While Universal's Dracula and Frankenstein (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with The Last Warning, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and 'twisted mystery' films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows. Filmographic data for the film conclude the entry. Universal's The Shadow short film series is covered in an appendix. Many rare illustrations and movie posters are also included.

Rehabilitation should not stop when the disabled person is discharged from hospital, and many neurological patients require ongoing rehabilitation in order to maximize their functional abilities, minimize complications and promote full participation at home and in the community. This book analyses community rehabilitation needs from many different perspectives, including the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation schemes are presented, with evidence for their effectiveness, and case studies are used to highlight the main issues. The authors take an international view, and there are chapters dealing with the disabled child in the community and with neuropsychological rehabilitation. This important book examines the growing trend towards community rehabilitation in neurology and is directed towards all clinicians involved with neurorehabilitation. This simple tool children as well as parents and therapists helps youngsters identify their feelings, then engage their wise owl mind to accept or cope with intense or difficult emotions. On these pages, facial expressions depict a range of feelings and moods—from happy to sad, friendly to shy, hopeful to angry, and more—that can be matched to the child's current state of being. On the back of each card different strategies relevant to the card's particular feeling or mood are suggested, including asking for help, deep breathing, talking about feelings, finding a quiet place to calm down, and asking for a turn. 48 laminated pages. 6-1/2 wide x 7-3/4 high (16.5 cm wide x 19.7 cm high). This resplendent volume is the most comprehensive study of Walker Evans's work ever published, containing masterful images accompanied by authoritative commentary from leading photography historians. The name Walker Evans conjures images of the American everyman. Whether it's his iconic contributions to James Agee's depressionera classic book, Let Us Now Praise Famous Men, his architectural explorations of antebellum plantations, or his subway series, taken with a camera hidden in his coat, Evans's accessible and eloquent photographs speak to us all. This comprehensive book traces the entire arc of Evans's remarkable career, from the 1930s to the 1970s. The illustrations in the book range from his earliest images taken with a vest pocket camera to his final photos using the then new SX-70 because his regular equipment had become too heavy to carry around. The book includes commentary from three of Evans's longtime friends, photographers John T. Hill and Jerry Thompson and professor emeritus (Yale University) Alan Trachtenberg. Their insight and first-hand experience give depth to their critical writings on Evans's work. In addition to offering a broad perspective on Evans's work, the book also clarifies the photographer's "anti-art" philosophy. Eschewing aesthetic hyperbole, Evans wanted his pictures to resonate with a wide audience. At the same time, his natural curiosity made him one of the most inventive photographers of all time. What these photographs and writings attest to is a huge and timeless talent, which came not from a camera, but from Evans's uniquely hungry eye.

When Nancy Tucker was eight years old, her class had to write about what they wanted in life. She thought, and thought, and then, though she didn't know why, she wrote: 'I want to be thin.'! Over the next twelve years, she developed anorexia nervosa, was hospitalised, and finally swung the other way towards bulimia nervosa. She left school, rejoined school; went in and out of therapy; ebbed in and out of life. From the bleak reality of a body breaking down to the electric mental highs of starvation, hers has been a life held in thrall by food. Told with remarkable insight, dark humour and acute intelligence, The Time in Between is a profound, important window into the workings of an unquiet mind! a Wasted for the 21st century.

In Black Power TV, Devonah Heitner chronicles the emergence of Black public affairs television starting in 1968. She examines two local shows, New York's Inside Bedford-Stuyvesant and Boston's Say Brother, and the national programs Soul! and Black Journal. These shows offered viewers radical and innovative programming: the introspections of a Black police officer in Harlem, African American high school students discussing visionary alternatives to the curriculum, and Miriam Makeba comparing race relations in the United States to apartheid in South Africa. While Inside Bedford-Stuyvesant and Say Brother originated from a desire to contain Black discontent during a period of urban uprisings and racial conflict, these shows were re-envisioned by their African American producers as venues for expressing Black critiques of mainstream discourse, disseminating Black culture, and modeling Black empowerment. At the national level, Soul! and Black Journal allowed for the imagining of a Black nation and a distinctly African American consciousness, and they played an influential role in the rise of the Black Arts Movement. Black Power TV reveals how regulatory, activist, and textual histories are interconnected and how Black public affairs television redefined African American representations in ways that continue to reverberate today.

A memoir of hunger and hope

A study that discusses the construction of gender and Islamic identities in literary writing by four prominent Indonesian Muslim women writers: Titis Basino P I, Ratna Indraswari Ibrahim, Abidah El Kaliegy and Helvy Tiana Rosa.

