Since the internet speeds went above the 500kbps mark, the number of things people can do with their interconnected devices skyrocketed. Automated homes, connected cars, and internet enabled TVs. The latter is what threatens to revolutionize the entertainment world as we know it, do away with cable TV and abolish the need for expensive blue-ray players. Even though smart TVs are so lucrative, most people find them either too costly, or limiting. The alternative would be going for a TV with an HDMI port, a USB port and purchasing a dongle to bring in the power of internet TV. Chromecast is one of the best and cheapest such tools in the market.

We all have heard of and used "user manuals." A user manual is a document to assist a user in using and working with a piece of equipment or software product. They are developed to guide the user so that they will have less problems and be more successful in using the product. What if every person came with a user manual? A guide that explains who they are and how to work with them? A few words that would provide insight into who they are and what you can do to connect with them better. The opportunity for creating greater understanding and opening productive, and transformational, conversations then becomes more possible. Better conversations lead to better relationships. Better relationships allow an environment of innovation and productivity. Trustful relationships in teams are at the foundation of psychologically safe work places. The latest research shows a direct correlation between trust and performance.The User Manual of Me is an online tool and companion workbook's purpose is to assist you in a personal brand statement to help others understand who you are, what you value, and how you like to work.
