

**Viva Practice For The Frsruol Examination Masterpass Series Paperback**

*This unique collection of multiple choice questions (MCQs) is specifically written to help surgical trainee candidates prepare for Part One of the FRCS general surgery exit examination, which features MCQs on general surgery. The book helps candidates gauge the types of questions likely to be asked and the extent of preparation required for this examination. The wide range of surgical topics covered, including general surgery and emergency surgery in addition to endocrine, vascular, upper GI, hepatobiliary, colorectal and transplant surgery, also makes it a useful revision text for MRCS examination candidates.*

*The aim of this book is to provide a selection of representative MCQs together with a detailed explanation of each answer covering the topic in depth. Each chapter has been written by experienced Urological surgeons who have already been successful in passing the examination. In addition to the FRCS(UroI) examination MCQs form the basis of equivalent postgraduate Urological examinations internationally and the scope of this book will be an invaluable addition to individuals sitting the FEBU and similar exams in the USA, Australia and Asian countries. Established consultants may also find the text useful as a 'refresher' in areas outside their subspecialist interest.*

*Operative Orthopaedics is a definitive and comprehensive guide to elective orthopaedic surgery for trainees preparing for FRCS and surgeons at MRCS level. With the emphasis on techniques employed and the reasoning behind them, this book is both a practical instruction manual and a revision tool. Based on the authoritative 'Stammore course' run by the Royal National Orthopaedic Hospital Operative Orthopaedics covers all aspects of elective orthopaedic surgery as assessed by the FRCS Higher Specialty exams. Surgery of the upper limb, lower limb and spine is explained from preoperative planning through technique and potential complications. Specialist areas such as tumour surgery, paediatric surgery and limb reconstruction are also included. Each chapter concludes with key references and sample viva voce questions and answers to extend and reinforce learning.*

*A sound knowledge of basic sciences is vital for any doctor with an interest in ophthalmology, and is a significant part of all postgraduate examinations in the subject. Featuring 640 multiple choice questions, this is a comprehensive revision guide for candidates taking the basic sciences component of the FRCOphth and ICO examinations. It is highly Trauma for the FRCS (Tr+Orth) Examination*

*Your Aid to Success*  
*Core Topics in Critical Care Medicine*

*FRCS Trauma and Orthopaedics Viva*  
*Urologists interested in prosthesis surgery currently offer a range of procedures eg slings for incontinence in both men and women, and is also within the remit of those undertaking AUS (artificial urinary sphincter) implantation, and likewise andrological surgeons undertaking penile prosthesis also offer AUS. There are a number of procedures which are common to all urologists with a general urology practice eg ureteric stents and testicular implants.*

*However, the purpose of this book is to cover this area of urological surgery and provide a reference book for those interested in expanding their practice.*  
*The aim of the updated book is to include new developments and update the literature in relation to sentinel node biopsy, new radiology techniques and long term epidemiological data. This book is useful for urologists, dermatologists, sexual health physicians as well as those with an interest in virology and genomics related to squamous cell cancers. The surgical techniques are all well illustrated with a step by step guide in order to allow those individuals in centres which are not expert centres to undertake the management of this devastating tumour.*

*Urology continues to be one of the most rapidly advancing specialities. Approximately 20% of all surgical operations and a similar percentage of surgical emergencies are urological in nature. However, often doctors have very limited experience of the many common and varied conditions encountered in this important surgical speciality. For the doctor or nurse expected to provide the initial assessment and management of a condition with which he or she has had very limited experience, this handbook provides an invaluable source of information and advice. Covering a wide spectrum of diseases and their treatment in the field of urology and surgical aspects of kidney, bladder, prostate and scrotal disorders, this handbook aims to give a brief overview of many different urological subjects including urological emergencies, cancers, infections, children's disorders and kidney stone disease. It is designed so that it can be quickly and efficiently accessed by a range of professionals involved in patient care, including medical students, nurses, surgical and urology doctors and general practitioners. Thoroughly revised for the third edition, the Oxford Handbook of Urology covers all recent guidelines and criteria including the significant advances in medical and surgical options that are now available to patients; key papers and notable recommendations in the field of neurology; expanded information on medical therapy of bladder overactivity and additional information on subjects including urethral diverticulum, pelvic organ prolapse, dialysis and renal transplantation, antenatal hydronephrosis, megaureters, and incontinence in children. An invaluable tool relevant not only to specialist trainees and specialist registrars on urology and surgical rotations, but also to general practitioners, emergency staff and the growing number of urological specialist nurses.*

