**disciplines including genomics, spatial data, data linkage, epidemiology, health informatics, big data, predictive analytics and communications. The hope is that these new technologies will strengthen preventive health, improve access to health care, and reach disadvantaged populations in all areas of the world. But what are the downsides and what are the risks, and how can we ensure the benefits flow to those population groups most in need, rather than simply to those individuals who can afford to pay? This is the first collection of theoretical frameworks, analyses of empirical data, and case studies to be assembled on this topic, published to stimulate debate and**

alone, he still wonders where it all went wrong. Until he meets Celeste . . . Only twenty-three and new to London, the fresh-faced young woman has given Buffy, the hopeless romantic, a new lease on life. But, unknown to Buffy, Celeste has her own agenda. She begins to delve into his past, but discovering each ex-wife leads to another one—not to mention the women on the side. And though Celeste may be in over her head, what is revealed to her will transform her life—and give both her and Buffy a chance to get it right this time around. Praise for Deborah Moggach “Deborah

### Architecture

For over forty years much of the world was held captive by a conflict between two wholly incompatible economic ideologies--capitalism and communism--and the two primary superpower countries who practiced them, the United States and the Soviet Union. Written in accessible language for readers with little or no previous knowledge about the subject, this work is first a general history of the Cold War, with an overview of its root causes and the policies and theories that were in place from 1947 through 1990. A thoroughly
