The March 2018 British National Formulary (BNF 75) is your essential reference book for prescribing, dispensing, and administering medicines.

A tale inspired by the affair between Sigmund Freud and his sister-in-law depicts the struggles of Minna Bernays, an educated woman uninterested in conventional women's roles who becomes fascinated with her brother-in-law's pioneering theories.

Brilliantly evoking the long-vanished world of masters and servants portrayed in Downton Abbey and Upstairs, Downstairs, Margaret Powell's classic memoir of her time in service, Below Stairs, is the remarkable true story of an indomitable woman who, though she served in the great houses of England, never stopped aiming high. Powell first arrived at the servants' entrance of one of those great houses in the 1920s. As a kitchen maid - the lowest of the low - she entered an entirely new world; one of stoves to be blacked, vegetables to be scrubbed, mistresses to be appeased, and bootlaces to be ironed. Work started at 5.30am and went on until after dark. It was a far cry from her childhood on the beaches of Hove, where money and food were scarce, but warmth and laughter never were. Yet from the gentleman with a penchant for stroking the housemaids' curlers, to raucous tea-dances with errand boys, to the heartbreaking story of Agnes the pregnant under-parlormaid, fired for being seduced by her mistress's nephew, Margaret's tales of her time in service are told with wit, warmth, and a sharp eye for the prejudices of her situation. Margaret Powell's true story of a life spent in service is a fascinating "downstairs" portrait of the glittering, long-gone worlds behind the closed doors of Downton Abbey and 165 Eaton Place.

Where did we lose our idealism and why and at what cost?' In these conversations with people of a younger generation Mamphela Ramphela responds to the growing despair among young South Africans about the cracks that are appearing in our system of governance and threatening the idealism of the country that reinvented itself with the dawn of democracy in 1994. She shows incisively how successive post-apartheid ANC governments have betrayed the nation for a culture of impunity among those close to the seat of power, where corruption goes unremarked and accountability has been swept aside. Enduring poverty, inequity and a failing public service, most notably in health and education, are the results.

At once challenging and encouraging, Ramphela urges young South Africans - our future leaders - to set aside their fears; to take control of their rights and responsibilities as citizens in upholding the values of the constitution; and to confront the growing inequality that is undermining good governance, social justice and stability.

The rewards of carefully chosen alternative investments can be great. But many investors don't know enough about unfamiliar investments to make wise choices. For that reason, financial advisers Larry Swedroe and Jared Kizer designed this book to bring investors up to speed on the twenty most popular alternative investments: Real estate, Inflation-protected securities, Commodities, International equities, Fixed annuities, Stable-value funds, High-yield (junk) bonds, Private equity (venture capital), Covered calls, Socially responsible mutual funds, Precious metals equities, Preferred stocks, Convertible bonds, Emerging market bonds, Hedge funds, Leveraged buyouts, Variable annuities, Equity-indexed annuities, Structured investment products, Leveraged funds The authors describe how the investments work, the pros and cons of each, which to consider, which to avoid, and how to get started. Swedroe and Kizer evaluate each investment in terms of: Expected returns Volatility Distribution of returns Diversification potential Fees Trading and operating expenses Liquidity Tax efficiency Account location Role in an asset-allocation program Any investor who is considering or just curious about investment opportunities outside the traditional world of stocks, bonds, and bank certificates of deposit would be well-advised to read this book.

The Dalai Lama advises us to gain familiarity with the process and practices of death so that when we are physically weak, our minds can still be focused in the right direction, and in the right manner. Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

A medieval knight turned private investigator is joined by Geoffrey Chaucer in his latest case featuring "clever twists and convincing period detail" (Publishers Weekly). Private investigator and former knight Crispin Guest faces his most complicated case yet when he witnesses a body fall from London bridge into the frigid River Thames. Though the man's death is declared a suicide, Guest sees evidence of foul play. His investigation leads him to Sir Thomas Saunfayl, an old acquaintance from his knighthood days. It seems the dead man was bargaining with Sir Thomas for the Spear of Longinus, the weapon used to pierce the side of Christ on the Cross, which grants invincibility to its owner. After his friend Geoffrey Chaucer arrives in London, all too eager to help find the spear, Guest finds himself trying to solve a conundrum of many parts, all centered around the same dangerous and coveted relic. With evocative period detail and an unforgettable cast of characters, Blood Lance was a Kirkus Reviews "Top 10 Hot Crime Novels" of Fall 2012. "A lively tale of historical interest smoothly combined with a worthy mystery."

The present volume on Methods and Applications of Nonlinear Dynamics arose mainly from lectures given at the First International Course on Nonlinear Dynamics, which took place in Medellin, Colombia, on 1-5 September 1986. The aims of the Course were to discuss some of the fundamental theoretical ideas of modern nonlinear dynamics and their application to selected areas of physics, and also to help the participants to bridge the gap between textbook presentations and the contemporary research literature. The lectures were intended for and delivered to a PhD-level audience composed of physicists and mathematicians. They were not primarily intended for experts, but rather for scientists interested in performing experimental or theoretical research on nonlinear dynamical phenomena occurring in real physical systems.

The Battle of Midway is traditionally held as the point when Allied forces gained advantage over the Japanese. In *Islands of Destiny*, acclaimed historian and military intelligence expert John Prados points out that the Japanese forces quickly regained strength after Midway and continued their assault undaunted. Taking this surprising fact as the start of his inquiry, he began to investigate how and when the Pacific tide turned in the Allies' favor. Using archives of WWII intelligence reports from both sides, Prados offers up a compelling reassessment of the true turning in the Pacific: not Midway, but the fight for the Solomon Islands. Combat in the Solomons saw a series of surface naval battles, including one of the key battleship-versus-battleship actions of the war; two major carrier actions; daily air duels, including the aerial ambush in which perished the famous Japanese naval commander Admiral Yamamoto Isoroku; and many other hair-raising exploits. Commencing with the Allied invasion of Guadalcanal, Prados shows how and why the Allies beat Japan on the sea, in the air, and in the jungles.

The Good, the Flawed, the Bad, and the Ugly

Demonstrates the remarkable similarities between Node.js and PHP, and teaches readers how to port an entire PHP web application to Node.js.

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

"Like Muir himself, *Essential Muir* packs an astounding range of experience into a lithe frame: ecstatic yet scientific descriptions of Yosemite; the heartrending tale of that "wee, hairy, sleekit beastie," Stickeen; reflections on the society of Eskimos; Muir's touching tribute, after a lifetime of wonder, to the mighty baobab trees of Africa; and more. Fred D. White's selection from Muir's writings, and his illuminating commentary, reveal the coherence and drama of a remarkable life: new readers will understand why Muir has become an American icon, and readers who are familiar with his work will be delighted with this fresh look. Muir's fierce love of all of nature, from squirrels to glaciers (but perhaps not sheep), continues to inspire us nearly a century after his death."--Book jacket.
