In this updated version of her landmark book Learning to Listen, Learning to Teach, celebrated adult educator Jane Vella revisits her twelve principles of dialogue education with a new theoretical perspective gleaned from the discipline of quantum physics. Vella sees the path to learning as a holistic, integrated, spiritual, and energetic process. She uses engaging, personal stories of her work in a variety of adult learning settings, in different countries and with different educational purposes, to show readers how to utilize the twelve principles in their own practice with any type of adult learner, anywhere.

*While violence runs rampant throughout New York, a teenage girl faces danger within her own home in Meg Medina's riveting coming-of-age novel. Nora Lopez is seventeen during the infamous New York summer of 1977, when the city is besieged by arson, a massive blackout, and a serial killer named Son of Sam who shoots young women on the streets. Nora's family life isn't going so well either: her bullying brother, Hector, is growing more threatening by the day, her mother is helpless and falling behind on the rent, and her father calls only on holidays. All Nora wants is to turn eighteen and be on her own. And while there is a cute new guy who started working with her at the deli, is dating even worth the risk when the killer likes picking off couples who stay out too late? Award-winning author Meg Medina transports us to a time when New York seemed balanced on a knife-edge, with tempers and temperatures running high, to share the story of a young woman who discovers that the greatest dangers are often closer than we like to admit—and the hardest to accept.*

*While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beesby Lonsdale questions this view. In her innovative book, she demonstrates how teachers can guide their students by showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics illuminate the translation process. Challenging long-held assumptions, she establishes a fascinating framework on which to base the structure of a professional prose-translation class. Her original contributions to the question of directionality and to the specific strategies of translating are applicable to not only the teaching of translation from Spanish to English, but to other teaching situations and to other pairs of languages as well. She also reviews the latest attempts in translation theory to define and contextualize ideal translator competence, student translator competence, and general translation strategies. Beesby Lonsdale completes her book by applying her conclusions to selecting and organizing the content of teaching translation from Spanish to English. She illustrates one or more of the basic translation principles through 29 teaching units, which are prefaced by objectives, tasks, and commentaries for the teacher, and through 48 task sheets, which show how to present the material to students.*

*Fourteen new essays trace the historical development of the distinction between primary and secondary qualities, a key topic in metaphysics, epistemology, and philosophy of perception. The volume starts with the ancient Greeks, discusses virtually all major figures of the early modern era, and reflects on the place of the topic in philosophy today.*

Anne Kreamer considered herself a youthful 49 until a photo of herself with her teenage daughter stopped her in her tracks. In one unguarded moment she saw herself for what she really was -- a middle-aged woman with her hair dyed much too harshly. In that one moment Kreamer realized that she wasn't fooling anyone about her age and decided it was time to get real and embrace a more authentic life. She set out for herself a program to let her hair become its true color, and along the way discovered her true self. *Going Gray is Kreamer's exploration of that experience, and a frank, warm and funny investigation of aging as a female obsession. Through interviews, field experiments, and her own everywoman's chronicle, Kreamer probes the issues behind two of the biggest fears aging women face: Can I be sexually attractive as a gray-haired, middle-aged woman? Will I be discriminated against in the work world? Her answers will surprise you. In searching for the balance between attractiveness and authenticity, Kreamer's journey of middle-aging illuminates in a friendly, useful, and entertaining way the politics and personal costs of this generation's definition of "aging gracefully".*

This book offers a challenging and stimulating perspective on translation. It is a comprehensive practical course in translation between English and Arabic and, as such, will be invaluable to students of translation. Based on contrastive linguistics, it features a variety of translation key concepts, including lexical, grammatical and stylistic issues. The book balances theory and application in translation. The book is the result of the many courses the author has taught to students of Arabic-English translation, and will help bilingual speakers become familiar with translation techniques and develop practical translation skills to the same standard as that expected of a university graduate. It presents a remarkable selection of examples of English/Arabic translation. Through lexical research, glossary building and an introduction to key theoretical concepts in translation, the reader will gain a better understanding of what graduate-level translation involves.
