A study published by Facebook emphasises the importance of smartphones in our lives; about 80% of users make use of their smartphone within 15 minutes of waking up each day. At the same time, the traditional function of a telephone is becoming less and less important. The high quality of integrated cameras means that the smartphone is increasingly used for photography. As well as with photos, users trust their devices with their most personal communications, such as Facebook, WhatsApp and email. This brings some risks with it, as such usage makes the smartphone interesting for criminals, who attempt to infect

However, many smartphone users do not yet have the same sense of responsibility, even though their devices store personal data, private photos, Internet banking information or even company data. As modern smartphones are often expensive to buy, they are also an attractive target for thieves. Top-quality smartphones cost several hundred Euros. As it is not possible to physically prevent them from being stolen, they must be made less attractive to thieves. Consequently, many of

technology and baffled by the scant documentation and online support. All topics for the Android will be covered, from setup and configuration, to use of the phone features: texting, e-mailing, accessing the Internet, maps, navigation, camera and video, synching with a PC, and expanding the device's potential with new software. As usual, humor is generously sprinkled throughout the text. The accessible and fun writing style provides relief but never gets in the way of
