A chilling exposé of the international effort to minimize the health and environmental consequences of nuclear radiation in the wake of Chernobyl. Dear Comrades! Since the accident at the Chernobyl power plant, there has been a detailed analysis of the radioactivity of the food and territory of your population point. The results show that living and working in your village will cause no harm to adults or children. So began a pamphlet issued by the Ukrainian Ministry of Health—which, despite its optimistic beginnings, went on to warn its readers against consuming local milk, berries, or mushrooms, or going into the surrounding forest. This was only one of many misleading bureaucratic manuals that, with apparent good intentions, seriously underestimated the far-reaching consequences of the Chernobyl nuclear catastrophe. After 1991, international organizations from the Red Cross to Greenpeace sought to help the victims, yet found themselves stymied by post-Soviet political circumstances they did not understand. International diplomats and scientists allied to the nuclear industry evaded or denied the fact of a wide-scale public health disaster caused by radiation exposure. Efforts to spin the story about Chernobyl were largely successful; the official

death toll ranges between thirty-one and fifty-four people. In reality, radiation exposure from the disaster caused between 35,000 and 150,000 deaths in Ukraine alone. No major international study tallied the damage, leaving Japanese leaders to repeat many of the same mistakes after the Fukushima nuclear disaster in 2011. Drawing on a decade of archival research and on-the-ground interviews in Ukraine, Russia, and Belarus, Kate Brown unveils the full breadth of the devastation and the whitewash that followed. Her findings make clear the irreversible impact of man-made radioactivity on every living thing; and hauntingly, they force us to confront the untold legacy of decades of weapons-testing and other nuclear incidents, and the fact that we are emerging into a future for which the survival manual has yet to be written.

Manual for Survival: A Chernobyl Guide to the Future

Ordinary people's everyday political behavior can have a huge impact on national policy: that is the central conclusion of this book on Vietnam. In telling the story of collectivized agriculture in that country, Benedict J. Tria Kerkvliet uncovers a history of local resistance to national policy and gives a voice to the villagers who effected change. Not through open opposition but through their everyday political behavior, villagers individually and in small, unorganized groups undermined collective farming and frustrated authorities' efforts to correct the problems. The Power of Everyday Politics is an authoritative account, based on extensive research in Vietnam's National Archives and in the Red River Delta countryside, of the formation of collective farms in northern Vietnam in the late 1950s, their enlargement during wartime in the 1960s and 1970s, and their collapse in the 1980s. As Kerkvliet shows, the Vietnamese government eventually terminated the system, but not for ideological reasons. Rather, collectivization had become hopelessly compromised and was ultimately destroyed largely by the activities of villagers. Decollectivization began locally among villagers themselves; national policy merely followed. The power of everyday politics is not unique to Vietnam, Kerkvliet asserts. He advances a theory explaining how everyday activities that do not conform to the behavior required by authorities may carry considerable political weight.

When it was first published twenty years ago, The Bedford Guide for College Writers brought a lively and innovative new approach to the teaching of writing. Since that time, authors X. J. and Dorothy M. Kennedy have won praise for their friendly tone and their view, apparent on every page of the text, that writing is the "usually surprising, often rewarding art of thinking while working with language." More recently, experienced teacher and writer Marcia F. Muth joined the author team, adding more practical advice to help all students — even those underprepared for college work — become successful academic writers. While retaining the highly praised "Kennedy touch," The Bedford Guide continues to evolve to meet classroom needs. The new edition does even more to build essential academic writing skills, with expanded coverage of audience analysis, source-based writing, argumentation and reasoning, and more.

Reviews of more than 190 automobiles, four-wheel drive vehicles, and compact vans are accompanied by specification data, the latest prices, and recommendations, as well as lists of warranties, and tips on financing and insurance.

This book is informative and easy to read... ideal for those who are not familiar with research in those field." - Miyoung Oh, Sheffield Hallam University "This book would be useful for any leisure, sport, or tourism student who has no previous knowledge of research methods. Its style and language make it particularly useful for first year students in degree or diploma programs." - Annals of Tourism Research "The style of writing is wonderfully clear and the author explains areas such as sampling and significance in a much better way than many very well known texts. It will be an incredibly useful book for students." - Malcolm Williams, University of Plymouth What are the essential research methods for students studying leisure, sport and tourism? What are the main benefits in competing research methods, and how can you avoid gremlins in the research process? This is a comprehensive and informative book written especially for new and inexperienced researchers in the fields of leisure, sport and tourism. Unlike generic research texts that do not 'speak' to people in this field, this book uses subject-specific examples and explains the central methodological issues in straightforward terms. By showing students what they can do to assess, manage and reduce the time they spend on research Researching in Leisure, Sport and Tourism: The Essential Guide will help them achieve a better balance in their course work.