*Here is the ideal book for preparing for the new Part One of the FRCS exam. To conform to the recently introduced syllabus the questions used are now much more surgically relevant. Answers, many with explanations, are provided to make the use of the MCQs a more useful learning exercise. The book follows the format of the examination and is split into the following sections: Anatomy (including histology, embryology and medical imaging); Physiology and Biochemistry; Clinical Pharmacology; General and Systemic Pathology; Microbiology; Clinical Immunology; Haematology. Essential Revision Notes for Fracs (UroI) Book 2: The Essential Revision Book for Candidates Preparing for the Intercollegiate Fracs (UroI) Examination*  
*Operative Orthopaedics: The Stammore Guide*  
*Master Pass Viva Practice for the FRCS(UROL) Examination, Second Edition*  
*Trauma Vivas for the FRCS*  
*Atlas of Clinical Andrology*  
*Andrology, the science of the physiology, pathology and molecular biology of male reproduction, is a relatively new speciality that has become increasingly important with the advent of modern assisted reproductive techniques (ART). The Atlas of Clinical Andrology describes both normal and abnormal reproductive physiology, and summarizes recent research in the fields of endocrinology, immunoandrology, molecular andrology, and ART. Focusing on the cutting edge of recent knowledge and advances in clinical andrology, it incorporates the latest clinical research findings and makes them accessible to clinicians who need this essential information for the most effective application of assisted reproductive techniques.*  
*This brand-new revision aid has been designed specifically to help medical students and early post-graduate doctors learn and remember pertinent information about various neurological conditions through pictorial representation, and will be invaluable throughout medical studies and particularly useful in the pressured run-up to final and post-graduate examinations. The highly-structured information is presented in a consistent, double-page format. Each condition is represented by a characterful and memorable visual mnemonic, accompanied by a concise, high-yield review covering definition, aetiology, epidemiology, presentation, investigation, management, complications and prognosis. Over 40 common conditions are included, organized alphabetically for ease of reference. Neurology is often viewed as a challenging subject to learn. By utilising visual imagery to aid memory and recall of important information, the author brings a refreshing new approach to knowledge consolidation.*  
*With over 1000 questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to Bailey & Love's Short Practice in Surgery. The book assists readers in their preparation for examinations and to test their knowledge of the principles and practice of surgery as outlined within Bailey & Love. Sub-divided into 13 subject-specific sections, both MCQs and EMQs provide a comprehensive coverage of the surgical curriculum as well as the core learning points as set out in Bailey & Love: Each section emphasises the importance of self-assessment within effective clinical examination and soundly based surgical principles, while while taking into account the latest developments in surgical practice. MCQs and EMQs in Surgery is an excellent companion to Bailey & Love and provides a valuable revision tool for those studying for MRCS.*

*Atlas of Male Genitourethral Surgery*

*Prosthetic Surgery in Urology*

Male genitourethral abnormalities are a source of great concern and distress to those affected. Surgery, when required, is very specialized and often extremely complex requiring expert surgical skills in order to achieve the best outcomes. Atlas of Male Genitourethral Surgery. The illustrated Guideprovides urological surgeons, at all levels of experience from trainees to established specialists, with a full colour, highly illustrated and step-by-step approach to male genitourethral surgery, enabling complete mastery of surgical techniques in this difficult and challenging area. Full-color throughout and with over 430 high-quality images, this comprehensive atlas covers key areas of urologic surgery including: Surgery for penile curvature Urethral reconstruction and artificial urinary sphincters Penile and scrotal reconstruction Surgery for male infertility Surgery for erectile dysfunction Surgery for penile cancer Each chapter includes an introduction to the condition and its challenge, a step-by-step guide to the surgical procedures applicable for that condition with surgical tips and tricks for improved techniques and outcomes. Brought to you by the world's leading experts in the field of genitourethral surgery, this outstanding book guides you through the most challenging of operations, helping you deliver high quality clinical care to your patients.

