features two prominent changes:

- The term physical literacy underpins the standards. It encompasses the three domains of physical education (psychomotor, cognitive, and affective) and considers not only

physical competence and knowledge but also attitudes, motivation, and the social and psychological skills needed for participation. •

Grade-level outcomes support the national physical education standards.

These measurable outcomes are organized by level (elementary, middle, and high school) and by standard. They provide a bridge between the new standards and K-12 physical education curriculum development and

the book showed

phonics and spelling instruction. Word Matters presents essential information on designing and implementing a high-quality, systematic literacy program to help children learn about letters, sounds, and words. The central goal is to teach children to become "word

Where similar books are narrow in focus, *Word Matters* presents the theoretical underpinnings and practical