The aim of Molecular and Nano Electronics: Analysis, Design and Simulation is to draw together contributions from some of the most active researchers in this new field in order to illustrate a theory-guided-approach to the design of molecular and nano-electronics. The field of molecular and nano-electronics has driven solutions for a post microelectronics era, where microelectronics dominate through the use of silicon as the preferred material and photo-lithography as the fabrication technique to build binary devices (transistors). The construction of such devices yields gates that are able to perform Boolean operations and can be combined with computational systems, capable of storing, processing, and transmitting digital signals encoded as electron currents and charges. Since the invention of the integrated circuits, microelectronics has reached increasing performance by decreasing strategically the size of its devices and systems, an approach known as scaling-down, which simultaneously allow the devices to operate at higher speeds. * Provides a theory-guided approach to the design of molecular and nano-electronics * Includes solutions for researchers working in this area * Contributions from some of the most active researchers in the field of nano-electronics

Meat Is for Pussies

Rineke Dijkstra (b. 1959) is one of the most prominent and internationally acclaimed artists working within the genre of photography and video portraiture. Her large-scale photographs show a rare sense of humanity, empathy and intimacy without any trace of sentimentality or indiscretion. Dijkstra typically captures her subjects at moments of transition or vulnerability, thus focusing on the thematic of identity. Though absolutely modern, even timeless, her portraiture brings to mind the great masters of the Golden Age of Dutch art. 'I try to capture something of the personality of these people,' Rineke Dijkstra explains, 'but at the same time extract something universal relating to humanity in general. There has to be enough space to make your own stories; to interpret a picture the way you want.' John Joseph wants men to know, in no uncertain terms, that they don't need to eat steak, burgers, wings, ribs, or any other animal product, for that matter, to be strong—in fact, he would argue, eating animals is for the weak. Because when your protein sources come from animals, you're missing out on all of the nutritional benefits of a plant-based diet—a diet that can make you more fit, more sexy, and more manly. In Meat Is for Pussies, Joseph presents a throw-down of information, offering both personal and scientific evidence that a plant-based diet offers the best path to athleticism, endurance, strength, and overall health. In addition to handily dispelling the myths surrounding meat, Joseph offers workout advice, a meal plan, and recipes that make going plant-based easy. Flavor and vitamin-packed options like the Working Man Stew and Veggie Chili with Cornbread will keep men's (and women's) bodies healthy and energized, while workouts that emphasize cardio and strength training build endurance and stamina and prove that you don't need meat to build muscle. Joseph also offers living proof that living a plant-based lifestyle is badass, from super-athlete Brendan Brazier to MMA champion Jake Shields to Joseph himself, who is an Ironman Triathlete and still rocking out (at the age of fifty-two) on world tours as the frontman for his legendary band the Cro-Mags. Joseph's passion for educating the world about the benefits of a plant-based diet comes through on each page, in a voice and a vocabulary that is uniquely his own. At the end of the day, he wants readers to live a long, healthy, happy life . . . and he won't take no for an answer.

This book is a one-stop source of information regarding Epidemiology, providing readers with the knowledge about advanced study and practices of Epidemiology. It is a compilation of research works by different experts providing an overview on specific subjects related to epidemiology. It exemplifies some of the interests, applications and views of the epidemiology across different areas of research and practice. Unlike the comprehensiveness and coherence of a conventional textbook, readers will find a few independent topics, each of them with substantial information in specialized areas within epidemiology. They discuss the contrast between the effort to extend the limits of applicability of epidemiological research and the "regular" scientific operations in the field of applied epidemiology. This book will prove to be a valuable and inspiring source of reference for all experts in the field of epidemiology.

If a picture is worth a thousand words, then it's a good bet that at least half of those words relate to the picture's copyright status. Art historians, artists, and anyone who wants to use the images of others will find themselves awash in byzantine legal terms, constantly evolving copyright law, varying interpretations by museums and estates, and despair over the complexity of the whole situation. Here, on a white—not a high—horse, Susan Bielstein offers her decades of experience as an editor working with illustrated books. In doing so, she unravels the threads of permissions that have ensnared scholars, critics, and artists for years. Organized as a series of "takes" that range from short sidebars to extended discussions, Permissions, A Survival Guide explores intellectual property law as it pertains to visual imagery. How can you determine whether an artwork is copyrighted? How do you procure a high-quality reproduction of an image? What does "fair use" really mean? Is it ever legitimate to use the work of an artist without permission? Bielstein discusses the many uncertainties that plague writers who work with images in this highly visual age, and she does so based on her years navigating precisely these issues. As an editor who has hired a photographer to shoot an incredibly obscure work in the Italian mountains (a plan that backfired hilariously), who has tried to reason with artists' estates in languages she doesn't speak, and who has spent her time in the archival trenches, she offers a snappy and humane guide to this difficult terrain. Filled with anecdotes, asides, and real courage, Permissions, A Survival Guide is a unique handbook that anyone working in the visual arts will find invaluable, if not indispensable.