The must-have book for candidates preparing for the oral component of the FRCS (Tr and Orth)

As Head of Oncological Surgery and the Gynecology Clinic at Berlin's Chanté Comprehensive Cancer Center, Jalid Sehoui is one of the world's leading cancer specialists. Every day, he experiences situations in which conversations take on a life-or-death significance. Delivering bad news is one of the most difficult tasks we face in life, especially for professionals such as doctors, police, or crisis intervention personnel, yet it is rarely touched on during training. Over the course of their career, a doctor will hold conversations with around 200,000 patients and their relatives that invariably involve delivering good or bad news. Either way, existential questions will arise, and the way the news is delivered is vital: recent studies show that it has a significant impact on patients' quality of life and the way they experience treatment. Mixing his wide-ranging professional experience with personal stories, Sehoui describes the emotions and perspectives of those who have to give and receive bad news from a broad perspective. His book can be helpful for anyone who has to deliver bad news—managers, friends, or parents.

This, along with Book 2, is the essential revision book for candidates preparing for the Intercollegiate FRCS (UroI) examination.

Textbook of Penile Cancer

MCQs for FRCS

Viva Practice for the FRCS(UroI) Examination

Revision aid for FRCS , EBOT , SICOT and Board Examinations

Viva Training in ENT

This is the first revision book to be published specifically for candidates sitting the FRCS(UroI) examination. It presents a selection of questions arising from common clinical scenarios along with detailed model answers. The emphasis is on current concepts and topics asked in the exam. Each chapter has been written by senior urology trainees who have recently passed the examination, in conjunction with experienced consultant urological surgeons. In addition to FRCS(UroI) examination candidates, this book will also be relevant to those sitting the FEBU or MSc urology examination, or to established consultants seeking a useful refresher text in areas outside their subspecialist interest. The British Association of Urological Surgeons (BAUS) is a charity whose mission is to promote the highest standard in the practice of Urology. As President of BAUS, it is therefore a great privilege and pleasure to introduce this excellent book." - from the Foreword by Derek Fawcett "No Urology trainee should be without this important and valuable contribution to the training of future consultants." - from the Foreword by Hashim U Ahmed.

Based on the highly successful Oxford revision course, this book helps candidates prepare for the viva section of the FRCS Trauma and Orthopaedics exam. Drawn from questions asked in the Oxford revision course, this title provides a tried and tested revision tool, ideal for this high-pressure examination.

The MRCS Clinical Examination is the final requirement to obtain the professional qualification for the Intercollegiate Membership of the Royal College of Surgeons. This Membership allows the transition from doctor to surgeon and a career in higher surgical training. This standardised clinical examination requires candidates to demonstrate their ability in examining patients, with effective and clear communication. The authors should be commended on producing a book that covers all clinical sections of the Examination, in such a concise, comprehensive and structured manner. This study guide will serve as your personal tutor working closely with you, prompting and providing pointers to improve your examination technique. It includes dozens of clinical scenarios, demonstrating how to examine the system and avoid common mistakes. In addition, the candidates can improve their communication skills, which is an integral part of this Examination. This book complements the "Insider Medical MRCS Clinical Course" - It simulates the actual test conditions by providing sample cases and answers, coupling identification of weaknesses and strengths. This book will also prove to be extremely valuable for the new-style MRCS OSCE - Nigel Mendoza in his Foreword

The book details the structure of the ST3 urology national selection interview. It comprises the competition ratios in 2016 and the planned changes in 2017, the structure of the interview including the five stations with detailed explanation of each station, common mistakes and pitfalls and the Dos and Don'ts based on 5 years of feedback from different candidates. It starts with studying the portfolio station, commonly asked questions and how to answer them. The elective station is also fully explored with coverage of all the frequently asked topics and detailed answers based on NICE guidelines, BAUS guidelines, and EAU guidelines. This book presents a unique approach to the communication skills station and how to handle different types of difficult communications with angry patients or relatives including breaking bad news with a systematic stepwise approach that guarantees a high score and a successful outcome. The Emergency station is also examined thoroughly representing repetitively asked scenarios with comprehensive answers, and finally the practical skills station is addressed with the most likely asked scenarios accompanied by thorough explanation and illustrations. This book is a must read for every aspiring urologist who is aiming to achieve a national training number in urology. It is also a useful read for candidates preparing for the FRCS urology examination.

