"[A] gorgeously illustrated compendium."--Sunset This lavishly illustrated atlas takes readers off the beaten path and outside normal conceptions of California, revealing its myriad ecologies, topographies, and histories in exquisite maps and trail paintings. Based on decades of exploring the backcountry of the Golden State, artist-adventurer Obi Kaufmann blends science and art to illuminate the multifaceted array of living, connected systems like no book has done before. Kaufmann depicts layer after layer of the natural world, delighting in the grand scale and details alike. The effect is staggeringly beautiful: presented alongside California divided into its fifty-eight counties, for example, we consider California made up of dancing tectonic plates, of watersheds, of wildflower gardens. Maps are enhanced by spirited illustrations of wildlife, keys that explain natural phenomena, and a clear-sighted but reverential text. Full of character and color, a bit larger than life, The California Field Atlas is the ultimate road trip companion and love letter to a place.

Flowers and Fungi Boxed Note Cards

Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days and sunlight streaming down through bare branches of towering trees, life on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. Wake Up, Woods showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of Wake Up, Woods will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that happen in forests where we live and play.
