what does that mean? He also delves into the potentially sticky area of relations with other religions. For example, is there truly a deep divide between Muslims and Jews in America? And how well do Muslims get along with other religious groups, such as Mormons in Utah? **Journey into America** is equal parts anthropological research, listening tour, and travelogue. Whereas Ahmed’s previous book took the reader into homes, schools, and mosques in the Muslim world, his new quest takes us into the heart of America and its Muslim communities. It is absolutely essential reading for anyone trying to make sense of America today. Built on the scarce, but not insignificant surviving materials of Andalusí Arabic, this work provides a synchronic descriptive survey as complete as possible of its basic grammar and lexicon, plus some diachronic comparative remarks, allowing the reader to obtain a near accurate picture of this subject-matter.

Readers will learn about every country from Afghanistan, 'Allah's Cat Box', to the Ukraine, 'The Bridebasket of Europe'. It is an invaluable tool for any reader interested in*

overthrowing a weakened government in East Asia or exploiting a developing nation in Africa. It is also a reference guide to 250,000 of the world's most important places, such as North Korea's Trench of Victory, the Great Human Pyramid of Egypt, and Saudi Arabia's superhighway, the Mohammedobahn. So if you want to know which is the sleepest country in Europe, which nation has the hottest queen, or where the rubble from previous conflicts is now buried under the debris of today's wars, OUR DUMB WORLD will provide the answers. Every country's pretensions are skewered, their hopes squashed and their fears laughed at. In short, by the end of this book, you will never be able to visit any country in the world without seeing it in an entirely new and hilarious light.

A breathtaking, enchanting new series by debut author Jessica Townsend, about a cursed girl who escapes death and finds herself in a magical world--but is then tested beyond her wildest imagination. Morrigan Crow is cursed. Having been born on Eventide, the unluckiest day for any child to be born, she's blamed for all local misfortunes, from hailstorms to heart attacks--and, worst of all, the curse means that Morrigan is doomed to die at midnight on her eleventh birthday. But as Morrigan awaits her fate, a strange and remarkable man named Jupiter North appears. Chased by black-smoke hounds and shadowy hunters on horseback, he whisks her away into the safety of a secret, magical city called Nevermoor. It's then that Morrigan discovers Jupiter has chosen her to contend for a place in the city's most prestigious organization: the Wondrous Society. In order to join, she must compete in four difficult and dangerous trials against hundreds of other children, each with an extraordinary talent that sets them

apart--an extraordinary talent that Morrigan insists she does not have. To stay in the safety of Nevermoor for good, Morrigan will need to find a way to pass the tests--or she'll have to leave the city to confront her deadly fate. This fast-paced plot and imaginative world has a fresh new take on magic that will appeal to a new generation of readers.

From a New York Times bestselling author: our beloved heroine battles a new evil as a strange, frightening illness takes hold of Nevermoor in this captivating and heart-pounding tale. Morrigan Crow and her friends have survived their first year as proud scholars of the elite Wondrous Society, helped bring down the nefarious Ghastly Market, and proven themselves loyal to Unit 919. Now Morrigan faces a new, exciting challenge: to master the mysterious Wretched Arts, and control the power that threatens to consume her. But a strange and frightening illness has taken hold of Nevermoor, turning infected Wunimals into mindless, vicious Unnimals on the hunt. As victims of the Hollowpox multiply, panic spreads. And with the city she loves in a state of fear, Morrigan quickly realizes it's up to her to find a cure for the Hollowpox, even if it will put her -- and everyone in Nevermoor -- in more danger than she ever imagined.

A chance meeting with a young man unleashes Rase's carefully hidden submissive and masochistic tendencies. It is as though Rase is awakened from a long sleep by one night of sex and violence that ends in unexpected tenderness and comfort.