ST3 Urology National Selection Interview Guide

Clinical Microbiology

A Case-Based Approach

Concise Orthopaedic Notes

MCQs for FRCOphth and ICO Basic Sciences Examinations

This is the first revision book to be published specifically for candidates sitting the FRCS(UroI) examination, which tests the required standard of a recognised Urology specialist. It provides a selection of common clinical scenarios together with a guide to answering the FRCS(UroI) questions. Each chapter is written by Consultant Urological Surge Vivas for the Oral and Maxillofacial Surgery FRCS provides candidates with 100 high-quality viva topics and expert guidance to prepare for this difficult exit oral exam. Written and edited by consultant oral and maxillofacial surgeons who have succeeded in the exam, this book provides comprehensive coverage of theory and practice. Split into 15 chapters of key sub-specialities, all 100 questions are mapped to the surgical curriculum preparing you for the FRCS oral examination. Each topic contains a visual aid, such as an x-ray or photograph, to replicate exam conditions. All answers have a full explanation and further reading to ensure high-quality self-assessment and quick recognition of areas that require further study. Providing a thorough assessment of the reader's oral and maxillofacial surgery knowledge, this is an essential revision book for any candidate facing the Oral and Maxillofacial Surgery FRCS oral examination.

This new book is targeted at higher trainees in orthopaedic surgery preparing for the second part of the FRCS (Tr & Orth) exam. The exam involves a set of vivas during which a range of topics is discussed, the aim being to demonstrate trauma safety and competence rather than trauma expertise. Examiners may use props such as models, clinical pictures, clinical studies, and x-rays to introduce topics and initiate discussion. This book uses a similar model to allow the candidate to practise key topics for discussion with common presentations and histories, and high quality x-rays. The book lends itself to individual and small group learning as trainees prepare for their examinations.

These concise revision notes are aimed at candidates preparing for UK and international FRCS (Trauma & Orthopaedics) exit examination as well as the European Board (EBOT) and SICOT diplomas. The book has been written in an easy to read style, with a focus on being an exam candidate's companion for quick revision on the go. Candidates are usually caught between a busy job and the demands of these challenging exams. This book covers the depth and breadth of Trauma & Orthopaedics knowledge to help candidates sail through the Fellowship exit examinations. We have aimed to provide a high quality one stop concise knowledge bank to cover the whole syllabus of Trauma & Orthopaedics in a well organised bullet point style. This will provide a useful resource for both part 1 (MCQs, EMQs) as well as part 2 (Viva and Clinical) components of the exit examinations. It is an ideal companion to complement your preparation for the examination with the most useful information presented in the most succinct manner. The authors are senior members of the FRCS Mentor Group who have between them ample up to date experience and knowledge with the Fellowship examination. They have attended most postgraduate orthopaedic courses in the UK and internationally, and have reviewed all relevant exam book. They have excellent track records of helping many candidates to pass their exams. This book is complemented by hundreds of diagrams, illustrations, radiographs and clinical images. There are QR codes interspersed within the chapters which when scanned using your smartphone camera, link up to either the corresponding open-access seminal paper or to a YouTube video pertaining to the topic discussed. We look forward to the readers' feedback that will help us immensely to improve the contents in the next edition for the benefit of future orthopaedic aspirants. Head over to Amazon, Google Books and to BookAuthority.org to leave a review, or write to the email below. We also invite anyone who is interested to become an author of the next edition, or to discuss future collaboration or sponsorship opportunities to contact the editor on: thefrscmentor@gmail.com

As President of BAUS, it is therefore a great privilege and pleasure to introduce this excellent book." - from the Foreword by Derek Fawcett "No Urology trainee should be without this important and valuable contribution to the training of future consultants." - from the Foreword by Hashim U Ahmed

This textbook is based on the curriculum for US, UK, Canadian and Australasian Urological trainees. It offers an in-depth summary of the knowledge needed to pass the boards and FRCS examination in Trauma and Orthopedic surgery. The focus is on basic information on every orthopedic subspecialty, including: Surgical anatomy, basic sciences, adult reconstruction, pediatric orthopedics, foot and ankle surgery, orthopedic pathology, the spine, sports surgery, upper limb, wrist and hand surgery, and orthopedic traumas. All sections are written by experts in the respective field and utilize a consistent bullet-point format, chosen to facilitate the learning experience and help readers memorize and organize knowledge. A clear and concise "take-home message" section precedes each topic, and key references are highlighted at the end of each chapter.

The new edition of The Best of Five MCQS for the European Specialty Examination in Gastroenterology and Hepatology is a question book designed to assist in preparations for the ESEGH. The book has been fully updated to reflect the structure and content of the new examination introduced in 2018 and the most recent guidelines.

