Intermodal Maritime Security: Supply Chain Risk Mitigation offers every stakeholder involved in international transactions the tools needed to assess the essential risks, threats and vulnerabilities within the global supply chain. The book examines the role intermodal maritime transportation plays in global security, surveying its critical policies, procedures, operations, infrastructure and systems. Linking new technological standards with intermodal operations, this book provides the foundational knowledge readers need, including transportation and maritime trade students, researchers, practitioners and regulatory agencies. Blends academic knowledge with real-world experiences Drawn from subject matter experts in academia, importers and exporters, transportation firms, and trade intermediaries Breadth of multidisciplinary coverage from maritime supply chains, port and maritime operations, as well as cyber and physical security

Born Edward Henry Harriman in 1848 of an ordained deacon father in the Presbyterian Church and well-connected socialite mother, Young Edward attended private school in New Jersey and New York, but dropped out at age 14 to take a job as a Wall Street errand boy. He moved up rapidly to become a managing clerk and, ultimately, became a stockbroker with a seat on the New York stock exchange. Harriman began investing his own money in railway stocks, and even married into a railroad family. In 1881, he bought his first railroad company outright in upstate New York and his name soon became synonymous with "railroad." Volume 1 of this two-volume biography includes Harriman's boyhood, early life and the founding of the first Boys' Club on the East Side of New York. Also covered in detail is his entrance into the railroad industry, and its reorganization and expansion across America. Information on his pioneering expedition to Alaska is included as well.

Corporate Mergers Transitioning the American Economy

*On 21–22 April 2010, the Asian Development Bank (ADB) organized a social protection conference in Manila. Interest in social protection has been growing since the global financial crisis heightened awareness of the many millions of people in Asia and the Pacific who live in poverty or vulnerable situations. Thus, policy makers are now keen to develop social protection systems that can assist people to both leave and stay out of poverty. The conference brought together people from ADB, its developing member countries, partner agencies, research institutes, and civil society organizations to exchange valuable experience and information and discuss ideas on how to develop social protection and expand it for the well-being of people in Asia and the Pacific. This book features selected papers from the conference that respond to the need for integrated and inclusive social protection to improve the quality of peoples' lives and livelihoods. Specific areas emphasized are health insurance, pensions, the informal sector, measures targeting children, and measuring and monitoring social protection.*

**NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT -- OVERSTOCK SALE -- Significantly reduced list price Summarizes and updates the current National Cooperative Soil Survey conventions for describing soils. Intended to be both current and usable by the entire soil science community. The text explores the types of soil techniques and includes a Field Equipment checklist with samples of common soil equipment as part of the field guide. The American economy continues to be driven by corporate mergers, buyouts, and activities in the junk bond market that few people understand. Good and bad business activities have a pronounced effect on all Americans, who are often being harmed by corporations large and small, as well as occasionally the government. Despite the problems we face, the concept of domestic tranquility and prosperity are values that can still be maintained or achieved. Jayson Reeves, an investor, business owner, and industrial engineer has worked with a variety of businesses, considers the complicated relationship between business and government a vital concern. The American transition of buyouts and the junk bond market effect on everyday people is a pivotal fact of resources. In this academic analysis, he focuses on examples of good and bad mergers; corporate raiders and the role they play in business; and ways junk bond markets are affecting the economy. Youll also gain observation about the Securities and Exchange Commission and the role it plays in the economy as well as the role terrorism is playing on international investments. Therefore discover how the economy works and how it can be improved with Corporate Mergers Transitioning the American Economy.

*In this monograph, the authors state that Russia planned the war against Georgia in August 2008 aiming for the annexation of Abkhazia, weakening the Saakashvili regime, and prevention of NATO enlargement. According to them, while Russia won the campaign, it also exposed its own military as badly needing reform. The war also demonstrated weaknesses of the NATO and the European Union security systems.*
