This is Volume A (chapters 1-12) of the best-selling Western civilization text that has helped hundreds of thousands of students learn about the present by exploring the past. Jack Spielvogel's engaging, chronological narrative weaves the political, economic, social, religious, intellectual, cultural, and military aspects of history into a gripping story that is as memorable as it is instructive. Each chapter offers a substantial introduction and conclusion that sparks students' imaginations by giving them a context within which to understand these disparate themes. And while the

single-author narrative makes it easy for students to follow the story of Western civilization, Spielvogel has included dozens of maps and primary sources--including official documents, poems, and songs--that enliven the past while introducing students to the challenges involved in interpreting history. through the prism of the relationship between faith and reason." —Free Beacon The genius of Western civilization is its unique synthesis of reason and faith. But today that synthesis is under attack—from the East by radical Islam (faith without reason) and from within the West itself by aggressive secularism (reason without faith). The stakes are incalculably high. The naïve and increasingly common assumption that reason and faith are incompatible is simply at odds with the facts of history. The revelation in the Hebrew Scriptures of a reasonable Creator imbued Judaism and Christianity with a conviction that the world is intelligible, leading to the

flowering of reason and the invention of science in the West. It was no accident that the Enlightenment took place in the culture formed by the Jewish and Christian faiths. We can all see that faith without reason is benighted at best, fanatical and violent at worst. But too many forget that reason, stripped of faith, is subject to its own pathologies. A supposedly autonomous reason easily sinks into fanaticism, stifling dissent as bigoted and irrational and devouring the humane civilization fostered by the integration of reason and faith. The blood-soaked history of the twentieth century attests to the totalitarian forces unleashed by corrupted reason. But Samuel

Gregg does more than lament the intellectual and spiritual ruin caused by the divorce of reason and faith. He shows that each of these foundational principles corrects the other's excesses and enhances our comprehension of the truth in a continuous renewal of civilization. By recovering this balance, we can avoid a suicidal winner-take-all conflict between reason and faith and a future that will respect neither.

A collection intended for students, presenting primary sources (some of them excerpts, and some of them translated) and study questions designed to stimulate discussion. Vol. II deals with the period of the 17th century to the present. Ch. 9 (pp. 392-436), "The Jewish

Holocaust", contains excerpts from documents (e.g. German official documents, Nazi leaders' speeches, eyewitness accounts and memoirs, and Nuremberg Trial documents) pertaining to Nazi anti-Jewish policies, the Nazi genocide of the Jews, Jewish resistance, and postwar trials against those responsible for the mass murders.

Peter Kreeft presents a series of brilliant essays about many of the problems that undermine our Western civilization, along with ways to address them. "These essays are not new proposals or solutions to today's problems," he says. "They are old. They have been tried, and have worked. They have made people happy and good. That is what makes them so radical and so unusual today." In his witty, readable style, Kreeft implores us to gather wisdom and preserve it, as the monks did in the Middle Ages. He offers relevant philosophical precepts, divided into various categories, that can be collected and remembered in order to guide us and future generations in

the days ahead. Kreeft emphasizes that the most necessary thing to save our civilization is to have children. If we don't have children, our civilization will cease to exist. The "unmentionable elephant in the room", he tells us, is sex, properly understood. Religious liberty is being attacked in the name of "sexual liberty", in other words, abortion. Kreeft encourages us to fight back—with joy and confidence—with the one weapon that will win the future: children.

Western civilization and world history are often seen as different, or even mutually exclusive, routes into historical studies. This volume shows that they can be successfully linked, providing a tool to see each subject in the context of the other, identifying influences and

connections. *Western Civilization in World History* takes up the recent debates about the merits of the well-established 'Western civ' approach versus the newer field of world history. Peter N. Stearns outlines key aspects of Western civilization - often assumed rather than analyzed - and reviews them in a global context. What do we mean by Western Civilization? When did the expression originate and why? At a time when there is a widespread perception that Western Civilization is undergoing a historic crisis, and when postmodernism, feminist theory, afrocentrism, deconstruction, and other current philosophical schools define themselves as alternatives to, or critiques of, Western Civilization, this book seeks to trace the development of the concept of