This is the first revision book to be published specifically for candidates sitting the FRCS(UroI) examination. It presents a selection of questions arising from common clinical scenarios along with detailed model answers. The emphasis is on current concepts and topics asked in the exam. Each chapter has been written by senior urology trainees who have recently passed the examination, in conjunction with experienced consultant urological surgeons. In addition to FRCS(UroI) examination candidates, this book will also be relevant to those sitting the FEBU or MSc urology examination, or to establ.

This dedicated revision resource provides candidates with high quality self-assessment in order to maximise exam success. Written by expert consultants and senior trainees/fellows, it features over 100 single best answer questions, over 70 extended matching questions and 70 vivas specialising in trauma. Each answer contains an up to date explanation and helpful sources for further reading to ensure quick identification of the key areas you need to focus on more thoroughly.

The range of topics which you may be questioned on during a final ENT Viva exam can be very varied. Viva Training in ENT ensures you can answer any question confidently and comprehensively, this book provides you with over 430 examples, mirroring exactly the format of the examination questions and covering all the relevant areas of the curriculum. Dedicated chapters on topics such as rhinology, head and neck, otology and paediatrics take you through the types of scenarios that you are likely to face, often presenting you with a clinical example and asking you a range of questions to test not only your diagnostic skills, but also your supporting knowledge. Three further chapters cover the clinical section of the exam involving patients, and the operative surgery and communication skills stations. These chapters provide both example scenarios and general advice on how to impress the examiners, giving you a thorough grounding in how best to communicate your knowledge and complete tasks calmly and methodically. For each question, detailed model answers and explanatory notes are provided, along with links to relevant websites and key journal articles for further reference. Questions are supplemented with over 85 illustrations and photographs, allowing you to review real examples of the conditions about which you will be questioned. For any candidate wishing to complete the FRCS (ORL-HNS) or the DOHNS Viva with professionalism and a real depth of knowledge, this book's detail and variety of information will be invaluable. Its clear layout and topical structure also make it ideal for surgeons wishing to refresh their clinical knowledge.

Postgraduate Orthopaedics

Viva Guide for the FRCS (Tr & Orth) Examination

A Visual Approach

Paediatrics for the FRCS (TR + ORTH) Examination

MCQs and EMQs in Surgery: A Bailey & Love Companion Guide

*This concise, beautifully illustrated book provides a convenient introduction to the basic science of medical microbiology and how this relates to clinical practice. Expanded from the prize-winning first edition to cover virology and parasitology in addition to bacteriology, this second editions explains the essentials of microbial infection and continues to provide a sound basis for developing logical diagnostic and management strategies, including the critical area of antibiotic usage. Section One focuses on the clinical with chapters centred around infections of the organ systems, while full coverage of the scientific aspects underpinning microbial disease follows in Section Two.*

*"This is the first revision book to be published specifically for candidates sitting the FRCS(UroI) examination, which tests the required standard of a recognised Urology specialist. It provides a selection of common clinical scenarios together with a guide to answering the FRCS(UroI) questions. Each chapter is written by Consultant Urological Surgeons or Senior Urology Trainees who have already been successful in passing the examination. This second edition responds to continual changes in practice: The chapters on urological cancers including prostate cancer, bladder cancer and renal cancer have important updates due to emergence of new evidence and changes in NICE, EAU and AUA guidelines. Substantial revisions to other sections such as paediatric urology, female urology, urinary stone disease, benign prostatic hyperplasia and uro-technology to meet standards of current best practice. Adds an extra chapter on the TNM classification of urological cancers. The book remains an invaluable revision tool for the FRCS(UroI) and will also be useful for individuals sitting the FEBU and equivalent postgraduate urological examinations in the USA, Australia and Asia. Established consultants will also find value in the text as a 'refresher' in areas outside their subspecialist interest." - Provided by publisher.*

*This book includes a foreword by Nicola Maffulli, Professor of Trauma and Orthopaedic Surgery, Keele University School of Medicine, and Consultant Trauma and Orthopaedic Surgeon, North Staffordshire Royal Infirmary and City General Hospital, Staffordshire. The new structure of the Fellowship of the Royal College of Surgeons (FRCS) examination requires candidates to complete two papers in extended matching question (EMQ) and multiple choice question (MCQ) format. This invaluable revision aid contains a 'bank' of over 350 questions in self-test format. Comprehensive answers are detailed at the end of each section. With a focus on high-yield topics, students can choose use the resource in the early stages as an overview of the subjects, then later as an ideal exam revision aid. There's nothing else like it! Specialist registrars preparing for the FRCS (Trauma and Orthopaedics) examination will find this an essential revision aid. It is also useful for Basic Surgical Trainees preparing for the Membership of the Royal College of Surgeons (MRCS) examination.*

