This book covers American Sports Cars built in limited numbers, over a limited number of years. They were built in an effort to rival the best of sports cars from the UK and Europe and were also for a time rivals to Americas only continuously built sports car, the Corvette.

The Street Fighters True muscle cars make no apologies. They had one primary job: get the driver from Point A to Point B as fast as law, and the driver's driving ability, would allow. They started off in the early 1960s as mid-size sedans and coupes stuffed with oversized engines - Bel Airs, Catalinas, and Tempests - and it wasn't long before crazy hi-po machines came in all shapes in sizes. Mustangs, Camaros, Chargers, Chevelles, 4-4-2s, Gran Sports ... they all had one thing in common: big engines, and big performance. In Nothin' But Muscle, you'll find 199 of the greatest American performance cars ever built. From the earliest 1964 GTO, to the Shelby-built muscle/racers of the late-â€ˆ60s, to the ferocious Buicks of the 1980s and 500-plus-hp Viper and Corvette rocketships of today. Nothin' But Muscle brings you the most memorable and beloved pavement eaters ever seen on American soil.

Combining coverage of the key concepts and tools within phonetics and phonology with a systematic introduction to Praat, this textbook provides a lively and engaging 'way in' to the discipline. The author first covers the fundamentals of the articulatory and acoustic aspects of speech and introduces Praat as the main tool for examining and visualising speech. Next, the unit of analysis is gradually expanded (from syllables to words to turns and dialogues) and excerpts of real dialogues exemplify the core concepts for discovering how speech works. The final part of the book brings all the concepts and notions together with commentaries to the transcription of several short excerpts of dialogues. This book will be essential reading for students on undergraduate courses in phonetics and phonology.