Western Civilization and to examine the reasons for its endurance. It also suggests ways in which proponents of Western Civilization can co-opt ideas from opponents. Written from a multidisciplinary viewpoint, the essays in this volume trace the development of the concept of Western Civilization and seek to explode many standing beliefs--primarily those which concern the very existence of a Western tradition. Bound to be controversial, the book will be of interest to scholars and activists in the fields of cultural history, anthropology, and the history of ideas, as well as general readers interested in the enduring discussion of the notion of Western Civilization. Best-selling author Jackson Spielvogel has helped over one

million students learn about the present by exploring the past. Spielvogel's engaging narrative weaves the political, economic, social, religious, intellectual, cultural, and military aspects of history into a gripping story that is as memorable as it is instructive. WESTERN CIVILIZATION includes 155 maps and excerpts of more than 250 primary sources that enliven the past while introducing students to the source material of historical scholarship. After challenging the multicultural effort to “provincialize” the history of Western civilization, this book argues that the roots of the West’s exceptional creativity should be traced back to the uniquely aristocratic warlike culture of Indo-European speakers.

This volume introduces readers to an age-old question that has perplexed both Russians and Westerners. Is Russia the eastern flank of Europe? Or is it really the heartland of another civilization? In exploring this question, the authors

present a sweeping survey of cultural, religious, political, and economic developments in Russia, especially over the nineteenth and twentieth centuries. Based on the inter-disciplinary Russian studies program at Dickinson College, this splendid collection will complement many curricula. The text features highlight boxes and selected illustrations. Each chapter ends with a glossary, study questions, and a reading list.

Michael Burger's goal in this inexpensive overview is to provide a brief, historical narrative of Western civilization. Not only does its length and price separate this text from the competition, but its no-frills, uncluttered format and well-written, one-authored approach make it a valuable asset for every history student. *The Shaping of Western Civilization: From Antiquity to the Mid-Eighteenth Century* begins with the ancient Near East and ends with the mid-eighteenth century. Unlike

other textbooks that pile on dates and facts, Shaping is a more coherent and interpretive presentation. Burger's skills as writer and synthesizer will enable students to obtain the background required to ask meaningful questions of primary sources. In addition to suggestions for further reading, this overview includes over 40 images and 14 maps.

"In this wonderful book,
Thomas Patterson effectively

dethrones the concept of 'civilization' as an abstract good, transcending human society." --Martin Bernal

Drawing on his extensive knowledge of early societies, Thomas C. Patterson shows how class, sexism, and racism have been integral to the appearance of "civilized" societies in Western Europe. He lays out clearly and simply how civilization, with its designs of "civilizing" and "being civilized," has been closely tied to the rise of capitalism in Western Europe and the development of social classes.

will add multicultural and interdisciplinary insights to the minds of a new generation of students. New edition features greater coverage of diversity, new critical thinking questions, and an easier-to-read single column format.

Featuring the one author, one voice approach, this text is ideal for instructors who do not wish to neglect the importance of non-Western perspectives on the study of the past. The book is a brief, affordable presentation providing a coherent examination of the past from ancient times to the present. Religion, everyday life, and transforming moments are the

three themes employed to help make the past interesting, intelligible, and relevant to contemporary society.

The year is 2393, and the world is almost unrecognizable. Clear warnings of climate catastrophe went ignored for decades, leading to soaring temperatures, rising sea levels, widespread drought and—finally—the disaster now known as the Great Collapse of 2093, when the disintegration of the West Antarctica Ice Sheet led to mass migration and a complete reshuffling of the global order. Writing from the Second People's Republic of China on the 300th anniversary of the

Great Collapse, a senior scholar presents a gripping and deeply disturbing account of how the children of the Enlightenment—the political and economic elites of the so-called advanced industrial societies—failed to act, and so brought about the collapse of Western civilization. In this haunting, provocative work of science-based fiction, Naomi Oreskes and Eric M. Conway imagine a world devastated by climate change. Dramatizing the science in ways traditional nonfiction cannot, the book reasserts the importance of scientists and the work they do and reveals the self-serving

interests of the so called "carbon combustion complex" that have turned the practice of science into political fodder. Based on sound scholarship and yet unafraid to speak boldly, this book provides a welcome moment of clarity amid the cacophony of climate change literature.