*Senior investigators internationally have here collaborated to produce an international reference work. Each contributor provides critical and thought provoking concepts and ideas based on the latest developments in their field. The result is a must read and timely reference work for investigators who are interested in how spermatogenesis is currently understood and which are the most promising avenues for future research; an Introduction sets the context for the chapter and points out the relevance of the research for basic research scientists and clinicians.*

**VIVA PRACTICE FOR THE FRCS(UROLOG) AND POSTGRADUATE UROLOGY EXAMINATIONS, SECOND EDITION.**

**Vivas for the Oral and Maxillofacial Surgery FRCS**

This, along with Book 1, is the essential revision book for candidates preparing for the Intercollegiate FRCS (UroI) examination. Surgical trainees have very busy clinical duties and along with personal commitments this means that time for exam revision is very tight and often done during tired evenings and weekends. Essential Revision Notes for FRCS (UroI) - Book 2 provides a precious concise collection of facts, information and guidance for the benefit of all urology trainees and in particular those sitting the FRCS (UroI) who therefore already possess undergraduate medical knowledge and basic training in surgery. It is designed to be a highly effective tool to be used with the FRCS (UroI) and, along with its sister volume, Book 1, forms the only set of textbooks in the world that separates urological knowledge into the 8 different stations of the exam. All content is neatly summarised into bite-size paragraphs, thus removing the task of information gathering and synthesizing which is time-consuming for busy trainee. Diagrams and tables display information in a visually attractive and simplified way to aid trainee revision. About the author Jack Donati-Bourne is a final year NTN urology trainee in the West Midlands Deanery. He was raised in Rome (Italy) but moved to the UK to study Medicine, qualifying at the University of Birmingham in 2010, later achieving a Merit Award for an MSc in Anatomy at the same institution. He successfully proceeded to obtain Membership (MRCS, 2013) and subsequently Fellowship of the Royal College of Surgeons in England (FRCS UroI, 2019). He has written more than 10 first-author publications in peer-reviewed journals and led presentations on an international surgical platform in 8 different countries. Jack Donati-Bourne has a passion to teach, encourage and inspire trainees and has been invited to lead an MRCS revision session in the Royal College of Surgeons in London, moderated undergraduate exams for the University of Birmingham Medical School and taught on the FRCS (UroI) Rapid Revision Course. He is an avid supporter of Inter Milan and of the "Azzurri."

The aim of this book is to provide a selection of representative MCQs together with a detailed explanation of each answer covering the topic in depth. Each chapter has been written by experienced Urological surgeons who have already been successful in passing the examination. In addition to the FRCS(UroI) examination MCQs form the basis of equivalent postgraduate Urological examinations internationally and the scope of this book will be an invaluable addition to individuals sitting the FEBU and similar exams in the USA, Australia and Asian countries. Established consultants may also find the text useful as a 'refresher' in areas outside their subspecialist interest.

The first revision guide specifically for FRCS(UroI) exam candidates, this book presents questions arising from common clinical scenarios along with detailed model answers. The emphasis is on current concepts and topics asked in the exam with each chapter written by senior urology trainees in collaboration with experienced consultant urological surgeons. This book can also be used by candidates sitting the FEBU or MSc urology examination, as well as consultants seeking a useful refresher text. New to this edition: ♦ All management suggestions are updated in line with NICE guidance and evidence-base ♦ Major update to prostate cancer chapter, which has seen key advances over the past 5 years.

The critical care unit manages patients with a vast range of disease and injuries affecting every organ system. The unit can initially be a daunting environment, with complex monitoring equipment producing large volumes of clinical data. Core Topics in Critical Care Medicine is a practical, comprehensive, introductory-level text for any clinician in their first few months in the critical care unit. It guides clinicians in both the initial assessment and the clinical management of all CCU patients, demystifying the critical care unit and providing key knowledge in a concise and accessible manner. The full spectrum of disorders likely to be encountered in critical care are discussed, with additional chapters on transfer and admission, imaging in the CCU, structure and organisation of the unit, and ethical and legal issues. Written by Critical Care experts, Core Topics in Critical Care Medicine provides comprehensive, concise and easily accessible information for all trainees.
